PREFACE

This Code constitutes a complete codification of the general and permanent ordinances of the City of Clarkesville, Georgia.

Source materials used in the preparation of the Code were the ordinances adopted by the city council. The source of each section is included in the history note appearing in parentheses at the end thereof. The absence of such a note indicates that the section is new and was adopted for the first time with the adoption of the Code. By use of the comparative tables appearing in the back of this Code, the reader can locate any ordinance included herein.

The chapters of the Code have been conveniently arranged in alphabetical order, and the various sections within each chapter have been catchlined to facilitate usage. Notes which tie related sections of the Code together and which refer to relevant state law have been included. A table listing the state law citations and setting forth their location within the Code is included at the back of this Code.

Chapter and Section Numbering System

The chapter and section numbering system used in this Code is the same system used in many state and local government codes. Each section number consists of two parts separated by a dash. The figure before the dash refers to the chapter number, and the figure after the dash refers to the position of the section within the chapter. Thus, the second section of chapter 1 is numbered 1-2, and the first section of chapter 6 is 6-1. Under this system, each section is identified with its chapter, and at the same time new sections can be inserted in their proper place by using the decimal system for amendments. For example, if new material consisting of one section that would logically come between sections 6-1 and 6-2 is desired to be added, such new section would

be numbered 6-1.5. New articles and new divisions may be included in the same way or, in the case of articles, may be placed at the end of the chapter embracing the subject, and, in the case of divisions, may be placed at the end of the article embracing the subject. The next successive number shall be assigned to the new article or division. New chapters may be included by using one of the reserved chapter numbers. Care should be taken that the alphabetical arrangement of chapters is maintained when including new chapters.

Page Numbering System

The page numbering system used in this Code is a prefix system. The letters to the left of the colon are an abbreviation which represents a certain portion of the volume. The number to the right of the colon represents the number of the page in that portion. In the case of a chapter of the Code, the number to the left of the colon indicates the number of the chapter. In the case of an appendix to the Code, the letter immediately to the left of the colon indicates the letter of the appendix. The following are typical parts of codes of ordinances, which may or may not appear in this Code at this time, and their corresponding prefixes:

CODE COMPARATIVE TABLES	CCT:1
STATE LAW REFERENCE TABLE	SLT:1

Indexes

The indexes have been prepared with the greatest of care. Each particular item has been placed under several headings, some of which are couched in lay phraseology, others in legal terminology, and still others in language generally used by local government officials and employees. There are numerous cross references within the indexes themselves which stand as guideposts to direct the user to the particular item in which the user is interested.

Looseleaf Supplements

A special feature of this publication is the looseleaf system of binding and supplemental servicing of the publication. With this system, the publication will be kept up-to-date. Subsequent amendatory legislation will be properly edited, and the affected page or pages will be reprinted. These new pages will be distributed to holders of copies of the publication, with instructions for the manner of inserting the new pages and deleting the obsolete pages.

Keeping this publication up-to-date at all times will depend largely upon the holder of the publication. As revised pages are received, it will then become the responsibility of the holder to have the amendments inserted according to the attached instructions. It is strongly recommended by the publisher that all such amendments be inserted immediately upon receipt to avoid misplacing them and, in addition, that all deleted pages be saved and filed for historical reference purposes.

Acknowledgments

This publication was under the direct supervision of Palmer Carr, Supervising Editor, and Robert MacNaughton, Editor, of the Municipal Code Corporation, Tallahassee, Florida. Credit is gratefully given to the other members of the publisher's staff for their sincere interest and able assistance throughout the project.

The publisher is most grateful to Ms. Mary Wood, City Clerk, Mr. Winslow H. Verdery, Jr., City Attorney, and Mr. Richard Monroe, City Manager, for their cooperation and assistance during the progress of the work on this publication. It is hoped that their efforts and those of the publisher have resulted in a Code of Ordinances which will make the active law of the city readily accessible to all citizens and which will be a valuable tool in the day-to-day administration of the city's affairs.

In the case of the repeal of chapters, sections and subsections or any part thereof by subsequent ordinances, such repealed portions may be excluded from this Code by omission from reprinted pages affected thereby. The subsequent ordinances as numbered and printed, or omitted in the case of repeal, shall be prima facie evidence of such subsequent ordinances until such time that this Code of Ordinances and subsequent ordinances numbered or omitted are readopted as a new Code of Ordinances by the city council.

(b) Amendments to any of the provisions of this Code may be made by amending such provisions by specific reference to the section number of this Code in the following language: "That section _____ of The Code of the City of Clarkesville, Georgia, is hereby amended to read as follows:" The new provisions shall then be set out in full as desired.

(c) If a new section not heretofore existing in the Code is to be added, the following language shall be used: "That The Code of the City of Clarkesville, Georgia, is hereby amended by adding a section (division, article or chapter) to be numbered _____, which section (division, article or chapter) reads as follows:" The new section, division, article or chapter shall then be set out in full as desired.

(d) All sections, divisions, articles, chapters or provisions desired to be repealed must be specifically repealed by section, division, article or chapter number, as the case may be.

Sec. 1-7. Altering Code.

It shall be unlawful for any person to change or amend, by additions or deletions, any part or portion of

this Code or to insert or delete pages or portions thereof, or to alter or tamper with such Code in any manner whatsoever which will cause the law of the city to be misrepresented thereby. Any person violating this section shall be punished as provided in section 1-12.

Sec. 1-8. Supplementation of Code.

(a) By contract or by city personnel, supplements to this Code shall be prepared on an annual basis. A supplement to the Code shall include all substantive, permanent and general parts of ordinances passed by the city council during the period covered by the supplement and all changes made thereby in the Code. The pages of a supplement shall be so numbered that they will fit properly into the Code and will, where necessary, replace pages that have become obsolete or partially obsolete, and the new pages shall be so prepared that, when they have been inserted, the Code will be current through the date of the adoption of the latest ordinance included in the supplement.

(b) In preparing a supplement to this Code, all portions of the Code which have been repealed shall be excluded from the Code by the omission thereof from reprinted pages.

(c) When preparing a supplement to this Code, the codifier (meaning the person authorized to prepare the supplement) may make formal, nonsubstantive changes in ordinances and parts of ordinances included in the supplement, insofar as it is necessary to do so to embody them into a unified Code. For example, the codifier may:

- (1) Organize the ordinance material into appropriate subdivisions.
- (2) Provide appropriate catchlines, headings and titles for sections and other subdivisions of the Code printed in the supplement, and make changes in such catchlines, headings and titles.
- (3) Assign appropriate numbers to sections and other subdivisions to be inserted in the Code and, where necessary to accommodate new material, change existing section or other subdivision numbers.
- (4) Change the words "this ordinance" or words of the same meaning to "this chapter," "this article," "this division," etc., as the case may be, or to "sections _____ to _____" (inserting section numbers to indicate the sections of the Code which embody the substantive sections of the ordinance incorporated into the Code).
- (5) Make other nonsubstantive changes necessary to preserve the original meanings of ordinance sections inserted into the Code; but in no case shall the codifier make any change in the meaning or effect of ordinance material included in the supplement or already embodied in the Code.

Sec. 1-9. Liability for violations by corporations and other associations.

(a) Any violation of this Code by any officer, agent or other person acting for or employed by any corporation or unincorporated association or organization, while acting within the scope of his office or employment, shall in every case also be deemed to be a violation by the corporation, association or organization.

(b) Any officer, agent or other person acting for or employed by any corporation or unincorporated association or organization shall be subject and liable to punishment as well as the corporation or unincorporated association or organization for the violation by it of any provisions of this Code, where the violation was the act or omission, or the result of the act, omission or order, of any such person.

Sec. 1-10. Provisions considered continuations of existing ordinances.

The provisions appearing in this Code, so far as they are the same as ordinances adopted prior to this Code and included in such Code, shall be considered as continuations thereof and not as new enactments.

Sec. 1-11. Certain ordinances not affected by Code.

(14) Any ordinance levying or imposing taxes not included in this Code.

(15) Any ordinance establishing or prescribing street grades in the city.

No such ordinance shall be construed to revive any ordinance or part thereof that has been repealed by a subsequent ordinance which is repealed by this chapter; and all such ordinances are hereby recognized as continuing in full force and effect to the same extent as if set out at length in this Code.

Sec. 1-12. General penalty.

For any city ordinances which do not provide for penalties for violation thereof, any violator of any such ordinance shall be fined in an amount not to exceed \$100.00 per violation. Each day continuing in violation shall constitute a new violation.

Where a meeting of the council is devoted in part to matters within the authorized exceptions to public access requirements, any portion of the meeting not subject to any such exceptions shall be open to the public. No executive session shall be held except pursuant to a majority affirmative vote of the council taken in a public meeting. The minutes of the public meeting shall reflect the names of the councilmembers present, those voting for the executive session and the specific reasons for the executive session. Minutes of the executive session may be maintained by the city clerk at the direction of the mayor. If, during the course of a meeting, a councilmember leaves and a quorum no longer exists, the meeting cannot continue. If a quorum is not attained within 30 minutes, the meeting will be rescheduled by the mayor with the approval of the councilmembers present.

Charter References: Quorum, § 2.23.

Sec. 2-41. Agenda.

An agenda shall be made available to the councilmembers at least one business day prior to the day of a regularly scheduled meeting. A copy of the agenda and a list of those members present shall be made available to the public for

inspection within two business days of the adjournment of any meeting.

Sec. 2-42. Minutes.

The city clerk shall promptly record the minutes for each council meeting. The minutes serve as the official written record of the council meeting and shall be open for public inspection once approved as official by the council but in no case later than immediately following the next regular meeting of the board. The minutes shall specify the names of councilmembers present at the meeting, a description of each motion or other proposal made at the meeting, the councilmember who proposed each motion, the councilmember who seconded each motion, and a record of all votes. In the case of a roll call vote, the name of each councilmember voting for or against a proposal shall be recorded. It shall be presumed that a councilmember has voted in the affirmative unless the minutes show otherwise. More detailed information may be included in the minutes at the request of the council. The council must approve the minutes before they can be considered as an official record of the board. A copy of the minutes from the previous meeting shall be distributed to the councilmember at least one business day before the following meeting. The minutes of the previous meetings shall be corrected and approved by the council at the beginning of each regular meeting. A majority vote is required for approval. All councilmembers must conduct themselves in a professional and respectful manner. A councilmember is not allowed to speak at a meeting until he has been recognized by the mayor. All comments made by a councilmember shall address the motion being discussed. The mayor shall enforce these rules of decorum. If a councilmember believes that a rule has been broken, he can raise a point of order. A second is not required. The mayor can rule on the question or he can allow the council to debate the issues and decide the

issue by majority vote.

Sec. 2-45. Public participation.

Public participation in meetings of the council shall be permitted in accordance with the following provisions of this section:

- (1) *Public comments.* The final agenda item of the meetings shall be reserved for comments from the public relating to matters that were either on the published agenda, added to the agenda or the subject of discussion by the mayor and city council at the meeting. Individuals from the public will be allotted five minutes to make their comments and their comments must be limited to their announced topic. Public comment on matters that were neither on the agenda nor discussed at the meeting will not be allowed without a majority vote of the council. These limits can be waived by a majority vote of the council.
- (2) *Public participation on agenda items.* Public comment on an agenda item at the time the item is being considered by the council is allowed. These comments must be limited to the subject that is being debated. Members of the public may speak for five minutes and may only speak once. This privilege or these limits can be waived by a majority vote of the council. Anyone wishing to speak at any council meeting must be recognized by the mayor before addressing the council.
- (3) *Decorum.* Members of the public shall not make inappropriate or offensive comments at a council meeting and are expected to comply with the rules of decorum that are established for the mayor and council. Individuals who violate any rules of the council may be ruled out of order by the mayor or on a point of order made by a councilmember. A majority vote of the council will rule on the point of order. Any individual who violates the rules of decorum may be removed from the meeting at the direction of the mayor.
- (4) *Public hearings.* The council may schedule public hearings for the purpose of soliciting public comment on any subject of interest to the council. Hearings may be held immediately prior to, during, or following a meeting of the council or at such other places and times as the council may determine. No official action shall be taken at any such public hearing unless it is conducted during a regular or called meeting of the council.

Sec. 2-46. Committees.

The mayor may create committees of members of the council to study any issue before the council. Any such committees may make recommendations to the council, but no committee shall be empowered to make any final decisions on any matter before it for consideration. In addition to councilmembers, committees may include other city officials, staff or citizens at large. Whenever a committee is created, its duties, any limitation of the scope of its duties, and the times, places and periods of time for which the committee may operate shall be determined by the mayor.

This notice shall not be required from an existing alcoholic beverage license holder making application for the renewal of an existing license at the same location.

Sec. 6-110. Employee and manager regulations; employee pouring permits.

The following regulations shall apply to all establishments holding a license for consumption of alcoholic beverages on the premises:

- (a) No person shall be employed to dispense, sell, serve, take orders, mix alcoholic beverages, or serve in any managerial position by an establishment holding a license under this chapter until such person has been fingerprinted and cleared by the chief of police or his/her designee indicating that the person is eligible for such employment.
- (b) This section shall not be construed to include employees whose duties are limited solely to those of a busboy, cook, or dishwasher.
- (c) No employee pouring permit shall be issued until such time as a signed application has been filed with the city clerk or such department's designee and upon payment of a fee established by the city and a search of the criminal record of the applicant completed. The application shall include, but shall not be limited to, the name, date of birth, and prior arrest record of the person, though the fact of an arrest record shall be used for investigative purposes only, and shall give rise to no presumption or inference of guilt. Due to the inclusion of arrest information, these applications shall be regarded as confidential and shall not be produced for public inspection without a court order.
- (d) The chief of police or his/her designee shall have a complete and exhaustive search made relative to any criminal record of the person fingerprinted or cleared. If there is no record of a violation of this chapter, the chief or his/her designee shall issue an employee pouring permit to the person stating that the person is eligible for employment. If it is found that the person is not eligible for employment, the chief of police or his/her designee shall notify such person at the address contained in the application, in writing, that such person is not eligible for employment, the cause of such denial, and right of such person to appeal.
- (e) No person shall be granted an employee pouring permit unless it appears to the satisfaction of the chief of police or his/her designee that such person has not been convicted of, pled guilty to, or entered a

plea of nolo contendere to any crime involving moral turpitude, illegal gambling, illegal possession or sale of controlled substances, illegal sale or possession of alcoholic beverages, including the sale or transfer of alcoholic beverages to minors in a manner contrary to law, keeping a place of prostitution, solicitation of sodomy, or the commission of any sexually related crime within a period of five years of the date of conviction and been released from parole or probation. A person's first conviction for illegal possession of alcohol as a misdemeanor or violation of a city ordinance shall not, by itself, make a person ineligible for an employee pouring permit. No person shall be granted an employee pouring permit who has been convicted of, pled guilty to or entered a plea of nolo contendere to any federal, state, or local law for any felony within five years of the date of conviction and has not been released on parole or probation prior to the filing of an application for such permit. For purposes of this subsection, a conviction or plea of guilty or nolo contendere shall be ignored as to any offense for which a person whose sentence was entered under the Georgia First Offender Act, as amended; provided, however, that any such offense shall not be ignored if the person violated any term of probation imposed by the court granting first offender treatment or committed another crime and the sentencing court therefore entered an adjudication of guilt as to the crime for which the person had previously been sentenced as a first offender.

(f) An employee pouring permit shall be issued for a period of three calendar years from the date of the original application. As noted in subsection (k) of this section, the employee pouring permit must be in the possession of the employee while the employee is working at the licensed establishment. This permit must be in the possession of the employee while the employee permit holder is working and must be available for inspection by members of the police department or the city's staff.

(g) No person shall be issued a permit if it is determined that the person falsified, concealed or covered up any material fact by any device, trick or scheme while making an application to the city clerk for an employee pouring permit under this section. If it is determined that a person is in violation of this subsection and a permit is denied for this reason, then 30 calendar days must elapse from the date of notification by certified mailing before a new application and fee may be resubmitted.

(h) All permits issued through administrative error can be terminated and seized by the chief of police or his/her designee or the city manager or his/her designee.

(i) Replacement permits will be issued within 30 days of the original date, upon paying one-half of the fee charged for employee pouring permits. A new application and fee must be submitted after 30 days from the original application date.

(j) All permits issued under this section remain the property of the city and shall be produced for inspection upon the demand of any officer or designee of the chief of police. All permits are subject to revocation upon violation of any federal, state, or local law.

(k) No licensee shall allow any employee or manager required to hold a permit to work on the premises unless the employee or manager has in his/her possession a current valid city employee pouring permit. For new employees, a receipt issued by the city may be used for a maximum of 30 days from the date of its issue. Licensees are required to inspect and verify that each employee required to do so has in his/her possession a valid current employee pouring permit.

(l) A license fee of \$50.00 shall be charged

(m) It shall be the duty of all persons holding any license to sell alcoholic beverages to file with the city clerk or his/her designee the name of the establishment, the license number and a list of employees, including home addresses and home telephone numbers, twice annually, during the month of June and again in the month of December.

The licensee shall not vary the schedule of prices from day to day or from hour to hour within a single day. The schedule of prices shall be effective for not less than one calendar week.
- (c) No licensee shall advertise or promote in any way, whether within or without the licensed premises, any of the practices prohibited under subsection (a) of this section.

CHAPTER 6 OF THE CODE OF THE CITY OF CLARKESVILLE GEORGIA IS HEREBY AMENDED AND RESTATED IN ITS ENTIRETY TO READ AS FOLLOWS:

WHEREAS, the citizens of Clarkesville, Georgia approved a referendum for the purpose of determining whether Clarkesville should be authorized to issue licenses to sell distilled spirits for beverage purposes by the drink for consumption only on the premises where sold pursuant to an election held on November 3, 2009; and

WHEREAS, the City Council of Clarkesville, Georgia desires to combat the undesirable secondary effects of businesses where distilled spirits, malt beverages, and wine may be sold for beverage purposes by the drink for consumption only on the premises where sold; and

WHEREAS, the City Council of Clarkesville, Georgia desires to avoid negative experiences of other municipalities and counties regarding problems with certain businesses where distilled spirits, malt beverages, and wine are sold for beverage purposes by the drink for consumption only on the premises where sold, which include criminal activity, undesirable community conditions, the depression of property value in the areas surrounding certain establishments, increased expenditure for law enforcement, an increased burden on the judicial system because of increased criminal behavior, and acceleration of community blight (collectively referred to hereinafter as the “pernicious secondary effects”); and

WHEREAS, The City Council of Clarkesville, Georgia has a substantial interest in preserving the quality of life for the citizens of Clarkesville; and

WHEREAS, The City Council of Clarkesville, Georgia desires to establish a comprehensive and consolidated ordinance for the licensing, control, taxation, and regulation of the retail package sale of malt beverages and wine and for the retail sale of distilled spirits, malt beverages, and wine for consumption purposes only on the premises where sold.

Such new registered agent shall meet the requirements of this section and must be approved by the city manager. The city shall charge a fee of \$100.00 for a change of the licensee's registered agent; provided, however, that if the licensee fails to notify the city and nominate a new registered agent within such five-day period, then the city shall charge a fee of \$300.00 for a change of the licensee's registered agent and/or revoke the licensee's license.

No additional license fees shall be required during the period for which the original license was issued.

If a license application is received after January 1, investigative and administrative costs will be assessed.

(b) All licenses granted under this article shall be for the calendar year except for temporary special event licenses as allowed pursuant to section 6-40.

- (b) This section shall not be construed to include employees whose duties are limited solely to those of a busboy, cook, or dishwasher.
- (c) No employee pouring permit shall be issued until such time as a signed application has been filed with the city clerk or such department's designee and upon payment of a fee established by the city and a

search of the criminal record of the applicant completed. The application shall include, but shall not be limited to, the name, date of birth, and prior arrest record of the person, though the fact of an arrest record shall be used for investigative purposes only, and shall give rise to no presumption or inference of guilt. Due to the inclusion of arrest information, these applications shall be regarded as confidential and shall not be produced for public inspection without a court order.

(d) The chief of police or his/her designee shall have a complete and exhaustive search made relative to any criminal record of the person fingerprinted or cleared. If there is no record of a violation of this chapter, the chief or his/her designee shall issue an employee pouring permit to the person stating that the person is eligible for employment. If it is found that the person is not eligible for employment, the chief of police or his/her designee shall notify such person at the address contained in the application, in writing, that such person is not eligible for employment, the cause of such denial, and right of such person to appeal.

(e) No person shall be granted an employee pouring permit unless it appears to the satisfaction of the chief of police or his/her designee that such person has not been convicted of, pled guilty to, or entered a plea of nolo contendere to any crime involving moral turpitude, illegal gambling, illegal possession or sale of controlled substances, illegal sale or possession of alcoholic beverages, including the sale or transfer of alcoholic beverages to minors in a manner contrary to law, keeping a place of prostitution, solicitation of sodomy, or the commission of any sexually related crime within a period of five years of the date of conviction and been released from parole or probation. A person's first conviction for illegal possession of alcohol as a misdemeanor or violation of a city ordinance shall not, by itself, make a person ineligible for an employee pouring permit. No person shall be granted an employee pouring permit who has been convicted of, pled guilty to or entered a plea of nolo contendere to any federal, state, or local law for any felony within five years of the date of conviction and has not been released on parole or probation prior to the filing of an application for such permit. For purposes of this subsection, a conviction or plea of guilty or nolo contendere shall be ignored as to any offense for which a person whose sentence was entered under the Georgia First Offender Act, as amended; provided, however, that any such offense shall not be ignored if the person violated any term of probation imposed by the court granting first offender treatment or committed another crime and the sentencing court therefore entered an adjudication of guilt as to the crime for which the person had previously been sentenced as a first offender.

(f) An employee pouring permit shall be issued for a period of three calendar years from the date of the original application. As noted in subsection (k) of this section, the employee pouring permit must be in the possession of the employee while the employee is working at the licensed establishment. This permit must be in the possession of the employee while the employee permit holder is working and must be available for inspection by members of the police department or the city's staff.

(g) No person shall be issued a permit if it is determined that the person falsified, concealed or covered up any material fact by any device, trick or scheme while making an application to the city clerk for an employee pouring permit under this section. If it is determined that a person is in violation of this subsection and a permit is denied for this reason, then 30 calendar days must elapse from the date of notification by certified mailing before a new application and fee may be resubmitted.

(h) All permits issued through administrative error can be terminated and seized by the chief of police or his/her designee or the city manager or his/her designee.

(i) Replacement permits will be issued within 30 days of the original date, upon paying one-half of the fee charged for employee pouring permits. A new application and fee must be submitted after 30 days from the original application date.

(j) All permits issued under this section remain the property of the city and shall be produced for inspection upon the demand of any officer or designee of the chief of police. All permits are subject to revocation upon violation of any federal, state, or local law.

(k) No licensee shall allow any employee or manager required to hold a permit to work on the premises unless the employee or manager has in his/her possession a current valid city employee pouring permit. For new employees, a receipt issued by the city may be used for a maximum of 30 days from the date of its issue. Licensees are required to inspect and verify that each employee required to do so has in his/her possession a valid current employee pouring permit.

(l) A license fee of \$40.00 shall be charged

(m) It shall be the duty of all persons holding any license to sell alcoholic beverages to file with the city clerk or his/her designee the name of the establishment, the license number and a list of employees, including home addresses and home telephone numbers, twice annually, during the month of June and again in the month of December.

The licensee shall not vary the schedule of prices from day to day or from hour to hour within a single day. The schedule of prices shall be effective for not less than one calendar week.

(c) No licensee shall advertise or promote in any way, whether within or without the licensed premises, any of the practices prohibited under subsection (a) of this section.

(d) No provision of this section shall be construed to prohibit licensees from offering free food or entertainment at any time, to prohibit licensees from including an alcoholic beverage as part of a meal

package, or to prohibit the sale or delivery of wine by the bottle or carafe when sold with meals or to more than one person.

(e) It is the intent of this section to prohibit activities typically associated with promotions referred to as happy hour or similarly designated promotions.

School building means and shall include only those structures in which instruction is offered. The term "school building" shall apply only to state, county, city or church school buildings and to such buildings at such other schools in which are taught subjects commonly taught in the common schools and colleges of this state and which are public schools or private schools as defined in O.C.G.A. § 20-2-690(b).

(d) For the purposes of this section, distance shall be measured according to the most direct route of travel on the ground as described and defined in publications and rules of the Georgia Department of Revenue.

(e) As to any location licensed in the future, if the distance requirements in this section are met at the time of issuance of any license, the subsequent opening and operation of a church or school or day care or alcohol treatment facility within the distance prohibited in this section shall not prevent the continuance of an existing license or the renewal thereof or the issuance of a new license to any subsequent owner of such property.

Sec. 6-139. Sale without license or beyond boundaries of licensed premises prohibited; penalties.

It shall be unlawful for any person to sell or possess for the purpose of sale any alcoholic beverage if the person does not have a license granted by the city to sell or possess for sale the alcoholic beverages or to sell or make deliveries beyond the boundaries of the premises covered by the license. Sec. 6-140. Open area and patio sales.

- (a) Alcoholic beverage sales can be made by a licensed consumption on-premises establishment in a patio or open area type environment if the establishment has been approved to do so by the City Council.
- (b) The requirement for approval is that the patio or open area be enclosed by some structure providing for public ingress and egress only through the main licensed premises. The purpose of this requirement is to prevent a customer from leaving the outside sales area with an open drink without the licensee's knowledge.
- (c) The height of the structure required by subsection (b) of this section shall be a minimum of 3 1/2 feet above the patio floor, but the structure does not have to be solid or restrict visibility into or out of the patio or open sales area. Such structure must be permitted and approved by the city's building inspection department and the city's fire department as required by governing regulations or codes.
- (d) The only exit from the area enclosed by the structure is to be through the licensed establishment's main premises and through an approved fire exit not for general public use unless an emergency exists. The fire exit should be of the type that sounds an alarm so that the establishment will be alerted in the event of unauthorized use when no emergency exists.
- (e) If a licensee desires a patio or open sales area inside an existing structure, plans will be reviewed and approved on an individual basis by the City Council. Interior type patio or open sales areas must also meet the requirements of the city's development and fire codes.
- (f) Nothing contained in this section shall prohibit a hotel or motel with a consumption on-premises license from making sales and allowing consumption of alcoholic beverages in ballrooms, meeting rooms, reception rooms, or patio areas of such hotel or motel, provided such functions are catered in connection with a meeting, conference, convention or similar type gathering at such hotel or motel. Patio areas, for the purposes of this subsection, do not have to conform to the standards of this section.

Sec. 6-141. No consumption outside premises.

- (a) It is prohibited for customers to leave the premises with open alcoholic beverages, and it is the licensee's responsibility to ensure that no open beverages are sold and carried out.

A partially consumed bottle of wine that is to be removed from the premises must be securely resealed by the licensee or its employees before removal from the premises. The partially consumed bottle of wine shall be placed in a bag or other container that is secured in such a manner that is visibly apparent if the container has been subsequently opened or tampered with, and a dated receipt for the bottle of wine and meal shall be provided by the licensee and attached to the container.

Sec. 6-142. Specification of premises.

No alcoholic beverage license shall be issued to any person unless the building in which the business will be located is complete and detailed plans of the building and outside premises are attached to the application or unless proposed plans and specifications and a building permit of a proposed building to be built are attached to the application. The completed building or the proposed building shall comply with ordinances of the city, county, regulations of the state revenue commissioner, and regulations of the state. The proposed building shall also be subject to final inspection and approval when completed by the building inspector. Each building in which the business will be located shall contain sufficient lighting so that the building itself and the premises on all sides of the building are readily visible at all times from the front of the street on which the building is located so as to reveal all of the outside premises of such building. Each applicant for an alcoholic beverage license shall attach to the application evidence of ownership of the building or proposed building or a copy of the lease, if the applicant is leasing the building. If the applicant is a franchisee, then such applicant shall attach a copy of the franchise agreement or contract with the application. All premises for which an alcoholic beverage license shall be issued shall afford therein adequate sanitary toilet facilities and shall be adequately illuminated so that all hallways, passageways and open areas may be clearly seen by the customers therein.

Sec. 6-144. Prohibited noise from establishments.

It shall be unlawful for any establishment licensed under this chapter to make or cause to be made any loud, unnecessary or unusual sound or noise that unreasonably annoys, disturbs, injures or endangers the comfort, repose, health, peace, or safety of others in the city and that is audible to a person of normal hearing ability from the nearest property line of the business in question. In no event, however, shall any such loud, unnecessary or unusual sound or noise be made by an establishment licensed under this chapter after the hours of 11:00 p.m.

RABIES CONTROL AND LICENSURE OF DOGS

Sec. 10-66. Rabies inoculation; evidence.

Every owner of a dog over 90 days of age kept, harbored or maintained in the city shall have such dog inoculated annually against rabies, unless such dog has been inoculated with a vaccine good against rabies for a longer period of time. This certificate shall be in a form prepared and issued by the state department of human resources, and no other certificate shall be used.

(Ord. No. 50, 8-18-1988)

Sec. 10-67. Licensing and registration required.

Every owner of a dog over 90 days of age kept, harbored or maintained in the city shall register such dog with the city and obtain a license for such dog from the city. After a dog has first been registered and licensed, its owner shall thereafter annually so register the dog and obtain such license for it as long as it is kept, harbored and maintained within the corporate limits of the city, with such annual license fee to be applied for and obtained by the owner of such dog on or before April 1 of each calendar year. Dog licenses shall be issued by the secretary of the city council upon payment of a license fee in an amount found in the schedule of fees and charges for each neutered male or spayed female and in an amount found in the schedule of fees and charges for all other dogs. No refund of any such fee shall be made for any reason. The provisions of this section shall not be intended to apply to dogs whose owners are nonresidents temporarily within the city, nor to dogs brought into the city for the purposes of participating in any dog show, nor to Seeing Eye dogs properly trained to assist blind persons when such dogs are actually being used by blind persons for the purpose of aiding them in going from place to place.

Such written application must be accompanied by the current certificate for animal rabies vaccination for such dog, and shall constitute the registration of the dog for which a license is applied.

(Ord. No. 50, 8-18-1988)

Sec. 10-69. Dog tags and rabies vaccination tags.

Upon payment of the license fee, the clerk of the city shall issue to the owner a license certificate and a metallic tag, sometimes referred to in this chapter as a "dog tag," for the dog so licensed, which tag shall have stamped thereon the year for which it was issued and a number corresponding with the number on the license certificate. Every dog over 90 days of age shall also have a current rabies vaccination tag showing that such dog has been vaccinated. Every owner shall provide each of his dogs with a collar or harness to which the city license tag and rabies vaccination tag must be affixed, and shall give each dog the necessary supervision to ensure that such collar or harness and tags are constantly worn. In case a city dog tag is lost or destroyed, a duplicate will be issued by the clerk of the city upon presentation of the receipt showing the payment of a license fee for the current year and the payment of a fee for such duplicate listed in the schedule of fees and

charges. Dog tags shall not be transferable from one dog to another.
(Ord. No. 50, 8-18-1988)

Sec. 10-70. Unlawful use of dog tags.

(a) It shall be unlawful for any person to use on his dog a city dog tag which is not current, or knowingly allow such use.

(b) It shall also be unlawful for any owner of a dog to attach to the collar or harness of his dog a city dog tag which was not issued for such dog, or permit his dog to be at large bearing a city dog tag which was not issued for it.

(c) It shall also be unlawful for an owner to permit another person to use a city dog tag which was issued for the owner's dog rather than for the dog on which such other person uses it.
(Ord. No. 50, 8-18-1988)

Sec. 10-71. Keeping of unregistered or unvaccinated dogs.

It shall be unlawful for any person to possess, harbor, maintain or keep any dog which has not been registered or vaccinated against rabies as required by this article at any place within the corporate limits of the city.
(Ord. No. 50, 8-18-1988)

Sec. 10-72. Untagged dogs.

Whenever any animal control officer of the city sees or learns of a dog which has not been registered with the city, or which is not wearing a collar or harness to which a current city license tag and a current rabies vaccination tag are affixed, such officer shall demand of the owner of such dog, or any other person who may be harboring or keeping such dog, that the owner or such other person, as the case may be, deliver such dog safely to the animal control officer, and it shall be unlawful for the owner or such other person to fail or refuse to so deliver the dog to such officer for impoundment.

ARTICLE III.

IMPOUNDMENT

Sec. 10-106. At large animals to be captured.

All animals which are found to be running at large within the city in violation of any provision of this chapter shall be taken into custody and impounded by the animal control officers, and by police officers and other employees of the city when directed to do so by the city manager.
(Ord. No. 50, 8-18-1988)

Sec. 10-107. Recordkeeping.

The senior animal control officer shall keep a record of each animal impounded. These records shall include the date of the receipt of the animal and the date and manner of its disposition. If the animal is redeemed or adopted, the name and address of the person who redeemed or adopted the animal along with the amount of fees and charges collected shall be recorded. If the animal is a dog, the numbers of its city license tag and rabies vaccination tag, if any, shall also be recorded.

(Ord. No. 50, 8-18-1988)

Sec. 10-108. Notice to owner.

When any animal is impounded, the senior animal control officer shall immediately notify the owner of such animal, if known, or if such owner can be reasonably ascertained, that such animal has been impounded, and that unless the animal is claimed within a period of three days after such notification, it will be disposed of as provided by this article.

(Ord. No. 50, 8-18-1988)

Sec. 10-109. Redemption; adoption; destruction; confinement; capture.

(a) *Dogs.* The owner of a dog impounded under the provisions of this article may, within three days after notification, reclaim such dog upon payment of the city license fee for such dog, if unpaid; the cost of a rabies vaccination, if such is needed; and such fees and charges as may be charged for the impoundment and maintenance of the dog.

(b) *Other animals.* The owner of any other animal impounded under the provisions of this article may redeem such animal within three days after notification, upon payment of such fees and charges as may be charged for the impoundment and maintenance of the animal.

(c) *Adoption or destruction.* If an impounded dog is not claimed and redeemed by its owner within the time provided in subsection (a) of this section, the city may offer such dog for adoption by any person upon payment of the fees and charges as provided in this section, including the license fee and cost of rabies vaccination, if applicable. If any impounded dog or other impounded animal is not claimed by the owner within the time provided in this section, the city shall also be authorized to destroy such dog or other animal in a humane manner.

(d) *Destruction due to infectious or dangerous disease.* Any dog or other animal impounded as provided in this section and which appears to be suffering from rabies or affected by hydrophobia, mange or any other infectious or dangerous disease shall not be released but shall be forthwith destroyed.

(e) *Confinement upon suspicion of rabies.* Any animal which has bitten a human being or shows symptoms of rabies, or any animal which has been bitten by an animal suspected of having rabies, shall be immediately confined by its owner and the senior animal control officer shall be notified immediately. The animal shall be confined for not less than ten days in a place approved by such officer, which confinement shall be at the expense of the owner at a licensed veterinarian hospital or the city animal shelter, or at the owner's premises if it can be kept so as not to come in contact with other animals and so the animal cannot escape from confinement. The senior animal control officer shall make the final decision as to the place of confinement of

the animal.

(f) *Right of animal control officer to capture animals.* If it is reported to an animal control officer that an animal has symptoms of rabies or hydrophobia or has bitten a person and the owner of the animal is unknown or cannot immediately be found, the animal control officer shall impound the animal as quickly as possible and notify the owner of his action as soon thereafter as possible. The animal control officer, a police officer or any other city employee authorized by the city manager, may enter upon private property, if necessary, in order to catch the animal for such impoundment.

ARTICLE IV.

VICIOUS OR DANGEROUS ANIMALS

Sec. 10-141. Determination of status.

If, from evidence available to him, the senior animal control officer determines that an animal is vicious or dangerous, he shall immediately notify the owner in writing, if the owner is known, or can be determined by reasonable effort, stating the reasons for such determination, whereupon the owner shall immediately deliver the animal to the senior animal control officer for impoundment unless the owner immediately confines such animal and agrees to thereafter keep such animal confined as provided by this article. Any person who owns an animal which has been declared vicious or dangerous by the senior animal control officer shall have the right to appeal such decision to the municipal court judge by filing a written appeal within a period of three days after receiving notification of such decision. In the event of such an appeal, the animal shall remain confined at the animal shelter at the expense of the owner, or confined at all times by the owner in the manner provided by this article until such appeal is terminated. If the animal is judged not to be vicious or dangerous by the municipal court judge, it shall be immediately returned to the owner. If the animal is judged to be vicious or dangerous by the municipal court judge, it shall thereafter be confined by the owner as provided by this article. If it is at that time impounded at the animal shelter, it shall remain so impounded and destroyed after three days have elapsed from and after the date of such judgment of the municipal court judge unless redeemed by the owner as provided in section 10-109.
(Ord. No. 50, 8-18-1988)

Sec. 10-142. Confinement.

(a) It shall be unlawful for any person to harbor, maintain or keep a vicious or dangerous animal on his premises unless the animal is fully enclosed by a steel chainlink fence of such strength, height and construction that the animal cannot escape therefrom, or unless the animal is confined in a cage of such strength and construction that it cannot escape therefrom when fencing in such animal will not fully protect the public from the danger of injury by such animal.

(b) It shall also be unlawful for any person to cause or permit any vicious animal or dangerous animal, except a dog, to be outside the place of confinement of such animal, whether on or off the owner's premises, at any time.

(c) It shall also be unlawful for any person to cause, permit, accompany or be responsible for the presence of any dog which is a vicious animal or dangerous animal at any place outside his home or the place of confinement of such dog, whether on or off the owner's premises, at any time, unless such dog shall be under the restraint of a leash and securely muzzled to prevent it from biting any other animal or any human being.

Fill means a portion of land surface to which soil or other solid material has been added; the depth above the original ground.

Finished grade means the final elevation and contour of the ground after cutting or filling and conforming to the proposed design.

Grading means altering the shape of ground surfaces to a predetermined condition. This includes stripping, cutting, filling, stockpiling and shaping or any combination thereof, and shall include the land in its cut or filled condition.

Ground elevation means the original elevation of the ground surface prior to cutting or filling.

Issuing authority means the governing authority of any county or municipality which has been certified by the director of the environmental protection division of the department of natural resources as an issuing authority, pursuant to the Erosion and Sedimentation Act of 1975, O.C.G.A. § 12-7-1 et seq., or the division in those instances where an application for a permit is submitted to the division.

Land disturbing activity means any activity which may result in soil erosion from water or wind and the movement of sediments into state waters or onto lands within the state including, but not limited to, clearing, dredging, grading, excavating, transporting and filling of land, but not including agricultural practices as described in section 26-32(5).

Metropolitan River Protection Act (MRPA) means a state law referenced as O.C.G.A. § 12-5-440 et seq., which addresses environmental and developmental matters in certain metropolitan river corridors and their drainage basins.

Roadway drainage structure means a device such as a bridge, culvert or ditch, composed of a virtually nonerodible material such as concrete, steel, plastic or other such material that conveys water under a roadway by intercepting the flow on one side of a traveled way consisting of one or more defined lanes, with or without shoulder areas, and carrying water to a release point on the other side.

Sediment means solid material, both organic and inorganic, that is in suspension, is being transported or has been moved from its site of origin by air, water, ice or gravity as a product of erosion.

Structural erosion and sedimentation control measures means measures for the stabilization of erodible or sediment-producing areas by utilizing the mechanical properties of matter for the purpose of either changing the surface of the land or storing, regulating or disposing of runoff to prevent excessive sediment loss. Examples of structural erosion and sediment control practices are riprap, sediment basins, dikes, level spreaders, waterways or outlets, diversions, grade stabilization structures, sediment traps and land grading, etc. Such measures can be found in the publication Manual for Erosion and Sediment Control in Georgia.

Trout streams means all streams or portions of streams within the watershed as designated by the game and fish division of the state department of natural resources under the provisions of the Georgia Water Quality Control Act, O.C.G.A. § 12-5-20 et seq. Streams designated as primary trout waters are defined as water supporting a self-sustaining population of rainbow, brown or brook trout. Streams designated as secondary trout waters are those in which there is no evidence of natural trout reproduction, but are capable of supporting trout throughout the year. First order trout waters are streams into which no other streams flow except springs.

Vegetative erosion and sedimentation control practices means practices for the stabilization of erodible or sediment-producing areas by covering the soil with:

- (1) Permanent seeding, sprigging or planting, producing longterm vegetative cover;

Sec. 26-32. Exemptions to article provisions.

This article shall apply to any land disturbing activity undertaken by any person on any land except for the following:

- (1) Surface mining, as surface mining is defined in O.C.G.A. § 12-4-72.
- (2) Granite quarrying and land clearing for such quarrying.
- (3) Such minor land disturbing activities as home gardens and individual home landscaping, repairs, maintenance work and other related activities which result in minor soil erosion.
- (4) The construction of single-family residences, when such are constructed by or under the contract with the owner for his own occupancy, or the construction of single-family residences not a part of a platted subdivision, a planned community or an association of other residential lots consisting of more than two lots, and not otherwise exempted under this subsection; provided, however, that construction of any such residence shall conform to the minimum requirements as set forth in division 3 of this article. For single-family residence construction covered by the provisions of this subsection, there shall be a buffer zone between the residence and any state waters classified as trout streams pursuant to the Georgia Water Quality Control Act as set forth in O.C.G.A. § 12-5-20 et seq. In any such buffer zone, no land disturbing activity shall be constructed between the residence and the point where vegetation has been wrested by normal stream flow or wave action from the banks of the trout waters. For primary trout waters, the buffer zone shall be at least 50 horizontal feet, and no variance to a smaller buffer shall be granted. For secondary trout waters, the buffer zone shall be at least 50 horizontal feet, but the director may grant variances to no less than 25 feet. Regardless of whether a trout stream is primary or secondary, for first order trout waters, which are streams into which no other streams

flow except for springs, the buffer shall be at least 25 horizontal feet, and no variance to a smaller buffer shall be granted. The minimum requirements of division 3 of this article and the buffer zones provided by this section shall be enforced by the issuing authority.

- (5) Agricultural operations as defined in O.C.G.A. § 1-3-3 to include raising, harvesting or storing of products of the field or orchard; feeding, breeding or managing livestock or poultry; producing or storing feed for use in the production of livestock including, but not limited to, cattle, calves, swine, hogs, goats, sheep and rabbits, or for use in the production of poultry including, but not limited to, chicken, hens and turkeys; producing plants, trees, fowl or animals; the production of aqua culture, horticultural, dairy, livestock, poultry, eggs and apiarian products; forestry land management practices, including harvesting and farm buildings and farm ponds.
- (6) Any project carried out under the technical supervision of the Natural Resources Conservation Service of the United States Department of Agriculture.
- (7) Any project involving 1 1/10 acres or less; provided, however, that this exemption shall not apply to any land disturbing activity within 200 feet of the bank of any state waters, and for purposes of this subsection, the term "state waters" excludes channels and drainageways which have water in them only during and immediately after rainfall events and intermittent streams which do not have water in them yearround; provided, however, that any person responsible for a project which involves 1 1/10 acres or less, which involves land disturbing activity, and which is within 200 feet of any such excluded channel or drainageway, must prevent sediment from moving beyond the boundaries of the property on which such project is located, and provided further that nothing contained in this section shall prevent the issuing authority from regulating any such project which is not specifically exempted by subsections (1), (2), (3), (4), (5), (6), (8), or (9) of this section.
- (8) Construction or maintenance projects, or both, undertaken or financed, in whole or in part, or both, by the department of transportation, the state highway authority, or the state tollway authority; or any road construction or maintenance project, or both, undertaken by any county or municipality; provided, however, that such projects shall conform to the minimum requirements set forth in division 3 of this article.

DIVISION 2.

ADMINISTRATION AND ENFORCEMENT

Sec. 26-56. Inspection and enforcement.

(a) The city building inspector will periodically inspect the sites of land disturbing activities for which permits have been issued to determine if the activities are being conducted in accordance with the plan and if the measures required in the plan are effective in controlling erosion and sedimentation. If, through inspection, it is deemed that a person engaged in land disturbing activities has failed to comply with the approved plan, with permit conditions or with the provisions of this article, a written notice to comply shall be served upon that person. The notice shall set forth the measures necessary to achieve compliance and shall state the time within which such measures must be completed. If the person engaged in the land disturbing activities fails to comply within the time specified, he shall be deemed in violation of this article.

(b) The city building inspector shall have the power to conduct such investigations as it may reasonably deem necessary to carry out duties as prescribed in this article, and for this purpose to enter at reasonable times upon any property, public or private, for the purpose of investigation and inspecting the sites of land disturbing activities.

(c) No person shall refuse entry or access to any authorized representative or agent of the issuing authority, the commission, district or division who requests entry for the purposes of inspection, and who presents appropriate credentials, nor shall any person obstruct, hamper or interfere with any such representative while in the process of carrying out his official duties.

(d) The districts or the commission, or both, shall periodically review the actions of counties and municipalities which have been certified as issuing authorities pursuant to O.C.G.A. § 12-7-8(a). The districts or the commission, or both, may provide technical assistance to any county or municipality for the purpose of improving the effectiveness of the county's or municipality's erosion and sedimentation control program. The districts or the commission shall notify the division and request investigation by the division if any deficient or ineffective local program is found.

(e) The division may periodically review the actions of counties and municipalities which have been certified as issuing authorities pursuant to O.C.G.A. § 12-7-8(a). Such review may include, but shall not be limited to, review of the administration and enforcement of a governing authority's ordinances and review of conformance with an agreement, if any, between the district and governing authority. If such review indicates that the governing authority of any county or municipality certified pursuant to O.C.G.A. § 12-7-8(a) has not administered or enforced its ordinances or has not conducted the program in accordance with any agreement entered into pursuant to O.C.G.A. § 12-7-7(d), the division shall notify the governing authority of the county or municipality in writing. The governing authority of any county or municipality so notified shall have 30 days within which to take the necessary corrective action to retain certification as an issuing authority. If the county or municipality does not take necessary corrective action within 30 days after notification by the division, the division may revoke the certification of the county or municipality as an issuing authority.

(Ord. No. 51, § VI, 10-2-1995)

Sec. 26-57. Penalties and incentives.

(a) *Failure to obtain a permit for land disturbing activity.* If any person commences any land disturbing activity requiring a land disturbing permit as prescribed in this article without first obtaining such permit, the person shall be subject to revocation of his business license, work permit or other authorization for the conduct of a business and associated work activities within the jurisdictional boundaries of the issuing authority.

(b) *Stop work orders.* Upon notice from the issuing authority or its agent, work on any project that is being done contrary to the provisions of this article or in a dangerous or unsafe manner, shall be immediately stopped. Such notice shall be in writing and shall be given to the owner of the property, his authorized agent or the person in charge of the activity on the property, and shall state the conditions under which work may be resumed. Where an emergency exists, no written notice shall be required.

(c) *Bond forfeiture.* If, through inspection, it is determined that a person engaged in land disturbing activities has failed to comply with the approved plan, a written notice to comply shall be served upon that person. The notice shall set forth the measures necessary to achieve compliance with the plan and shall state the time within which such measures must be completed. If the person engaged in the land disturbing activity fails to comply within the time specified, he shall be deemed in violation of this article and, in addition to other penalties, shall be deemed to have forfeited his performance bond, if required to post one under the provisions of section 26-107(e). The issuing authority may call the bond or any part thereof to be forfeited and may use the proceeds to hire a contractor to stabilize the site of the land disturbing activity and bring it into compliance.

(d) *Monetary penalties.* Any person violating any provisions of this article, permitting conditions, or stop work order shall be liable for a monetary penalty not to exceed \$2,500.00 per day, by a sentence of imprisonment not exceeding 60 days in jail, or both fine and jail or work alternative. Each day during which the violation or failure or refusal to comply continues shall constitute a separate violation.
(Ord. No. 51, § VII, 10-2-1995)

Sec. 26-58. Administrative appeal; judicial review.

(a) *Administrative remedies.* The suspension, revocation, modification or grant with condition of a permit by the issuing authority upon finding that the holder is not in compliance with the approved erosion and sediment control plan; or that the holder is in violation of permit conditions; or that the holder is in violation of any ordinance shall entitle the person submitting the plan or holding the permit to a hearing before the mayor and city council within 45 days after receipt by the issuing authority of written notice of appeal.

(b) *Judicial review.* Any person aggrieved by a decision or order of the issuing authority, after exhausting his administrative remedies, shall have the right to appeal de novo to the county superior court.

Secs. 26-59--26-80. Reserved.

DIVISION 3.

MINIMUM REQUIREMENTS

Sec. 26-81. General provisions.

Excessive soil erosion and resulting sedimentation can take place during land disturbing activities. Therefore, plans for those land disturbing activities which are not excluded by this article shall contain provisions for application of soil erosion and sedimentation control measures and practices. The provisions shall be incorporated into the erosion and sedimentation control plans. Soil erosion and sedimentation control measures and practices shall conform to the minimum requirements of sections 26-82 and 26-83. The application of measures and practices shall apply to all features of the site, including street and utility installations, drainage facilities and other temporary and permanent improvements. Measures shall be installed to prevent or control erosion and sedimentation pollution during all stages of any land disturbing activity. (Ord. No. 51, § IV(A), 10-2-1995)

Sec. 26-82. Best management practices--Generally.

(a) Best management practices as set forth in this section and section 26-83 shall be required for all land disturbing activities. Proper design, installation and maintenance of best management practices shall constitute a complete defense to any action by the director or to any other allegation of noncompliance with subsection (b) of this section or any substantially similar terms contained in a permit for the discharge of stormwater issued pursuant to O.C.G.A. § 12-5-30(f). As used in this section, the terms "proper design" and "properly designed" mean designed to control soil erosion and sedimentation for all rainfall events up to and including a 25-year, 24-hour rainfall event.

(b) A discharge of stormwater runoff from disturbed areas where best management practices have not been properly designed, installed and maintained shall constitute a separate violation of any land disturbing permit issued by a local issuing authority or by the division or of any general permit for construction activities issued by the division pursuant to O.C.G.A. § 12-5-30(f) for each day on which such discharge results in the turbidity of receiving waters being increased by more than 25 nephelometric turbidity units for waters supporting warm water fisheries or by more than ten nephelometric turbidity units for waters classified as trout waters. The turbidity of the receiving waters shall be measured in accordance with guidelines to be issued by the director.

(c) Failure to properly design, install or maintain best management practices shall constitute a violation of any land disturbing permit issued by a local issuing authority or by the division or of any general permit for construction activities issued by the division pursuant to O.C.G.A. § 12-5-30(f) for each day on which such failure occurs.

(d) The director may require, in accordance with regulations adopted by the board, reasonable and prudent monitoring of the turbidity level of receiving waters into which discharges from land disturbing activities occur. (Ord. No. 51, § IV(B), 10-2-1995)

Sec. 26-83. Same--Enumeration.

The rules and regulations, ordinances or resolutions adopted pursuant to this article for the purpose of governing land disturbing activities shall require, as a minimum, best management practices, including sound conservation and engineering practices to prevent and minimize erosion and resultant sedimentation, which are consistent with, and no less stringent than, those practices contained in the Manual for Erosion and Sediment

Control in Georgia, published by the Georgia Soil and Water Conservation Commission as of January 1 of the year in which the land disturbing activity was permitted, as well as the following:

- (1) Stripping of vegetation, regrading and other development activities shall be conducted in a manner so as to minimize erosion.
- (2) Cut-fill operations must be kept to a minimum.
- (3) Development plans must conform to topography and soil type so as to create the lowest practical erosion potential.
- (4) Whenever feasible, natural vegetation shall be retained, protected and supplemented.
- (5) The disturbed area and the duration of exposure to erosive elements shall be kept to a practicable minimum.
- (6) Disturbed soil shall be stabilized as quickly as practicable.
- (7) Temporary vegetation or mulching shall be employed to protect exposed critical areas during development.
- (8) Permanent vegetation and structural erosion control measures shall be installed as soon as practicable.
- (9) To the extent necessary, sediment in runoff water must be trapped by the use of debris basins, sediment basins, silt traps or similar measures until the disturbed area is stabilized. As used in this section, a disturbed area is stabilized when it is brought to a condition of continuous compliance with the requirements of this article.
- (10) Adequate provisions must be provided to minimize damage from surface water to the cut face of excavations or the sloping surface of fills.
- (11) Cuts and fills may not endanger adjoining property.
- (12) Fills may not encroach upon natural watercourses or constructed channels in a manner so as to adversely affect other property owners.
- (13) Grading equipment must cross flowing streams by means of bridges or culverts except when such methods are not feasible; provided, in any case, that such crossings are kept to a minimum.
- (14) Land disturbing activity plans for erosion and sedimentation control shall include provisions for treatment or control of any source of sediments and adequate sedimentation control facilities to retain sediments on the site or preclude sedimentation of adjacent waters beyond the levels specified in section 26-82(b).
- (15) Land disturbing activities shall not be conducted within 25 feet of the banks of any state waters,

as measured from the point where vegetation has been wrested by normal stream flow or wave action, except where the director determines to allow a variance that is at least as protective of natural resources and the environment, where otherwise allowed by the director pursuant to O.C.G.A. § 12-2-8, or where a drainage structure or a roadway drainage structure must be constructed, provided that adequate erosion control measures are incorporated in the project plans and specifications and are implemented; provided, however, that buffers of at least 25 feet established pursuant to O.C.G.A. § 12-5-440 et seq., the Metropolitan River Protection Act, shall remain in force unless a variance is granted by the director as provided in this section.

- (16) Land disturbing activities shall not be conducted within 100 horizontal feet, as measured from the point where vegetation has been wrested by normal stream flow or wave action, of the banks of any state waters classified as trout streams pursuant to the Georgia Water Quality Control Act as set forth in O.C.G.A. § 12-5-20 et seq., unless a variance for such activity is granted by the director except where a roadway drainage structure must be constructed, provided that adequate erosion control measures are incorporated in the project plans and specifications and are implemented.

(Ord. No. 51, § IV(C), 10-2-1995)

Sec. 26-84. Adoption of rules exceeding division requirements.

Nothing contained in this article shall prevent an issuing authority from adopting rules and regulations, ordinances or resolutions which contain requirements that exceed the minimum requirements in sections 26-82 and 26-83.

(Ord. No. 51, § IV(D), 10-2-1995)

Sec. 26-85. Injury of property not to constitute proof of article or permit violation.

The fact that land disturbing activity for which a permit has been issued results in injury to the property of another shall neither constitute proof of nor create a presumption of a violation of the standards provided for in this article or the terms of the permit.

(Ord. No. 51, § IV(E), 10-2-1995)

Secs. 26-86--26-105. Reserved.

DIVISION 4.

PERMIT AND PLAN REQUIREMENTS

Sec. 26-106. Review of plans and land development ordinances.

The property owner, developer and designated planners and engineers shall review the general development plans and detailed plans of the issuing authority that affect the tract to be developed and the area surrounding it. They shall review the zoning ordinance, stormwater management ordinance, subdivision ordinance, flood damage prevention ordinance, this article, and the other ordinances which regulate the development of land within the jurisdictional boundaries of the issuing authority. However, the property owner is the only party that can obtain a permit.

(Ord. No. 51, § V(A), 10-2-1995)

Sec. 26-107. Application for permit.

(a) *Required.* No person shall conduct any land disturbing activity within the jurisdictional boundaries of the city without first obtaining a permit from the office of the city manager to perform such activity.

(b) *Submissions.* The application for a permit shall be submitted to the city manager and must include the applicant's erosion and sedimentation control plan with supporting data, as necessary. Such plans shall include, as a minimum, the data specified in section 26-108. Soil erosion and sedimentation control plans shall conform to the provisions of sections 26-82 and 26-83. Applications for a permit will not be accepted unless accompanied by two copies of the applicant's soil erosion and sedimentation control plans.

(c) *Fee.* A fee, in the amount found in the schedule of fees and charges per acre for the first ten acres and an amount found in the schedule of fees and charges for each additional acre or fraction thereof, shall be charged for the project area.

(d) *Review.* Immediately upon receipt of an application and plan for a permit, the issuing authority shall refer the application and plan to the district for its review and approval or disapproval concerning the adequacy of the erosion and sedimentation control plan. The results of the district review shall be forwarded to the issuing authority. No permit will be issued unless the plan has been approved by the district, and any variances required by section 26-83(15) and (16) and bonding, if required as per section 26-107(e) have been obtained. Such review will not be required if the issuing authority and the district have entered into an agreement which allows the issuing authority to conduct such review and approval of the plan without referring the application and plan to the district.

(e) *Denial; bond.* If a permit applicant has had two or more violations of previous permits, this section, or the Erosion and Sedimentation Act of 1975 as set forth in O.C.G.A. § 12-7-1 et seq., within three years prior to the date of filing of the application under consideration, the issuing authority may deny the permit application. The issuing authority may require the permit applicant to post a bond in the form of government security, cash, irrevocable letter of credit or any combination thereof up to, but not exceeding, \$3,000.00 per acre or fraction thereof of the proposed land disturbing activity, prior to issuing the permit. If the applicant does not comply with this article or with the conditions of the permit after issuance, the issuing authority may call the bond or any part thereof to be forfeited and may use the proceeds to hire a contractor to stabilize the site of the land disturbing activity and bring it into compliance. This subsection shall not apply unless there is in effect an ordinance or statute specifically providing for hearing and judicial review of any determination or order of the issuing authority with respect to alleged permit violations.

(Ord. No. 51, § V(B), 10-2-1995)

Sec. 26-108. Plan requirements.

The certified plans shall contain:

- (1) Graphic scale and north point or an arrow indicating magnetic north.
- (2) Vicinity maps showing location of project and existing streets.

Cross References: Definitions generally, § 1-2.

Sec. 26-143. Special provisions.

Notwithstanding the definitions provided in section 26-142, the sections of streams described below, even though they are shown as intermittent streams on the USGS quadrangle map, will be considered perennial streams for the purpose of this article since they have been found to have water flowing throughout the year and therefore could have greater impact on the water supply watershed than a true intermittent stream.

- (1) The unnamed stream that originates in the vicinity of Yonah Circle and enters the Soque River just to the south of and downstream of the terminus of West Waters Street. The section of the stream to which this article applies is all of that downstream from where the stream passes under Memorial Drive.
- (2) The unnamed stream that originates in the vicinity of the intersection of Minis Drive and Stanford Mill Road and enters the Soque River just to the north of and upstream from the Highway 115 (J. R. Reeves) Bridge. The section of stream to which this article applies is all of that downstream from where the stream passes under West Waters Street.
- (3) The stream known locally as "Rocky Branch" that originates about 100 meters north of the intersection of Railroad Avenue and South Washington Street (Highway 197 South) and enters the Soque River near the terminus of Mary Street. The section of stream to which this article applies is all of that downstream from where the stream passes under East Louise Street (Highway 17 South). This also includes the small tributary to Rocky Branch that originates near the Habersham County Recreation Park and enters Rocky Branch just to the south of where Rocky Branch passes under Grant Street (Old Historic Highway 441 North). The section of stream to which this article applies is all that portion downstream from where the stream enters the city limits.

(Ord. No. 72, § III, 5-3-1999)

Sec. 26-144. Minimum criteria.

Following are the city water supply watershed protection plan minimum criteria:

- (1) Stream corridors of all perennial streams within the city are protected by the following criteria:
 - a. A buffer will be maintained for a distance of 50 feet on both sides of the stream as measured from the stream banks.
 - b. No impervious surface shall be constructed within a 75-foot setback area on both sides of the stream as measured from the stream banks.

A sprinkler system designed, installed and maintained in accordance with this ordinance and the associated codes is anticipated to prevent flashover (total involvement) in the room of fire origin, when sprinkled, and to improve the opportunity for occupants to escape or be evacuated. Nothing in the ordinance is intended to restrict new technologies or alternate arrangements, provided that such technologies and/or methods do not diminish the level of safety prescribed within this ordinance.

In considering the criteria prescribed within this ordinance in conjunction with national and state codes and standards, the City of Clarkesville, surveyed over 150 municipalities and counties throughout the state of Georgia to determine the levels of reasonable protection afforded in other communities, evaluated the existing and projected building conditions within this City and established these requirements with life safety as its paramount concern, and the desire to protect property and minimize implementation costs to the citizens and businesses of Clarkesville.

FLOOD DAMAGE PREVENTION ORDINANCE

ARTICLE 1.

STATUTORY AUTHORIZATION, FINDINGS OF FACT, PURPOSE AND OBJECTIVES

SECTION A. AUTHORIZATION

Article IX, Section II of the Constitution of the State of Georgia and Section 36-1-20(a) of the Official Code of Georgia Annotated have delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, the City of Clarkesville, of Clarkesville, GEORGIA, does ordain as follows:

SECTION B. FINDINGS OF FACT

(1) The flood hazard areas of Clarkesville, Georgia are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood relief and protection, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.

(2) These flood losses are caused by the occupancy in flood hazard areas of uses vulnerable to floods, which are inadequately elevated, flood-proofed, or otherwise unprotected from flood damages, and by the cumulative effect of obstructions in floodplains causing increases in flood heights and velocities.

SECTION C. STATEMENT OF PURPOSE

It is the purpose of this ordinance to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

(1) require that uses vulnerable to floods, including facilities, which serve such uses, be protected against flood damage at the time of initial construction;

- (2) restrict or prohibit uses which are dangerous to health, safety and property due to water or erosion hazards, or which increase flood heights, velocities, or erosion;
- (3) control filling, grading, dredging and other development which may increase flood damage or erosion, and;
- (4) prevent or regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands;
- (5) control the alteration of natural floodplains, stream channels, and natural protective barriers, which are involved in the accommodation of floodwaters.

SECTION D. OBJECTIVES

The objectives of this ordinance are:

- (1) to protect human life and health;
- (2) to minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains;
- (3) to help maintain a stable tax base by providing for the sound use and development of flood prone areas in such a manner as to minimize flood blight areas,
- (4) to minimize expenditure of public money for costly flood control projects;
- (5) to minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
- (6) to minimize prolonged business interruptions, and;
- (7) to insure that potential homebuyers are notified that property is in a flood area.

ARTICLE 2. GENERAL PROVISIONS

SECTION A. LANDS TO WHICH THIS ORDINANCE APPLIES

This ordinance shall apply to all Areas of Special Flood Hazard within the jurisdiction of the City of Clarkesville, Georgia.

SECTION B. BASIS FOR AREA OF SPECIAL FLOOD HAZARD

The Areas of Special Flood Hazard identified by the Federal Emergency Management Agency in its Flood Insurance Study (FIS), dated February 17, 1988 with accompanying maps and other supporting data and any revision thereto, are adopted by reference and declared a part of this ordinance.

For those land areas acquired by a municipality through annexation, the current effective FIS dated April 2, 1991, with accompanying maps and other supporting data and any revision thereto, for Habersham County are hereby adopted by reference.

Areas of Special Flood Hazard may also include those areas known to have flooded historically or defined through standard engineering analysis by governmental agencies or private parties but not yet incorporated in a FIS.

The Repository for public inspection of the Flood Insurance Study (FIS), accompanying maps and other supporting data is located: City of Clarkesville, City Hall,

SECTION C. ESTABLISHMENT OF DEVELOPMENT PERMIT

A Development Permit shall be required in conformance with the provisions of this ordinance PRIOR to the commencement of any Development activities.

SECTION D. COMPLIANCE

No structure or land shall hereafter be located, extended, converted or altered without full compliance with the terms of this ordinance and other applicable regulations.

SECTION E. ABROGATION AND GREATER RESTRICTIONS

This ordinance is not intended to repeal, abrogate, or impair any existing ordinance, easements, covenants, or deed restrictions. However, where this ordinance and another conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

SECTION F. INTERPRETATION

In the interpretation and application of this ordinance all provisions shall be: (1) considered as minimum requirements; (2) liberally construed in favor of the governing body, and; (3) deemed neither to limit nor repeal any other powers granted under state statutes.

SECTION G. WARNING AND DISCLAIMER OF LIABILITY

The degree of flood protection required by this ordinance is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur; flood heights may be increased by man-made or natural causes. This ordinance does not imply that land outside the Areas of Special Flood Hazard or uses permitted within such areas will be free from flooding or flood damages. This ordinance shall not create liability on the part of City of Clarkesville or by any officer or employee thereof for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made hereunder.

SECTION H. PENALTIES FOR VIOLATION

Failure to comply with the provisions of this ordinance or with any of its requirements, including conditions and safeguards established in connection with grants of variance or special exceptions shall constitute a violation. Any person who violates this ordinance or fails to comply with any of its requirements shall, upon conviction thereof, be fined not more than \$100 or imprisoned for not more than 30 days, or both, and in addition, shall pay all costs and expenses involved in the case. Each day such violation continues shall be considered a separate offense. Nothing herein contained shall prevent the City of Clarkesville from taking such other lawful actions as is necessary to prevent or remedy any violation.

ARTICLE 3. **ADMINISTRATION**

SECTION A. DESIGNATION OF ORDINANCE ADMINISTRATOR

The Building Official or his/her designee is hereby appointed to administer and implement the provisions of this ordinance.

SECTION B. PERMIT PROCEDURES

Application for a Development Permit shall be made to the Building Official or his/her designee on forms furnished by the community PRIOR to any development activities, and may include, but not be limited to the following: plans in duplicate drawn to scale showing the elevations of the area in question and the nature, location, dimensions, of existing or proposed structures, earthen fill placement, storage of materials or equipment, and drainage facilities.

Specifically, the following information is required:

(1) Application Stage -

- (a) Elevation in relation to mean sea level (or highest adjacent grade) of the lowest floor, including basement, of all proposed structures;
- (b) Elevation in relation to mean sea level to which any non-residential structure will be flood-proofed;
- (c) Design certification from a registered professional engineer or architect that any proposed non-residential flood-proofed structure will meet the flood-proofing criteria of Article 4, Section B (2);
- (d) Description of the extent to which any watercourse will be altered or relocated as a result of a proposed development, and;

(2) Construction Stage -

For all new construction and substantial improvements, the permit holder shall provide to the Administrator an as-built certification of the regulatory floor elevation or flood-proofing level immediately after the lowest floor or flood proofing is completed. Any lowest floor certification made relative to mean sea level shall be prepared by or under the direct supervision of a registered land surveyor or professional engineer and certified by same. When flood proofing is utilized for non-residential structures, said certification shall be prepared by or under the direct supervision of a professional engineer or architect and certified by same.

Any work undertaken prior to submission of these certifications shall be at the permit holder's risk.

The Building Official or his/her designee shall review the above referenced certification data submitted. Deficiencies detected by such review shall be corrected by the permit holder immediately and prior to further progressive work being allowed to proceed. Failure to submit certification or failure to make said corrections required hereby, shall be cause to issue a stop-work order for the project.

SECTION C. DUTIES AND RESPONSIBILITIES OF THE ADMINISTRATOR

Duties of the Building Official or his/her designee shall include, but shall not be limited to:

- (1) Review proposed development to assure that the permit requirements of this ordinance have been satisfied.
- (2) Review proposed development to assure that all necessary permits have been received from governmental agencies from which approval is required by Federal or State law, including section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334. Require that copies of such permits be provided and maintained on file.
- (3) Review all permit applications to determine whether proposed building sites will be reasonably safe from flooding.
- (4) When Base Flood Elevation data or floodway data have not been provided in accordance with Article 2 Section B, then the Building Official or his/her designee shall obtain, review and reasonably utilize any base flood elevation and floodway data available from a Federal, State or other sources in order to administer the provisions of Article 4.
- (5) Review and record the actual elevation in relation to mean sea level (or highest adjacent grade) of the lowest floor, including basement, of all new or substantially improved structures in accordance with Article 3, Section B (2).
- (6) Verify and record the actual elevation, in relation to mean sea level to which any new or substantially improved structures have been flood-proofed, in accordance with Article 3, Section B (2).

- (7) When flood-proofing is utilized for a structure, the Building Official or his/her designee shall obtain certification of design criteria from a registered professional engineer or architect in accordance with Article 3(B)(1)(c) and Article 4(B)(2) or (D)(2).
- (8) Make substantial damage determinations following a flood event or any other event that causes damage to structures in flood hazard areas.
- (9) Notify adjacent communities and the Georgia Department of Natural Resources prior to any alteration or relocation of a watercourse and submit evidence of such notification to the Federal Emergency Management Agency (FEMA).
- (10) For any altered or relocated watercourse, submit engineering data/analysis within six (6) months to the FEMA to ensure accuracy of community flood maps through the Letter of Map Revision process. Assure flood carrying capacity of any altered or relocated watercourse is maintained.

ARTICLE 4.

PROVISIONS FOR FLOOD HAZARD REDUCTION

SECTION A. GENERAL STANDARDS

In ALL Areas of Special Flood Hazard the following provisions are required:

- (1) New construction and substantial improvements of existing structures shall be anchored to prevent flotation, collapse or lateral movement of the structure;
- (2) New construction and substantial improvements of existing structures shall be constructed with materials and utility equipment resistant to flood damage;
- (3) New construction or substantial improvements of existing structures shall be constructed by methods and practices that minimize flood damage;
- (4) Elevated Buildings - All New construction or substantial improvements of existing structures that include ANY fully enclosed area located below the lowest floor formed by foundation and other exterior walls shall be designed so as to be an unfinished or flood resistant enclosure. The enclosure shall be designed to equalize hydrostatic flood forces on exterior walls by allowing for the automatic entry and exit of floodwater.

(a) Designs for complying with this requirement must either be certified by a professional engineer or architect or meet the following minimum criteria:

(i) Provide a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding;

(ii) The bottom of all openings shall be no higher than one foot above grade; and,

(iii) Openings may be equipped with screens, louvers, valves or other coverings or devices provided they permit the automatic flow of floodwater in both direction.

(b) So as not to violate the "Lowest Floor" criteria of this ordinance, the unfinished or flood resistant enclosure shall only be used for parking of vehicles, limited storage of maintenance equipment used in connection with the premises, or entry to the elevated area, and

(c) The interior portion of such enclosed area shall not be partitioned or finished into separate rooms.

(5) All heating and air conditioning equipment and components (including ductwork), all electrical, ventilation, plumbing, and other service facilities shall be designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

(6) Manufactured homes shall be anchored to prevent flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. This standard shall be in addition to and consistent with applicable State requirements for resisting wind forces.

(7) New and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system;

(8) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters;

(9) On-site waste disposal systems shall be located and constructed to avoid impairment to them or contamination from them during flooding, and;

(10) Any alteration, repair, reconstruction or improvement to a structure, which is not compliant with the provisions of this ordinance, shall be undertaken only if the non- conformity is not furthered, extended or replaced.

SECTION B. SPECIFIC STANDARDS

In ALL Areas of Special Flood Hazard the following provisions are required:

- (1) New construction and/or substantial improvements - Where base flood elevation data are available, new construction and/or substantial improvement of any structure or manufactured home shall have the lowest floor, including basement, elevated no lower than one foot above the base flood elevation. Should solid foundation perimeter walls be used to elevate a structure, openings sufficient to facilitate equalization of flood hydrostatic forces on both sides of exterior walls shall be provided in accordance with standards of Article 4, Section A (4), "Elevated Buildings".
 - (a) All heating and air conditioning equipment and components (including ductwork), all electrical, ventilation, plumbing, and other service facilities shall be elevated at or above one (1) foot above the base flood elevation.
- (2) Non-Residential Construction - New construction and/or the substantial improvement of any structure located in A1-30, AE, or AH zones, may be flood-proofed in lieu of elevation. The structure, together with attendant utility and sanitary facilities, must be designed to be water tight to one (1) foot above the base flood elevation, with walls substantially impermeable to the passage of water, and structural components having the capability of resisting hydrostatic and hydrodynamic loads and the effect of buoyancy. A registered professional engineer or architect shall certify that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions above, and shall provide such certification to the official as set forth above and in Article 3, Section C. (6).
- (3) Standards for Manufactured Homes and Recreational Vehicles - Where base flood elevation data are available:
 - (a) All manufactured homes placed and/or substantially improved on: (1) individual lots or parcels, (2) in new and/or substantially improved manufactured home parks or subdivisions, (3) in expansions to existing manufactured home parks or subdivisions, or (4) on a site in an existing manufactured home park or subdivision where a manufactured home has incurred "substantial damage" as the result of a flood, must have the lowest floor including basement, elevated no lower than one foot above the base flood elevation.
 - (b) Manufactured homes placed and/or substantially improved in an existing manufactured home park or subdivision may be elevated so that either:
 - (i) The lowest floor of the manufactured home is elevated no lower than one foot above the level of the base flood elevation, or

(ii) The manufactured home chassis is elevated and supported by reinforced piers (or other foundation elements of at least an equivalent strength) of no less than 36 inches in height above grade.

(c) All manufactured homes must be securely anchored to an adequately anchored foundation system to resist flotation, collapse and lateral movement. (Ref. Article 4(A)(6) above)

(d) All recreational vehicles placed on sites must either:

(i) Be on the site for fewer than 180 consecutive days.

(ii) Be fully licensed and ready for highway use, (a recreational vehicle is ready for highway use if it is licensed, on its wheels or jacking system, attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached structures or additions), or

(iii) The recreational vehicle must meet all the requirements for "New Construction", including the anchoring and elevation requirements of Article 4, Section B (3)(a)(c), above.

(4). Floodway - Located within Areas of Special Flood Hazard established in Article 2, Section B, are areas designated as floodway. A floodway may be an extremely hazardous area due to velocity floodwaters, debris or erosion potential. In addition, the area must remain free of encroachment in order to allow for the discharge of the base flood without increased flood heights. Therefore, the following provisions shall apply:

(a) Encroachments are prohibited, including earthen fill, new construction, substantial improvements or other development within the regulatory floodway. Development may be permitted however, provided it is demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practice that the encroachment shall not result in any increase in flood levels or floodway widths during a base flood discharge. A registered professional engineer must provide supporting technical data and certification thereof.

(b) ONLY if Article 4 (B)(4)(a) above is satisfied, then any new construction or substantial improvement shall comply with all other applicable flood hazard reduction provisions of Article 4.

SECTION C. BUILDING STANDARDS FOR STREAMS WITHOUT ESTABLISHED BASE FLOOD ELEVATIONS AND/OR FLOODWAY (A-ZONES) -

Located within the Areas of Special Flood Hazard established in Article 2, Section B, where streams exist but no base flood data have been provided (A-Zones), OR where base flood data have been provided but a Floodway has not been delineated, the following provisions apply:

- (1) When base flood elevation data or floodway data have not been provided in accordance with Article 2(B), then the Building Official or his/her designee shall obtain, review, and reasonably utilize any scientific or historic base flood elevation and floodway data available from a Federal, State, or other source, in order to administer the provisions of Article 4. ONLY if data are not available from these sources, then the following provisions (2&3) shall apply:
- (2) No encroachments, including structures or fill material, shall be located within an area equal to the width of the stream or twenty feet, whichever is greater, measured from the top of the stream bank, unless certification by a registered professional engineer is provided demonstrating that such encroachment shall not result in more than a one (1) foot increase in flood levels during the occurrence of the base flood discharge.
- (3) In special flood hazard areas without base flood elevation data, new construction and substantial improvements of existing structures shall have the lowest floor of the lowest enclosed area (including basement) elevated no less than three (3) feet above the highest adjacent grade at the building site. (NOTE: Require the lowest floor to be elevated one foot above the estimated base flood elevation in A-Zone areas where a Limited Detail Study has been completed). Openings sufficient to facilitate the unimpeded movements of floodwaters shall be provided in accordance with standards of Article 4, Section A (4) "Elevated Buildings".
 - (a) All heating and air conditioning equipment and components (including ductwork), all electrical, ventilation, plumbing, and other service facilities shall be elevated no less than three (3) feet above the highest adjacent grade at the building site.

The Building Official or his/her designee shall certify the lowest floor elevation level and the record shall become a permanent part of the permit file.

SECTION D. STANDARDS FOR AREAS OF SHALLOW FLOODING (AO ZONES) -

Areas of Special Flood Hazard established in Article 2, Section B, may include designated "AO" shallow flooding areas. These areas have base flood depths of one to three feet (1'-3') above ground, with no clearly defined channel. The following provisions apply:

- (1) All new construction and substantial improvements of residential and non-residential structures shall have the lowest floor, including basement, elevated to the flood depth number specified on the Flood Insurance Rate Map (FIRM), above the highest adjacent grade. If no flood depth number is specified, the lowest floor, including basement, shall be elevated at least three feet (3) above the highest adjacent grade. Openings sufficient to facilitate the unimpeded movements of flood waters shall be provided in accordance with standards of Article 4, Section A (4), "Elevated Buildings".

The Building Official or his/her designee shall certify the lowest floor elevation level and the record shall become a permanent part of the permit file.

(2) New construction or the substantial improvement of a non-residential structure may be flood-proofed in lieu of elevation. The structure, together with attendant utility and sanitary facilities, must be designed to be water tight to the specified FIRM flood level plus one (1) foot, above highest adjacent grade, with walls substantially impermeable to the passage of water, and structural components having the capability of resisting hydrostatic and hydrodynamic loads and the effect of buoyancy. A registered professional engineer or architect shall certify that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions above, and shall provide such certification to the official as set forth above and as required in Articles 3(B)(1)(c) and (3)(B)(2).

(3) Drainage paths shall be provided to guide floodwater around and away from any proposed structure.

SECTION E. STANDARDS FOR SUBDIVISIONS

(1) All subdivision and/or development proposals shall be consistent with the need to minimize flood damage;

(2) All subdivision and/or development proposals shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize flood damage;

(3) All subdivision and/or development proposals shall have adequate drainage provided to reduce exposure to flood hazards, and;

(4) For subdivisions and/or developments greater than fifty (50) lots or five (5) acres, whichever is less, base flood elevation data shall be provided for subdivision and all other proposed development, including manufactured home parks and subdivisions. Any changes or revisions to the flood data adopted herein and shown on the FIRM shall be submitted to FEMA for review as a Conditional Letter of Map Revision (CLOMR) or Conditional Letter of Map Amendment (CLOMA), whichever is applicable. Upon completion of the project, the developer is responsible for submitting the "as-built" data to FEMA in order to obtain the final LOMR.

SECTION F. STANDARDS FOR CRITICAL FACILITIES

(1) Critical facilities shall not be located in the 100-year floodplain or the 500-year floodplain.

(2) All ingress and egress from any critical facility must be protected to the 500-year flood elevation.

ARTICLE 5.
VARIANCE PROCEDURES

- (A) The City Council as established by the City of Clarkesville shall hear and decide requests for appeals or variance from the requirements of this ordinance.
- (B) The City Council shall hear and decide appeals when it is alleged an error in any requirement, decision, or determination is made by the Building Official or his/her designee in the enforcement or administration of this ordinance.
- (C) Any person aggrieved by the decision of the City Council may appeal such decision to the Superior Court of Habersham County, as provided in Section 5-4-1 of the Official Code of Georgia Annotated.
- (D) Variances may be issued for the repair or rehabilitation of Historic Structures upon a determination that the proposed repair or rehabilitation will not preclude the structure's continued designation as a Historic Structure and the variance is the minimum to preserve the historic character and design of the structure.
- (E) Variances may be issued for development necessary for the conduct of a functionally dependent use, provided the criteria of this Article are met, no reasonable alternative exists, and the development is protected by methods that minimize flood damage during the base flood and create no additional threats to public safety.
- (F) Variances shall not be issued within any designated floodway if ANY increase in flood levels during the base flood discharge would result.
- (G) In reviewing such requests, the City Manager and City Council shall consider all technical evaluations, relevant factors, and all standards specified in this and other sections of this ordinance.
- (H) **Conditions for Variances:**
 - (1) A variance shall be issued ONLY when there is:
 - (i) a finding of good and sufficient cause,
 - (ii) a determination that failure to grant the variance would result in exceptional hardship, and;
 - (iii) a determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisance, cause fraud on or victimization of the public, or conflict with existing local laws or ordinances.

(2) The provisions of this Ordinance are minimum standards for flood loss reduction; therefore any deviation from the standards must be weighed carefully. Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief; and, in the instance of a Historic Structure, a determination that the variance is the minimum necessary so as not to destroy the historic character and design of the building.

(3) Any applicant to whom a variance is granted shall be given written notice specifying the difference between the base flood elevation and the elevation of the proposed lowest floor and stating that the cost of flood insurance will be commensurate with the increased risk to life and property resulting from the reduced lowest floor elevation.

(4) The Building Official or his/her designee shall maintain the records of all appeal actions and report any variances to the Federal Emergency Management Agency upon request.

(I) Upon consideration of the factors listed above and the purposes of this ordinance, the City Council may attach such conditions to the granting of variances as it deems necessary to further the purposes of this ordinance.

ARTICLE 6.

DEFINITIONS

Unless specifically defined below, words or phrases used in this ordinance shall be interpreted so as to give them the meaning they have in common usage and to give this ordinance its most reasonable application.

"Accessory Structure" means a structure having minimal value and used for parking, storage and other non-habitable uses, such as garages, carports, storage sheds, pole barns, hay sheds and the like.

"Addition (to an existing building)" means any walled and roofed expansion to the perimeter of a building in which the addition is connected by a common load-bearing wall other than a firewall. Any walled and roofed addition, which is connected by a firewall or is separated by an independent perimeter load-bearing wall, shall be considered "New Construction".

"Appeal" means a request for a review of the Building Official or his/her designee's interpretation of any provision of this ordinance.

"Area of shallow flooding" means a designated AO or AH Zone on a community's Flood Insurance Rate Map (FIRM) with base flood depths from one to three feet, and/or where a clearly defined channel does not exist, where the path of flooding is unpredictable and indeterminate, and where velocity flow may be evident.

"Area of special flood hazard" is the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. In the absence of official designation by the Federal Emergency

Management Agency, Areas of Special Flood Hazard shall be those designated by the local community and referenced in Article 2, Section B.

"Base flood," means the flood having a one percent chance of being equaled or exceeded in any given year.

"Base Flood Elevation (BFE)" The elevation shown on the Flood Insurance Rate Map for Zones AE, AH, A1-A30, AR, AR/A, AR/AE, AR/A1-A30, AR/AH, AR/AO, V1-V30, and VE that indicates the water surface elevation resulting from a flood that has a one percent chance of equaling or exceeding that level in any given year.

"Basement" means that portion of a building having its floor sub grade (below ground level) on all sides.

"Building," means any structure built for support, shelter, or enclosure for any occupancy or storage.

"Critical Facility" means any public or private facility, which, if flooded, would create an added dimension to the disaster or would increase the hazard to life and health. Critical facilities include:

- (a) structures or facilities that produce, use, or store highly volatile, flammable, explosive, toxic, or water-reactive materials;
- (b) hospitals and nursing homes, and housing for the elderly, which are likely to contain occupants who may not be sufficiently mobile to avoid the loss of life or injury during flood and storm events;
- (c) emergency operation centers or data storage centers which contain records or services that may become lost or inoperative during flood and storm events; and
- (d) generating plants, and other principal points of utility lines.

"Development" means any man-made change to improved or unimproved real estate, including, but not limited to, buildings or other structures, mining, dredging, filling, grading, paving, excavating, drilling operations, and storage of materials or equipment.

"Elevated building" means a non-basement building built to have the lowest floor of the lowest enclosed area elevated above the ground level by means of fill, solid foundation perimeter walls, pilings, columns, piers, or shear walls adequately anchored so as not to impair the structural integrity of the building during a base flood event.

"Existing construction" Any structure for which the "start of construction" commenced before August 8, 1987.

"Existing Manufactured Home Park or subdivision" means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum the installation of utilities, the construction of streets, and final site grading or the pouring of concrete pads) is completed before August 8, 1987.

"Expansion to an existing manufactured home park or subdivision" means the preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are to be affixed, including the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads.

"Flood" or "flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- (a.) the overflow of inland or tidal waters; or
- (b.) the unusual and rapid accumulation or runoff of surface waters from any source.

"Flood Hazard Boundary Map (FHBM)" means an official map of a community, issued by the Federal Insurance Administration, where the boundaries of areas of special flood hazard have been defined as Zone A.

"Flood Insurance Rate Map (FIRM)" means an official map of a community, issued by the Federal Insurance Administration, delineating the areas of special flood hazard and/or risk premium zones applicable to the community.

"Flood Insurance Study" the official report by the Federal Insurance Administration evaluating flood hazards and containing flood profiles and water surface elevations of the base flood.

"Floodplain" means any land area susceptible to flooding.

"Flood proofing." means any combination of structural and non-structural additions, changes, or adjustments to structures, which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

"Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height.

"Freeboard" means a factor of safety usually expressed in feet above a flood level for purposes of floodplain management. "Freeboard" tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, bridge openings, and the hydrological effect of urbanization of the watershed.

"Highest adjacent grade" means the highest natural elevation of the ground surface, prior to construction, adjacent to the proposed foundation of a building.

"Historic Structure" means any structure that is;

- a. Listed individually in the National Register of Historic Places (a listing maintained by the U.S. Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register:
- b. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district:

- c. Individually listed on a state inventory of historic places and determined as eligible by states with historic preservation programs which have been approved by the Secretary of the Interior; or
- d. Individually listed on a local inventory of historic places and determined as eligible by communities with historic preservation programs that have been certified either:
 - 1. By an approved state program as determined by the Secretary of the Interior, or
 - 2. Directly by the Secretary of the Interior in states without approved programs.

Lowest floor means the lowest floor of the lowest enclosed area, including basement. An unfinished or flood resistant enclosure, used solely for parking of vehicles, building access, or storage, in an area other than a basement, is not considered a building's lowest floor, provided that such enclosure is not built so as to render the structure in violation of other provisions of this code.

"Manufactured home" means a building, transportable in one or more sections, built on a permanent chassis and designed to be used with or without a permanent foundation when connected to the required utilities. The term also includes park trailers, travel trailers, and similar transportable structures placed on a site for 180 consecutive days or longer and intended to be improved property.

"Manufactured home park or subdivision" means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

"Mean Sea Level" means the average height of the sea for all stages of the tide. It is used as a reference for establishing various elevations within the floodplain. For purposes of this ordinance, the term is synonymous with National Geodetic Vertical Datum (NGVD).

"National Geodetic Vertical Datum (NGVD)" as corrected in 1929 is a vertical control used as a reference for establishing varying elevations within the floodplain.

"New construction" means ANY structure (see definition) for which the "start of construction" commenced on or after August 8, 1987 and includes any subsequent improvements to the structure.

"New manufactured home park or subdivision" means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after August 8, 1987.

"North American Vertical Datum (NAVD)" as corrected in 1988 is a vertical control used as a reference for establishing varying elevations within the floodplain.

"Recreational vehicle" means a vehicle, which is:

- a. built on a single chassis;
- b. 400 square feet or less when measured at the largest horizontal projection;

- c. designed to be self-propelled or permanently towable by a light duty truck; and
- d. designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

"Start of construction" means the date the development permit was issued, provided the actual start of construction, repair, reconstruction, or improvement was within 180 days of the permit date. The actual start means the first placement of permanent construction of the structure such as the pouring of slabs or footings, installation of piles, construction of columns, or any work beyond the stage of excavation, and includes the placement of a manufactured home on a foundation. (Permanent construction does not include initial land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of buildings appurtenant to the permitted structure, such as garages or sheds not occupied as dwelling units or part of the main structure. (NOTE: accessory structures are NOT exempt from any ordinance requirements) For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

"Structure" means a walled and roofed building that is principally above ground, a manufactured home, a gas or liquid storage tank.

"Subdivision" the division of a single lot into two or more lots for the purpose of sale or development.

"Substantial damage" means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed fifty (50) percent of the market value of the structure before the damage occurred.

"Substantial improvement" means any reconstruction, rehabilitation, addition, or other improvement of a structure, taking place during a 5-year period, in which the cumulative cost equals or exceeds fifty (50) percent of the market value of the structure prior to the "start of construction" of the improvement. NOTE: *The market value of the structure should be (1) the appraised value of the structure prior to the start of the initial repair or improvement, or (2) in the case of damage, the value of the structure prior to the damage occurring.* This term includes structures, which have incurred "substantial damage", regardless of the actual amount of repair work performed.

For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the building. The term does not, however, include (1) those improvements of a structure required to comply with existing violations of state or local health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions and which have been identified by the Code Enforcement Official, and not solely triggered by an improvement or repair project, or (2) any alteration of a "historic structure" provided that the alteration will not preclude the structure's continued designation as a "historic structure".

"Substantially improved existing manufactured home parks or subdivisions" is where the repair, reconstruction, rehabilitation or improvement of the streets, utilities and pads equals or exceeds 50 percent of the value of the streets, utilities and pads before the repair, reconstruction or improvement commenced.

"Variance" is a grant of relief from the requirements of this ordinance, which permits construction in a manner otherwise prohibited by this ordinance.

"Violation" means the failure of a structure or other development to be fully compliant with the community's floodplain management regulations. A structure or other development without the elevation certificate, or other certifications, or other evidence of compliance required by this ordinance is presumed to be in violation until such time as that documentation is provided.

ARTICLE 7.
SEVERABILITY

If any section, clause, sentence, or phrase of this Ordinance is held to be invalid or unconstitutional by any court of competent jurisdiction, then said holding shall in no way effect the validity of the remaining portions of this Ordinance.

**ORDINANCE 2009-2
FLOOD DAMAGE PREVENTION ORDINANCE**

**ARTICLE 1. STATUTORY AUTHORIZATION, FINDINGS OF FACT, PURPOSE
AND OBJECTIVES**

SECTION A. AUTHORIZATION

Article IX, Section II of the Constitution of the State of Georgia and Section 36-1-20(a) of the Official Code of Georgia Annotated have delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, the City, of Clarkesville, GEORGIA, does ordain as follows:

SECTION B. FINDINGS OF FACT

- (1) The flood hazard areas of Clarkesville, Georgia are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood relief and protection, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.
- (2) These flood losses are caused by the occupancy in flood hazard areas of uses vulnerable to floods, which are inadequately elevated, flood-proofed, or otherwise unprotected from flood damages, and by the cumulative effect of obstructions in floodplains causing increases in flood heights and velocities.

SECTION C. STATEMENT OF PURPOSE

It is the purpose of this ordinance to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

- (1) require that uses vulnerable to floods, including facilities, which serve such uses, be protected against flood damage at the time of initial construction;
- (2) restrict or prohibit uses which are dangerous to health, safety and property due to water or erosion hazards, or which increase flood heights, velocities, or erosion;
- (3) control filling, grading, dredging and other development which may increase flood damage or erosion, and;

- (4) prevent or regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands;
- (5) control the alteration of natural floodplains, stream channels, and natural protective barriers, which are involved in the accommodation of floodwaters.

SECTION D. OBJECTIVES

The objectives of this ordinance are:

- (1) to protect human life and health;
- (2) to minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains;
- (3) to help maintain a stable tax base by providing for the sound use and development of flood prone areas in such a manner as to minimize flood blight areas,
- (4) to minimize expenditure of public money for costly flood control projects;
- (5) to minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
- (6) to minimize prolonged business interruptions, and;
- (7) to insure that potential homebuyers are notified that property is in a flood area.

ARTICLE 2. GENERAL PROVISIONS

SECTION A. LANDS TO WHICH THIS ORDINANCE APPLIES

This ordinance shall apply to all Areas of Special Flood Hazard within the jurisdiction of Clarkesville, Georgia.

SECTION B. BASIS FOR AREA OF SPECIAL FLOOD HAZARD

The Areas of Special Flood Hazard identified by the Federal Emergency Management Agency in its Flood Insurance Study (FIS), dated June 2, 2009, with accompanying maps and other supporting data and any revision thereto, are adopted by reference and declared a part of this ordinance.

For those land areas acquired by a municipality through annexation, the current effective FIS dated June 2, 2009, with accompanying maps and other supporting data and any revision thereto, for (*Habersham County*) are hereby adopted by reference.

Areas of Special Flood Hazard may also include those areas known to have flooded historically or defined through standard engineering analysis by governmental agencies or private parties but not yet incorporated in a FIS. (*none noted*)

The Repository for public inspection of the Flood Insurance Study (FIS), accompanying maps and other supporting data is located: Clarkesville City Hall, 123 N. Laurel Drive, Clarkesville, Georgia 30523.

SECTION C. ESTABLISHMENT OF DEVELOPMENT PERMIT

A Development Permit shall be required in conformance with the provisions of this ordinance PRIOR to the commencement of any Development activities.

SECTION D. COMPLIANCE

No structure or land shall hereafter be located, extended, converted or altered without full compliance with the terms of this ordinance and other applicable regulations.

SECTION E. ABROGATION AND GREATER RESTRICTIONS

This ordinance is not intended to repeal, abrogate, or impair any existing ordinance, easements, covenants, or deed restrictions. However, where this ordinance and another conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

SECTION F. INTERPRETATION

In the interpretation and application of this ordinance all provisions shall be: (1) considered as minimum requirements; (2) liberally construed in favor of the governing body, and; (3) deemed neither to limit nor repeal any other powers granted under state statutes.

SECTION G. WARNING AND DISCLAIMER OF LIABILITY

The degree of flood protection required by this ordinance is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur; flood heights may be increased by man-made or natural causes. This ordinance does not imply that land outside the Areas of Special Flood Hazard or uses permitted within such areas will be free from flooding or flood damages. This ordinance shall not create liability on the part of the City of Clarkesville or by any officer or employee thereof for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made hereunder.

SECTION H. PENALTIES FOR VIOLATION

Failure to comply with the provisions of this ordinance or with any of its requirements, including conditions and safeguards established in connection with grants of variance or special exceptions shall constitute a violation. Any person who violates this ordinance or fails to comply with any of its requirements shall, upon conviction thereof, be fined not more than

\$1000 or imprisoned for not more than 5 days, or both, and in addition, shall pay all costs and expenses involved in the case. Each day such violation continues shall be considered a separate offense. Nothing herein contained shall prevent the City of Clarkesville from taking such other lawful actions as is necessary to prevent or remedy any violation.

ARTICLE 3. ADMINISTRATION

SECTION A. DESIGNATION OF ORDINANCE ADMINISTRATOR

The Zoning Administrator is hereby appointed to administer and implement the provisions of this ordinance.

SECTION B. PERMIT PROCEDURES

Application for a Development Permit shall be made to the Zoning Administrator on forms furnished by the community **PRIOR** to any development activities, and may include, but not be limited to the following: plans in duplicate drawn to scale showing the elevations of the area in question and the nature, location, dimensions, of existing or proposed structures, earthen fill placement, storage of materials or equipment, and drainage facilities.

Specifically, the following information is required:

(1) Application Stage -

- (a) Elevation in relation to mean sea level (or highest adjacent grade) of the lowest floor, including basement, of all proposed structures;
- (b) Elevation in relation to mean sea level to which any non-residential structure will be flood-proofed;
- (c) Design certification from a registered professional engineer or architect that any proposed non-residential flood-proofed structure will meet the flood-proofing criteria of Article 4, Section B (2);
- (d) Description of the extent to which any watercourse will be altered or relocated as a result of a proposed development, and;

(2) Construction Stage -

For all new construction and substantial improvements, the permit holder shall provide to the Administrator an as-built certification of the regulatory floor elevation or flood-proofing level immediately after the lowest floor or flood proofing is completed. Any lowest floor certification made relative to mean sea level shall be prepared by or under the direct supervision of a registered land surveyor or professional engineer and certified by same. When flood proofing is utilized for non-residential structures, said

certification shall be prepared by or under the direct supervision of a professional engineer or architect and certified by same.

Any work undertaken prior to submission of these certifications shall be at the permit holder's risk.

The Zoning Administrator shall review the above referenced certification data submitted. Deficiencies detected by such review shall be corrected by the permit holder immediately and prior to further progressive work being allowed to proceed. Failure to submit certification or failure to make said corrections required hereby, shall be cause to issue a stop-work order for the project.

SECTION C. DUTIES AND RESPONSIBILITIES OF THE ADMINISTRATOR

Duties of the Zoning Administrator shall include, but shall not be limited to:

- (1) Review proposed development to assure that the permit requirements of this ordinance have been satisfied.
- (2) Review proposed development to assure that all necessary permits have been received from governmental agencies from which approval is required by Federal or State law, including section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334. Require that copies of such permits be provided and maintained on file.
- (3) Review all permit applications to determine whether proposed building sites will be reasonably safe from flooding.
- (4) When Base Flood Elevation data or floodway data have not been provided in accordance with Article 2 Section B, then the Zoning Administrator shall obtain, review and reasonably utilize any base flood elevation and floodway data available from a Federal, State or other sources in order to administer the provisions of Article 4.
- (5) Review and record the actual elevation in relation to mean sea level (or highest adjacent grade) of the lowest floor, including basement, of all new or substantially improved structures in accordance with Article 3, Section B (2).
- (6) Review and record the actual elevation, in relation to mean sea level to which any new or substantially improved structures have been flood-proofed, in accordance with Article 3, Section B (2).
- (7) When flood-proofing is utilized for a structure, the Zoning Administrator shall obtain certification of design criteria from a registered professional engineer or architect in accordance with Article 3(B)(1)(c) and Article 4(B)(2) or (D)(2).
- (8) Make substantial damage determinations following a flood event or any other event that causes damage to structures in flood hazard areas.

(9) Notify adjacent communities and the Georgia Department of Natural Resources prior to any alteration or relocation of a watercourse and submit evidence of such notification to the Federal Emergency Management Agency (FEMA).

(10) For any altered or relocated watercourse, submit engineering data/analysis within six (6) months to the FEMA to ensure accuracy of community flood maps through the Letter of Map Revision process. Assure flood carrying capacity of any altered or relocated watercourse is maintained.

(11) Where interpretation is needed as to the exact location of boundaries of the Areas of Special Flood Hazard (for example, where there appears to be a conflict between a mapped boundary and actual field conditions) the Zoning Administrator shall make the necessary interpretation. Any person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in this Ordinance.

(12) All records pertaining to the provisions of this ordinance shall be maintained in the office of the Zoning Administrator and shall be open for public inspection.

ARTICLE 4. PROVISIONS FOR FLOOD HAZARD REDUCTION

SECTION A. GENERAL STANDARDS

In ALL Areas of Special Flood Hazard the following provisions are required:

(1) New construction and substantial improvements of existing structures shall be anchored to prevent flotation, collapse or lateral movement of the structure;

(2) New construction and substantial improvements of existing structures shall be constructed with materials and utility equipment resistant to flood damage;

(3) New construction or substantial improvements of existing structures shall be constructed by methods and practices that minimize flood damage;

(4) Elevated Buildings - All New construction or substantial improvements of existing structures that include ANY fully enclosed area located below the lowest floor formed by foundation and other exterior walls shall be designed so as to be an unfinished or flood resistant enclosure. The enclosure shall be designed to equalize hydrostatic flood forces on exterior walls by allowing for the automatic entry and exit of floodwater.

(a) Designs for complying with this requirement must either be certified by a professional engineer or architect or meet the following minimum criteria:

- (i) Provide a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding;
 - (ii) The bottom of all openings shall be no higher than one foot above grade; and,
 - (iii) Openings may be equipped with screens, louvers, valves or other coverings or devices provided they permit the automatic flow of floodwater in both direction.
- (b) So as not to violate the "Lowest Floor" criteria of this ordinance, the unfinished or flood resistant enclosure shall only be used for parking of vehicles, limited storage of maintenance equipment used in connection with the premises, or entry to the elevated area, and
- (c) The interior portion of such enclosed area shall not be partitioned or finished into separate rooms.
- (5) All heating and air conditioning equipment and components (including ductwork), all electrical, ventilation, plumbing, and other service facilities shall be designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.
- (6) Manufactured homes shall be anchored to prevent flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. This standard shall be in addition to and consistent with applicable State requirements for resisting wind forces.
- (7) New and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system;
- (8) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters;
- (9) On-site waste disposal systems shall be located and constructed to avoid impairment to them or contamination from them during flooding, and;
- (10) Any alteration, repair, reconstruction or improvement to a structure, which is not compliant with the provisions of this ordinance, shall be undertaken only if the non-conformity is not furthered, extended or replaced.

SECTION B. SPECIFIC STANDARDS

In ALL Areas of Special Flood Hazard the following provisions are required:

(1) New construction and/or substantial improvements - Where base flood elevation data are available, new construction and/or substantial improvement of any structure or manufactured home shall have the lowest floor, including basement, elevated no lower than *one foot* above the base flood elevation. Should solid foundation perimeter walls be used to elevate a structure, openings sufficient to facilitate equalization of flood hydrostatic forces on both sides of exterior walls shall be provided in accordance with standards of Article 4, Section A (4), "Elevated Buildings".

(a) All heating and air conditioning equipment and components (including ductwork), all electrical, ventilation, plumbing, and other service facilities shall be elevated at or above *one foot* above the base flood elevation.

(2) Non-Residential Construction - New construction and/or the substantial improvement of any structure located in A1-30, AE, or AH zones, may be flood-proofed in lieu of elevation. The structure, together with attendant utility and sanitary facilities, must be designed to be water tight to *one foot* above the base flood elevation, with walls substantially impermeable to the passage of water, and structural components having the capability of resisting hydrostatic and hydrodynamic loads and the effect of buoyancy. A registered professional engineer or architect shall certify that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions above, and shall provide such certification to the official as set forth above and in Article 3, Section C. (6).

(3) Standards for Manufactured Homes and Recreational Vehicles - Where base flood elevation data are available:

(a) All manufactured homes placed and/or substantially improved on: (1) individual lots or parcels, (2) in new and/or substantially improved manufactured home parks or subdivisions, (3) in expansions to existing manufactured home parks or subdivisions, or (4) on a site in an existing manufactured home park or subdivision where a manufactured home has incurred "substantial damage" as the result of a flood, must have the lowest floor including basement, elevated no lower than *one foot* above the base flood elevation.

(b) Manufactured homes placed and/or substantially improved in an existing manufactured home park or subdivision may be elevated so that either:

(i) The lowest floor of the manufactured home is elevated no lower than *one foot* above the level of the base flood elevation, or

(ii) The manufactured home chassis is elevated and supported by reinforced piers (or other foundation elements of at least an equivalent strength) of no less than 36 inches in height above grade.

(c) All manufactured homes must be securely anchored to an adequately anchored foundation system to resist flotation, collapse and lateral movement. (Ref. Article 4(A)(6) above)

(d) All recreational vehicles placed on sites must either:

(i) Be on the site for fewer than 180 consecutive days.

(ii) Be fully licensed and ready for highway use, (a recreational vehicle is ready for highway use if it is licensed, on its wheels or jacking system, attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached structures or additions), or

(iii) The recreational vehicle must meet all the requirements for "New Construction", including the anchoring and elevation requirements of Article 4, Section B (3)(a)(c), above.

(4). Floodway - Located within Areas of Special Flood Hazard established in Article 2, Section B, are areas designated as floodway. A floodway may be an extremely hazardous area due to velocity floodwaters, debris or erosion potential. In addition, the area must remain free of encroachment in order to allow for the discharge of the base flood without increased flood heights. Therefore, the following provisions shall apply:

(a) Encroachments are prohibited, including earthen fill, new construction, substantial improvements or other development within the regulatory floodway. Development may be permitted however, provided it is demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practice that the encroachment shall not result in any increase in flood levels or floodway widths during a base flood discharge. A registered professional engineer must provide supporting technical data and certification thereof.

(b) ONLY if Article 4 (B)(4)(a) above is satisfied, then any new construction or substantial improvement shall comply with all other applicable flood hazard reduction provisions of Article 4.

SECTION C. BUILDING STANDARDS FOR STREAMS WITHOUT ESTABLISHED BASE FLOOD ELEVATIONS AND/OR FLOODWAY (A-ZONES) -

Located within the Areas of Special Flood Hazard established in Article 2, Section B, where streams exist but no base flood data have been provided (A-Zones), OR where base flood data have been provided but a Floodway has not been delineated, the following provisions apply:

- (1) When base flood elevation data or floodway data have not been provided in accordance with Article 2(B), then the Zoning Administrator shall obtain, review, and reasonably utilize any scientific or historic base flood elevation and floodway data available from a Federal, State, or other source, in order to administer the provisions of Article 4. ONLY if data are not available from these sources, then the following provisions (2&3) shall apply:
- (2) No encroachments, including structures or fill material, shall be located within an area equal to the width of the stream or twenty feet, whichever is greater, measured from the top of the stream bank, unless certification by a registered professional engineer is provided demonstrating that such encroachment shall not result in more than a *one foot* increase in flood levels during the occurrence of the base flood discharge.
- (3) In special flood hazard areas without base flood elevation data, new construction and substantial improvements of existing structures shall have the lowest floor of the lowest enclosed area (including basement) elevated no less than *three feet* above the highest adjacent grade at the building site. (NOTE: Require the lowest floor to be elevated one foot above the estimated base flood elevation in A-Zone areas where a Limited Detail Study has been completed). Openings sufficient to facilitate the unimpeded movements of floodwaters shall be provided in accordance with standards of Article 4, Section A (4) "Elevated Buildings".
 - (a) All heating and air conditioning equipment and components (including ductwork), all electrical, ventilation, plumbing, and other service facilities shall be elevated no less than *three feet* above the highest adjacent grade at the building site.

The Zoning Administrator shall certify the lowest floor elevation level and the record shall become a permanent part of the permit file.

SECTION D. STANDARDS FOR AREAS OF SPECIAL FLOOD HAZARD (ZONES AE) WITH ESTABLISHED BASE FLOOD ELEVATIONS WITHOUT DESIGNATED FLOODWAYS

Located within the Areas of Special Flood Hazard established in Article 2, Section B, where streams with base flood elevations are provided but no floodways have been designated, (Zones AE) the following provisions apply:

1. No encroachments, including fill material, new structures or substantial improvements shall be located within areas of special flood hazard, unless certification by a registered professional engineer is provided demonstrating that the cumulative effect of the proposed development, when combined with all other existing and anticipated development, will not increase the water surface elevation of the base flood more than *one foot* at any point within the community. The engineering certification should be supported by technical data that conforms to standard hydraulic engineering principles.
2. New construction or substantial improvements of buildings shall be elevated or flood-proofed to elevations established in accordance with Article 4, Section B.

SECTION E. STANDARDS FOR AREAS OF SHALLOW FLOODING (AO ZONES) -

Areas of Special Flood Hazard established in Article 2, Section B, may include designated "AO" shallow flooding areas. These areas have base flood depths of *one to three feet* above ground, with no clearly defined channel. The following provisions apply:

- (1) All new construction and substantial improvements of residential and non-residential structures shall have the lowest floor, including basement, elevated to the flood depth number specified on the Flood Insurance Rate Map (FIRM), above the highest adjacent grade. If no flood depth number is specified, the lowest floor, including basement, shall be elevated at least *three feet* above the highest adjacent grade. Openings sufficient to facilitate the unimpeded movements of flood waters shall be provided in accordance with standards of Article 4, Section A (4), "Elevated Buildings".

The Zoning Administrator shall certify the lowest floor elevation level and the record shall become a permanent part of the permit file.

- (2) New construction or the substantial improvement of a non-residential structure may be flood-proofed in lieu of elevation. The structure, together with attendant utility and sanitary facilities, must be designed to be water tight to the specified FIRM flood level plus *one foot*, above highest adjacent grade, with walls substantially impermeable to the passage of water, and structural components having the capability of resisting hydrostatic and hydrodynamic loads and the effect of buoyancy. A registered professional engineer or architect shall certify that the design and methods of construction are in accordance with accepted standards of practice for meeting the

provisions above, and shall provide such certification to the official as set forth above and as required in Articles 3(B)(1)(c) and (3)(B)(2).

(3) Drainage paths shall be provided to guide floodwater around and away from any proposed structure.

SECTION F. STANDARDS FOR SUBDIVISIONS

(1) All subdivision and/or development proposals shall be consistent with the need to minimize flood damage;

(2) All subdivision and/or development proposals shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize flood damage;

(3) All subdivision and/or development proposals shall have adequate drainage provided to reduce exposure to flood hazards, and;

(4) For subdivisions and/or developments greater than *fifty lots or five acres*, whichever is less, base flood elevation data shall be provided for subdivision and all other proposed development, including manufactured home parks and subdivisions. Any changes or revisions to the flood data adopted herein and shown on the FIRM shall be submitted to FEMA for review as a Conditional Letter of Map Revision (CLOMR) or Conditional Letter of Map Amendment (CLOMA), whichever is applicable. Upon completion of the project, the developer is responsible for submitting the "as-built" data to FEMA in order to obtain the final LOMR.

SECTION G. STANDARDS FOR CRITICAL FACILITIES

(1) Critical facilities shall not be located in the 100-year floodplain or the 500-year floodplain.

(2) All ingress and egress from any critical facility must be protected to the 500-year flood elevation.

ARTICLE 5. VARIANCE PROCEDURES

(A) The Planning Commission as established by Clarkesville Mayor and Council shall hear and decide requests for appeals or variance from the requirements of this ordinance.

(B) The board shall hear and decide appeals when it is alleged an error in any requirement, decision, or determination is made by the Zoning Administrator in the enforcement or administration of this ordinance.

(C) Any person aggrieved by the decision of the Planning Commission may appeal such decision to the Superior Court of Habersham County, as provided in Section 5-4-1 of the Official Code of Georgia Annotated.

(D) Variances may be issued for the repair or rehabilitation of Historic Structures upon a determination that the proposed repair or rehabilitation will not preclude the structure's continued designation as a Historic Structure and the variance is the minimum to preserve the historic character and design of the structure.

(E) Variances may be issued for development necessary for the conduct of a functionally dependent use, provided the criteria of this Article are met, no reasonable alternative exists, and the development is protected by methods that minimize flood damage during the base flood and create no additional threats to public safety.

(F) Variances shall not be issued within any designated floodway if ANY increase in flood levels during the base flood discharge would result.

(G) In reviewing such requests, the Planning Commission shall consider all technical evaluations, relevant factors, and all standards specified in this and other sections of this ordinance.

(H) **Conditions for Variances:**

(1) A variance shall be issued ONLY when there is:

(i) a finding of good and sufficient cause,

(ii) a determination that failure to grant the variance would result in exceptional hardship, and;

(iii) a determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisance, cause fraud on or victimization of the public, or conflict with existing local laws or ordinances.

(2) The provisions of this Ordinance are minimum standards for flood loss reduction; therefore any deviation from the standards must be weighed carefully. Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief; and, in the instance of an Historic Structure, a determination that the variance is the minimum necessary so as not to destroy the historic character and design of the building.

(3) Any applicant to whom a variance is granted shall be given written notice specifying the difference between the base flood elevation and the elevation of the proposed lowest floor and stating that the cost of flood insurance will be commensurate with the increased risk to life and property resulting from the reduced lowest floor elevation.

(4) The Zoning Administrator shall maintain the records of all appeal actions and report any variances to the Federal Emergency Management Agency upon request.

(I) Upon consideration of the factors listed above and the purposes of this ordinance, the Planning Commission may attach such conditions to the granting of variances as it deems necessary to further the purposes of this ordinance.

ARTICLE 6. DEFINITIONS

Unless specifically defined below, words or phrases used in this ordinance shall be interpreted so as to give them the meaning they have in common usage and to give this ordinance its most reasonable application.

"Accessory Structure" means a structure having minimal value and used for parking, storage and other non-habitable uses, such as garages, carports, storage sheds, pole barns, hay sheds and the like.

"Addition (to an existing building)" means any walled and roofed expansion to the perimeter of a building in which the addition is connected by a common load-bearing wall other than a firewall. Any walled and roofed addition, which is connected by a firewall or is separated by an independent perimeter load-bearing wall, shall be considered "New Construction".

"Appeal" means a request for a review of the Zoning Administrator's interpretation of any provision of this ordinance.

"Area of shallow flooding" means a designated AO or AH Zone on a community's Flood Insurance Rate Map (FIRM) with base flood depths from one to three feet, and/or where a clearly defined channel does not exist, where the path of flooding is unpredictable and indeterminate, and where velocity flow may be evident.

"Area of special flood hazard" is the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. In the absence of official designation by the Federal Emergency Management Agency, Areas of Special Flood Hazard shall be those designated by the local community and referenced in Article 2, Section B.

"Base flood," means the flood having a one percent chance of being equaled or exceeded in any given year.

"Base Flood Elevation (BFE)" The elevation shown on the Flood Insurance Rate Map for Zones AE, AH, A1-A30, AR, AR/A, AR/AE, AR/A1-A30, AR/AH, AR/AO, V1-V30, and VE that indicates the water surface elevation resulting from a flood that has a one percent chance of equaling or exceeding that level in any given year.

"Basement" means that portion of a building having its floor sub grade (below ground level) on all sides.

"Building," means any structure built for support, shelter, or enclosure for any occupancy or storage.

"Critical Facility" means any public or private facility, which, if flooded, would create an added dimension to the disaster or would increase the hazard to life and health. Critical facilities include:

- (a) structures or facilities that produce, use, or store highly volatile, flammable, explosive, toxic, or water-reactive materials;
- (b) hospitals and nursing homes, and housing for the elderly, which are likely to contain occupants who may not be sufficiently mobile to avoid the loss of life or injury during flood and storm events;
- (c) emergency operation centers or data storage centers which contain records or services that may become lost or inoperative during flood and storm events; and
- (d) generating plants, and other principal points of utility lines.

"Development" means any man-made change to improved or unimproved real estate, including, but not limited to, buildings or other structures, mining, dredging, filling, grading, paving, excavating, drilling operations, and storage of materials or equipment.

"Elevated building" means a non-basement building built to have the lowest floor of the lowest enclosed area elevated above the ground level by means of fill, solid foundation perimeter walls, pilings, columns, piers, or shear walls adequately anchored so as not to impair the structural integrity of the building during a base flood event.

***"Existing construction"** means for the purposes of determining rates, structures for which the "start of construction" commenced before February 17, 1988.

***"Existing Manufactured Home Park or subdivision"** means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum the installation of utilities, the construction of streets, and final site grading or the pouring of concrete pads) is completed before September 8, 1987

"Expansion to an existing manufactured home park or subdivision" means the preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are to be affixed, including the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads.

"Flood" or "flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- (a.) the overflow of inland or tidal waters; or
- (b.) the unusual and rapid accumulation or runoff of surface waters from any source.

"Flood Hazard Boundary Map (FHBM)" means an official map of a community, issued by the Federal Insurance Administration, where the boundaries of areas of special flood hazard have been defined as Zone A.

"Flood Insurance Rate Map (FIRM)" means an official map of a community, issued by the Federal Insurance Administration, delineating the areas of special flood hazard and/or risk premium zones applicable to the community.

"Flood Insurance Study" the official report by the Federal Insurance Administration evaluating flood hazards and containing flood profiles and water surface elevations of the base flood.

"Floodplain" means any land area susceptible to flooding.

"Flood proofing," means any combination of structural and non-structural additions, changes, or adjustments to structures, which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

"Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height.

"Freeboard" means a factor of safety usually expressed in feet above a flood level for purposes of floodplain management. "Freeboard" tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for a selected size flood and floodway conditions, such as wave action, bridge openings, and the hydrological effect of urbanization of the watershed.

"Highest adjacent grade" means the highest natural elevation of the ground surface, prior to construction, adjacent to the proposed foundation of a building.

"Historic Structure" means any structure that is;

- a. Listed individually in the National Register of Historic Places (a listing maintained by the U.S. Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register:
- b. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district:

c. Individually listed on a state inventory of historic places and determined as eligible by states with historic preservation programs which have been approved by the Secretary of the Interior; or

d. Individually listed on a local inventory of historic places and determined as eligible by communities with historic preservation programs that have been certified either:

1. By an approved state program as determined by the Secretary of the Interior, or
2. Directly by the Secretary of the Interior in states without approved programs.

Lowest floor means the lowest floor of the lowest enclosed area, including basement. An unfinished or flood resistant enclosure, used solely for parking of vehicles, building access, or storage, in an area other than a basement, is not considered a building's lowest floor, provided that such enclosure is not built so as to render the structure in violation of other provisions of this code.

"Manufactured home" means a building, transportable in one or more sections, built on a permanent chassis and designed to be used with or without a permanent foundation when connected to the required utilities. The term also includes park trailers, travel trailers, and similar transportable structures placed on a site for 180 consecutive days or longer and intended to be improved property.

"Manufactured home park or subdivision" means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

"Mean Sea Level" means the average height of the sea for all stages of the tide. It is used as a reference for establishing various elevations within the floodplain. For purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood elevations shown on a community's Flood Insurance Rate Map are referenced.

"National Geodetic Vertical Datum (NGVD)" as corrected in 1929 is a vertical control used as a reference for establishing varying elevations within the floodplain.

***"New construction"** means, for the purposes of determining insurance rates, structures for which the "start of construction" commenced after February 17, 1988 and includes any subsequent improvements to such structures. For floodplain management purposes, "new construction" means structures for which the "start of construction" commenced after September 8, 1987 and includes any subsequent improvements to such structures.

***"New manufactured home park or subdivision"** means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed after September 8, 1987.

"North American Vertical Datum (NAVD)" has replaced the National Geodetic Vertical Datum of

1929 in existing and future FEMA Flood Modernization Maps.

"Recreational vehicle" means a vehicle, which is:

- a. built on a single chassis;
- b. 400 square feet or less when measured at the largest horizontal projection;
- c. designed to be self-propelled or permanently towable by a light duty truck; and
- d. designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

"Start of construction" means the date the development permit was issued, provided the actual start of construction, repair, reconstruction, or improvement was within 180 days of the permit date. The actual start means the first placement of permanent construction of the structure such as the pouring of slabs or footings, installation of piles, construction of columns, or any work beyond the stage of excavation, and includes the placement of a manufactured home on a foundation. (Permanent construction does not include initial land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of buildings appurtenant to the permitted structure, such as garages or sheds not occupied as dwelling units or part of the main structure. (NOTE: accessory structures are NOT exempt from any ordinance requirements) For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

"Structure" means a walled and roofed building that is principally above ground, a manufactured home, a gas or liquid storage tank.

"Subdivision" the division of a single lot into two or more lots for the purpose of sale or development.

"Substantial damage" means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed fifty (50) percent of the market value of the structure before the damage occurred.

"Substantial improvement" means any reconstruction, rehabilitation, addition, or other improvement of a structure, taking place during a 5-year period, in which the cumulative cost equals or exceeds fifty (50) percent of the market value of the structure prior to the "start of construction" of the improvement. NOTE: *The market value of the structure should be (1) the appraised value of the structure prior to the start of the initial repair or improvement, or (2) in the case of damage, the value of the structure prior to the damage occurring.* This term includes structures, which have incurred "substantial damage", regardless of the actual amount of repair work performed.

For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the building. The term does not, however, include

(1) those improvements of a structure required to comply with existing violations of state or local health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions and which have been identified by the Code Enforcement Official, and not solely triggered by an improvement or repair project, or (2) any alteration of a "historic structure" provided that the alteration will not preclude the structure's continued designation as a "historic structure".

"Substantially improved existing manufactured home parks or subdivisions" is where the repair, reconstruction, rehabilitation or improvement of the streets, utilities and pads equals or exceeds 50 percent of the value of the streets, utilities and pads before the repair, reconstruction or improvement commenced.

"Variance" is a grant of relief from the requirements of this ordinance, which permits construction in a manner otherwise prohibited by this ordinance.

"Violation" means the failure of a structure or other development to be fully compliant with the community's floodplain management regulations. A structure or other development without the elevation certificate, or other certifications, or other evidence of compliance required by this ordinance is presumed to be in violation until such time as that documentation is provided.

ARTICLE 7. SEVERABILITY

If any section, clause, sentence, or phrase of this Ordinance is held to be invalid or unconstitutional by any court of competent jurisdiction, then said holding shall in no way effect the validity of the remaining portions of this Ordinance.

PERMIT

Sec. 42-66. Required.

It shall be unlawful for any person to establish, operate or maintain, or permit to be established, operated or maintained, upon any property owned or controlled by him a mobile home park within the limits of the city without having first secured a permit therefor from the mayor and city council, granted and existing in compliance with the terms of this article.

(a) *Recomputation of tax; authority to make; basis of recomputation.* If the city clerk is not satisfied with the return of the tax or the amount of the tax required to be paid to the city by any person, he may compute and determine the amount required to be paid upon the basis of any information in his possession or which may come into his possession. One or more than one deficiency determination may be made of the amount due for one or more than one monthly period.

(b) *Interest on deficiency.* The amount of the unpaid tax found to be due shall bear interest at the rate of three-fourths of one percent per month from and after the 20th day of the month following the monthly period for which the amount should have been returned until the date of payment of such tax and interest.

(c) *Offsetting of overpayments.* In making a determination, the secretary may offset overpayments for a period against unpaid tax found to be due for another period, against penalties, and against the interest on such unpaid tax.

(d) *Notice of determination; service.* The clerk, or his designated representative, shall give to the operator written notice of his determination. The notice may be served personally or by mail. If by mail, such service shall be addressed to the operator at his address as it appears in the records of the clerk.

(e) *Time within which notice of deficiency determination to be mailed.* Except in the case of failure to make a return, every notice of a deficiency determination shall be mailed within three years after the 20th day of the calendar month following the monthly period for which the amount is proposed to be determined, or within three years after the return is filed, whichever period shall last expire.
(Ord. No. 45, § 10, 10-5-1987)

Sec. 50-42. Determination if no return made.

(a) *Estimate of gross receipts.* If any operator fails to make a return, the city clerk shall make an estimate of the amount of the gross receipts of the operator or, as the case may be, of the amount of the total rentals in this city which are subject to the tax. The estimate shall be made for the period in respect to which the person failed to make the return, and shall be based upon any information which is or may come into the possession of the clerk. Upon the basis of this estimate, the clerk shall compute and determine the amount required to be paid the city, adding to the sum thus determined a penalty equal to 15 percent. One or more determinations may be made of the amount due for one or for more than one monthly period.

(b) *Offsetting of overpayments.* In making a determination, the clerk may offset overpayments for a period against unpaid tax found to be due for another period, against penalties, and against interest on unpaid tax found to be due. The interest on such unpaid tax shall be computed in the manner set forth in section 50-41(b).

(c) *Interest on amount found due.* The amount of the unpaid tax found to be due shall bear interest at the rate of three-fourths of one percent per month from and after the 20th day of the month following the monthly period for which the amount should have been returned until the date of payment of such tax, penalties and interest.

(d) *Notice of determination; service.* Promptly after making his determination, the clerk shall give to the operator written notice of his determination, which notice may be served personally or by mail in the manner prescribed for service of notice of a deficiency determination.
(Ord. No. 45, § 11, 10-5-1987)

Sec. 50-43. Collection of tax.

(a) *Action for tax; time for.* When it is determined by a return filed, or by the secretary having made a determination under the provisions of sections 50-41 or 50-42, that tax is due and payable to the city under the provisions of this article, the city manager may at any time within three years after determination that such tax is due and payable bring an action in the courts of this state, of any other state, or of the United States in the name of the city to collect the amount of tax payable to the city, together with interest thereon and penalties, court costs, attorney's fees and other legal fees incident thereto. The bringing of such an action shall not be a prerequisite for the issuance of a fi. fa. under the provisions of subsection (d) of this section.

(b) *Duty of successors or assignees of operator to withhold tax from purchase money.* If any operator liable for any amount of tax under this article sells or transfers his business, his successors or assigns shall withhold a sufficient amount of the purchase price of the business to cover such amount of tax, interest thereon, and penalties, and pay such sum over to the city unless the operator liable for such tax delivers to such purchaser or transferee, as the case may be, at the time of such sale or transfer, a certificate from the clerk

showing that all tax returns required of such operator have been filed and all taxes shown as being payable on such returns have been paid in full.

(c) *Liability for failure to withhold; time to enforce successor's liability.* If the purchaser or transferee of a business fails to withhold the required amount of the purchase price, he shall be personally liable for the payment of the amount required to be withheld by him to the extent of the purchase price, valued in money. The time within which the obligation of a successor may be enforced shall start to run at the time the operator sells or transfers his business, or at the time that the determination against the operator becomes final, whichever event occurs the later.

(d) *Issuance of fi. fa.* The clerk is hereby authorized to issue a fi. fa. for execution and levy to satisfy the amount of any tax, penalty or interest due but not paid under the provisions of this article. (Ord. No. 45, § 12, 10-5-1987)

Sec. 50-44. Administration of article.

(a) *Authority of the clerk.* The clerk of the city, under supervision of the city manager, shall administer and enforce the provisions of this article for the levy and collection of the tax imposed by this article.

(b) *Rules and regulations.* The clerk shall have the power and authority to make and publish reasonable rules and regulations not inconsistent with this article or other ordinances of the city, or the laws of the state, or the constitution of this state or the United States, for the administration and enforcement of the provisions of this article and the collection of the taxes under this article.

(c) *Records required from operators; form.* Every operator shall keep such records, receipts, invoices and other pertinent papers in such form as the city clerk may require.

(d) *Examination of records; audits.* The clerk, or any person authorized in writing by him, may examine the books, papers, records, financial reports, equipment and other facilities of any operator in order to verify the accuracy of any return made, or if no return is made by the operator, to ascertain and determine the amount of tax required to be paid.

(e) *Authority to require reports; contents.* In administration of the provisions of this article, the clerk may require the filing of reports by any person or class of persons having in their possession or custody information relating to rentals of guestrooms which are subject to the tax. The reports shall be filed with the secretary when required by the clerk and shall set forth the rental charged for each occupancy, the dates of occupancy, and such other information as the clerk may require.

(f) *Limitation on disclosure of business of operators.* The clerk, or any person having an administrative duty under this article, shall not make known in any manner the business affairs, operations or information obtained by an audit of books, papers, records, financial reports, equipment and other facilities of any operator or any other person visited or examined in the discharge of official duty, or the amount or source of income, profits, losses, expenditures or any particular thereof set forth or disclosed in any return, or permit any return or copy thereof or any book containing any abstract or particulars thereof to be seen or examined by any person not having such administrative duty under this article, except in case of judicial proceedings or other proceedings necessary to collect the tax hereby levied and assessed. Successors, receivers, trustees, executors,

administrators, assignees and guarantors, if directly interested, may be given information as to the items included in the measure and amount of unpaid tax or amounts of tax, interest and penalties required to be collected.

(Ord. No. 45, § 13, 10-5-1987)

Sec. 50-45. Agents for receiving notices.

When registering pursuant to section 50-36, each operator shall appoint, in writing, an agent to receive for the operator any notice required to be given to the operator under the provisions of this article, stating the full name, street address, mailing address and telephone number of such agent. Such agent shall be either an individual resident of the city or an employee of the operator who regularly works at the operator's place of business on a daily basis, and the appointment of the agent must be accompanied by the written consent of such agent to serve as agent for the operator. Such agent may be changed from time to time by written appointment of, and consent of, a successor agent. The operator is required to have such an agent at all times and should an agent cease to be a resident of the city or an employee regularly working at the operator's place of business in the city, as the case may be, the operator shall immediately file a written appointment of a new agent and such agent's consent to serve as such with the clerk. Any agent so appointed by an operator shall be authorized to receive for and on behalf of the operator any notice required to be given to the operator by the provisions of this article. Delivery of any such notice to such agent, in person or by mail, shall be sufficient to meet the requirements of this article, and such notice shall be binding on the operator. (Ord. No. 31, § II, 10-3-1983)

Sec. 50-114. Determination and definition of gross receipts.

(a) *Definition; deductions.* For purposes of this article, the term "gross receipts" means the total amount of revenue generated from the sources itemized in this section during the calendar year immediately preceding the date on which the tax authorized by this article shall be due. Before determining gross receipts there shall be deducted:

- (1) An amount equal to the amount of interest paid on all liabilities for the period;
- (2) An amount equal to income derived from the authorized activities of any domestic international banking facility operating pursuant to the Domestic International Banking Facility Act as set forth in O.C.G.A. § 7-1-730 et seq.;
- (3) An amount equal to any income arising from the conduct of a banking business with persons or entities located outside of the United States, its territories or possessions;
- (4) An amount equal to a depository financial institution's gross income which is taxed under the tax laws of a state other than the state; and

To the extent that any deductions are made pursuant to subsections (a)(2), (a)(3) and (a)(4) of this section, any deductions taken under subsection (a)(1) of this section shall be reduced by the same proportion that the deductions in subsections (a)(2)--(a)(4) of this section bear to the gross receipts of the depository financial institution as calculated before making any deductions pursuant to subsections (a)(1)--(a)(4) of this section.

(b) *Items included in calculations with respect to banks.* The items to be included in the calculation of gross receipts with respect to banks are as follows:

- (1) Interest and fees on loans less any interest collected on those portions of loans sold and serviced for others;
- (2) Interest on balances with other depository financial institutions;
- (3) Interest on federal or correspondent funds sold and securities purchased under agreement to resell;
- (4) Interest on other bonds, notes and debentures, excluding interest on obligations of the state or its political subdivisions and obligations of the United States;
- (5) Dividends on stock;

- (7) Income from fiduciary activities;
- (8) Service charges on deposit accounts;
- (9) Other service charges, commissions and fees; and
- (10) Other income.

(c) *Items included in calculations with respect to savings and loan associations.* The items to be included in the calculation of gross receipts with respect to savings and loan associations are as follows:

- (1) Interest on mortgage loans less any interest collected on those portions of loan sold and serviced for others;
- (2) Interest on mortgages, participations or mortgage-backed securities;
- (3) Interest on real estate sold on contract;
- (4) Discounts on mortgage loans purchased;
- (5) Interest on other loans, excluding interest on obligations of the state or its political subdivisions and obligations of the United States;
- (6) Interest and dividends on investments and deposits;
- (7) Loan fees;

- (8) Loan servicing fees;
- (9) Other fees and charges;
- (10) Gross income from real estate-owned operations;
- (11) Net income from office building operations;
- (12) Gross income from real estate held for investment;
- (13) Net income from service corporations and subsidiaries;
- (14) Miscellaneous operating income;
- (15) Profit on sale of real estate owned, investment securities, loans and other assets; and
- (16) Miscellaneous nonoperating income.

(d) *Returns; allocation method.* Every depository financial institution subject to the tax imposed by this article shall file a return of its gross receipts with the city by March 1 of the year following the year in which such gross receipts are measured. Such return shall be in the manner and in the form prescribed by the state revenue commissioner, based on the allocation method set forth in this subsection. The return shall provide the information necessary to determine the portion of the taxpayer's total gross receipts to be allocated to the city. The total gross receipts generated in the state by a depository financial institution, subject to any tax authorized by this article, shall be allocated among separate taxing jurisdictions as follows:

- (1) If a depository financial institution shall have an office or a place of business in more than one municipality, the amount of gross receipts taxable by the city shall be the amount of gross receipts attributable to such offices or places of business in the city as of December 31 of the year in which gross receipts are measured; and
- (2) In determining the amount of gross receipts attributable to each location, 20 percent of the gross receipts shall be attributable to the parent bank. The remaining 80 percent of gross receipts shall be attributable to branch banks and bank offices, with none of the gross receipts attributable to bank facilities or other outlets not considered to be a parent bank, branch bank or bank office. The terms "parent bank," "branch bank," and "bank office," as used in this article, mean those same terms as defined in the Financial Institutions Code of Georgia as set forth in O.C.G.A. § 7-1-1 et seq. If there are fewer than five branch banks or bank offices in addition to the parent bank, the amount of gross receipts attributable to each such parent bank, branch bank or bank office shall be determined by dividing the total gross receipts by the aggregate number of such outlets. For purposes of this distribution formula only, the term "bank" also means a savings and loan association.

IN GENERAL

Sec. 58-1. Work permit required; penalty for violation of section.

(a) Before the commencement or continuation of any work or repairs of any nature upon or within the street rights of way, alleys or easements of the city, all individuals, partnerships, corporations, utility companies and all other parties shall first make application for a work permit from the city. Such work permit shall be on a form approved and provided by the city and must be received by the applicant and granted by the city before the commencement of any work or repairs.

(b) Any person who neglects or refuses to comply with any of the provisions of this section shall be deemed guilty of a misdemeanor and, upon conviction therefor, shall be fined not less than \$10.00 nor more than \$100.00, and each day of continued violation after conviction shall constitute a separate offense.
(Ord. No. 62, §§ 1, 2, 8-2-1993)

Sec. 58-2. Licenses, permits, tags or certificates.

No licenses, permits, tags or certificates required by this chapter shall be issued unless the applicant provides a statement by the city clerk certifying that all ad valorem taxes levied against the property and due and owing have been paid.
(Res. of 6-29-2004, § 1(a))

Secs. 58-3--58-35. Reserved.

ARTICLE II.

WATER SERVICE

Sec. 58-36. Application and scope of article.

This article is a part of all contracts for receiving water service from the city and shall apply whether the service is based upon contract, agreement, signed application or otherwise.
(Ord. No. 43, § 43-01, 4-15-1985)

Sec. 58-37. Definitions.

The following words, terms and phrases, when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

Customer means any person who receives water service from the city under either an express or implied contract.

Department means the city water department.

Discount date means the last date upon which water bills can be paid at net rates.

Dwelling means any single structure, with auxiliary buildings, occupied by one or more persons or households for residential purposes.

Premises means any structure or group of structures operated as a single business or enterprise; provided, however, that the term "premises" shall not include more than one dwelling.

Service line means the pipeline extending from any water main of the city to private property. Where a meter and meter box are located on private property, the service line shall be construed to include the pipeline extending from the city's water main to and including the meter and meter box.
(Ord. No. 43, § 43-02, 4-15-1985)

Cross References: Definitions generally, § 1-2.

Sec. 58-38. Deposit fee.

A deposit in an amount as set forth in the schedule of fees and charges for water service shall be required for all customers requesting service. This water service deposit fee shall not be returnable unless and until the following conditions are met:

- (1) All amounts due for the first 12 months' service must have been promptly and timely paid with no delinquency.
- (2) Applicants must complete and return to the city a form requesting return of the water service department fee.
- (3) The form to request such return shall be provided by the city.
- (4) If such request is not made by the filing of the requisite form within 60 days from the expiration of the initial 12 months' service, the water service deposit fee can only be returned to the applicant upon termination of service, provided that all amounts due the city by the customer have been paid and a request for the refund is made within one year from the date of termination of service.

(Ord. of 8-7-1989, § I; Ord. of 3-7-1994, § I; Res. of 6-29-2004, § 1(c))

Sec. 58-39. Obtaining service.

A written application signed by the applicant for either the original or additional service must be made and be approved by the department before connection or meter installation orders will be issued and the work performed.

(Res. of 6-29-2004, § 1(e))

Sec. 58-40. Application for service.

Application for connection for water service shall be initiated by a connection fee in an amount set forth in the schedule of fees and charges for in-city customers, and in an amount set forth in the schedule of fees and charges for outside-the-city-limits customers. If the service applied for cannot be supplied in accordance with this article, service shall be limited to the return of the connection fee paid by such applicant. The connection fee as required by this section is in addition to any fees, costs or charges provided for elsewhere in this article.

(Ord. No. 43, § 43-04, 4-15-1985; Ord. of 8-7-1989, § 2; Ord. of 10-1-1990, § 1)

Sec. 58-41. Service charges for temporary service.

Customers requiring temporary service shall pay all costs for connection and disconnection incidental to the supplying and removing of service in addition to the regular charge for water used.

(Ord. No. 43, § 43-05, 4-15-1985)

Sec. 58-42. Connection charges.

(a) Service lines will be laid by the city from the water main to the property line and will be included as a cost to the tap fee for a five-eighths-inch and three-quarter-inch connection. Connection costs for one inch and larger will be adjusted based on the size and additional cost above five-eighths-inch and three-quarters-inch connection cost.

(b) When a service line is completed, the department shall be responsible for the maintenance and upkeep of such service line from the main to and including the meter and meter box, and such portion of the service line shall belong to the city. The remaining portion of the service line beyond the meter box shall belong to and be the responsibility of the customer even though the meter and meter box are located within the property line. The department shall be responsible for installation and maintenance of all meters.

(Ord. No. 43, § 43-06, 4-15-1985)

Sec. 58-43. Main extensions to developed areas.

The provisions of this section shall apply only to water main extensions of 500 feet or less to areas where there is a demand for water service by the occupants of existing houses. This section shall in no event be applicable to land development projects and subdivision promotions, even though accompanied by the erection of occasional houses within such areas. At its discretion, the city may make such extensions at its own expense.

(Ord. No. 43, § 43-07, 4-15-1985)

Sec. 58-44. Main extensions outside the corporate limits.

- (a) The provisions of this section shall apply to all areas to which section 58-43 is not applicable.
- (b) Customers desiring water main extensions pursuant to this section must pay all of the cost of making such extensions.
- (c) The size, type and installation of water mains pursuant to this section must be approved by the department. All such mains shall be constructed either by the department's forces or by other forces working directly under the supervision of the department. If the work being done is by the water department, an advance deposit may be required in an amount not to exceed the estimated cost of the proposed extension.
- (d) Upon completion of such extensions and their approval by the department, such water mains shall become the property of the department. The persons paying the cost of constructing such mains shall execute any written instruments requested by the department to provide evidence of the department's title to such mains.
- (e) In consideration of such mains being transferred to the department, such mains shall be incorporated as an integral part of the water system, and the department shall furnish water therefrom in accordance with its rules, regulations and rate schedules, subject always to such limitations as may exist because of the size and elevation of such mains.
- (f) As further consideration, the department shall, for a period of five years (and no longer), repay to the person or persons who pay the cost of such a water main extension in the amount set forth in the schedule of fees and charges for each new service line connection attached to the extension within the five-year period. The total payments for new service connections shall in no event exceed the cost of the extension to the person who paid therefor. Payments for new connections shall not include those of a temporary nature such as circuses, fairs, temporary construction and other temporary requirements for water service.
- (g) No payment shall be made for service line connections not made directly to the water main extension in question, even though such service line connections are made to a main extending from, or receiving water through, the main extension in question.
- (h) The cost of any extension of water mains and/or service lines which are located outside the corporate limits of the city shall be paid in full by the property owners and/or developers.
- (i) Upon completion of such water main extensions and their approval by the water department, such water mains shall become the property of the water department.
(Ord. No. 43, § 43-08, 4-15-1985)

Sec. 58-45. Variances from and effect of sections 58-43 and 58-44 as to extension.

- (a) Whenever the water department is of the opinion that it is to the best interest of the water system to construct a water main extension without requiring strict compliance with sections 58-43 and 58-44, such extension may be constructed upon such terms and conditions as shall be approved by the city.

(b) The authority to make water main extensions under sections 58-43 and 58-44 is permissive only, and nothing contained therein shall be construed as requiring the city to make water main extensions or to furnish service to any persons, even though such prospective customers meet all of the requirements contained in sections 58-43 and 58-44 so as to authorize the department to make a main extension.
(Ord. No. 43, § 43-09, 4-15-1985)

Sec. 58-46. Meters.

Any customer shall have the right to purchase and furnish a meter, provided such meter meets the requirements and standards of new meters then being installed by the city. When a customer furnishes his own meter, it shall remain the property of the customer. The city will test, repair and maintain the meter, but the customer shall be responsible for the cost of such maintenance and repair. No one shall tamper with or work on a water meter without the written permission of the water department. No one shall cause water to pass through or around a water meter without the passage of such water being registered fully by the meter.
(Ord. No. 43, § 43-10, 4-15-1985)

Sec. 58-47. Meter tests.

(a) The city will, at its own expense, make routine tests of meters when it considers such tests desirable.

(b) In testing meters, the water passing through a meter will be weighed or measured at various rates of discharge and under varying pressures. To be considered accurate, the meter registration shall check with the weighed or measured amounts of water within the percentage shown in the following table:

Meter Size (in inches)	Percentage
5/8, 3/4, 1, 2	2
3	3
4	4
6 and over	5

(c) The city will also make tests or inspections of its meters at the request of the customer. However, if a test requested by a customer shows a meter to be accurate within the limits stated in subsection (b) of this section, the customer shall pay a meter testing charge in an amount established by the city from time to time.

(d) If such test shows a meter not to be accurate within such limits, the cost of such meter test shall be borne by the city.
(Ord. No. 43, § 43-11, 4-15-1985; Res. of 6-29-2004, § 1(f))

Sec. 58-48. Schedule of rates.

All water service shall be furnished under such rate schedules as the city may from time to time adopt by appropriate resolution.
(Ord. No. 43, § 43-12, 4-15-1985; Res. of 6-29-2004, § 1(g))

Sec. 58-49. Multiple services through a single meter.

(a) No customer shall supply water service to more than one dwelling or premises from a single service line and meter without first obtaining the written permission of the city.

(b) Where the city allows more than one dwelling or premises to be served through a single service line and meter, the amount of water used by all the dwellings and premises served through a single service line and meter shall be allocated to each separate dwelling or premise served. The water charge for each such dwelling or premises thus served shall be computed just as if each such dwelling or premises had received through a separately metered service the amount of water allocated to it, such computation to be made at the city's applicable water rates schedule, including the provisions as to minimum bills. The separate charges for each dwelling or premises served through a single service line and meter shall then be added together, and the sum thereof shall be billed to the customer in whose name the service is supplied.
(Ord. No. 43, § 43-13, 4-15-1985)

Sec. 58-50. Billing.

(a) Water bills and sewer bills must be paid jointly on or before the cutoff date shown thereon. Failure to receive a bill will not release a customer from payment obligation, nor extend the cutoff date.

(b) If a bill is not paid on or before the cutoff date, service may be discontinued without further notice. The city shall not be liable for any damages resulting from discontinuing service under the provisions of this section, even though payment of the bill is made at any time on the day that service is actually discontinued.

(c) Any account not paid by the 15th day of each month will be subject to a late penalty of ten percent added to the account balance.

(d) Should the final date of payment of bill fall on Sunday or a holiday, the business day next following the final date will be the last day for cutoff. A remittance received by mail after the time limit for payment will be accepted by the city if the envelope is date-stamped on or before the final date for payment.

(e) If a meter fails to register properly, or if a meter is removed to be tested or repaired, or if water is received other than through a meter, the city reserves the right to render an estimated bill based on the best information available.

(Ord. No. 43, § 43-14, 4-15-1985; Ord. of 4-4-1994, § 1)

Sec. 58-51. Discontinuance or refusal of service.

(a) The department shall have the right to discontinue service or refuse to connect service for a violation of, or a failure to comply with, any of the following:

(1) These rules and regulations of this article.

(2) The payment of any obligation due the department including any required deposit.

(b) Such right to discontinue service shall apply to all service received through a single connection or service, even though more than one customer or tenant is furnished service therefrom, and even though the

delinquency or violation is limited to only one such customer or tenant.

(c) Discontinuance of service by the city for any cause stated in this article shall not release the customer from liability for service already received or from liability for payments that thereafter become due under other provisions of the customer's contract.

(d) The city shall have the right to refuse to render service to any applicant whenever the applicant or any member of the household, company or firm to which such service is to be furnished, is in default in the payment of any obligation to the city or has heretofore had his service disconnected because of a violation of this article.

(e) If the city should for any reason begin to render service to an applicant to whom the city has a good and valid reason for refusing to render such service, the city shall have the right to discontinue such service at any time within one year after such service is begun, even though such customer does nothing to justify the discontinuance of service during the time such service is being rendered.

(Ord. No. 43, § 43-15, 4-15-1985)

Sec. 58-52. Reconnection charge.

When service is discontinued as provided for in section 58-51, an administrative fee set forth in the schedule of fees and charges shall be assessed and shall be collected by the city before service is restored.

(Res. of 6-29-2004, § 1(h))

Sec. 58-53. Termination of service by customer.

(a) Customers who have fulfilled their contract terms and wish to discontinue service must give notice to that effect. The city shall have the right to continue such service not to exceed ten days from receipt of notice. Notice to discontinue service prior to the expiration of a contract term will not relieve the customer from any minimum or guaranteed payment under such contract or applicable rate schedule.

(b) Under no circumstance will the continuance or discontinuance of service be used as a means of forcing the occupant of the premises to surrender possession thereof.

(Ord. No. 43, § 43-17, 4-15-1985)

Sec. 58-54. Access to customers' premises.

The water department's identified representatives and employees shall be granted access to all customers' premises at all reasonable times for the purpose of reading meters, for testing, inspecting, repairing, removing and replacing all equipment belonging to the city, and for inspecting the customer's plumbing and premises generally in order to secure compliance with this article.

(Ord. No. 43, § 43-18, 4-15-1985)

Sec. 58-55. Inspections.

(a) The city may, but shall not be obligated to inspect any installation or plumbing system before water service is furnished, or at any later time. The city reserves the right to refuse service or to discontinue

service to any premises not meeting standards fixed by municipal ordinances regulating building and plumbing, or not in accordance with any special contract, this article, or other requirements of the city.

(b) Any failure to inspect or reject a customer's installation or plumbing system shall not render the city liable or responsible for any loss or damage which might have been avoided had such inspection or rejection been made.

(Ord. No. 43, § 43-19, 4-15-1985)

Sec. 58-56. Customer's responsibility for system's property.

Except as elsewhere expressly provided in this article, all meters, service connections and other equipment furnished by or for the city shall be and remain the property of the city. Each customer shall provide space for and exercise proper care to protect the property of the city on his premises. In the event of loss or damage to such property, arising from the neglect of a customer to properly care for same, the cost of necessary repairs or replacements shall be paid by the customer.

(Ord. No. 43, § 43-20, 4-15-1985)

Sec. 58-57. Customer's responsibility for violations.

Where the city furnishes water service to a customer, such customer shall be responsible for all violations of this article which occur on the premises so served. Personal participation by the customer in any such violations shall not be necessary to impose such personal responsibility on him.

(Ord. No. 43, § 43-21, 4-15-1985)

Sec. 58-58. Supply and resale of water.

All water shall be supplied within the city exclusively by the city, and no customer shall, directly or indirectly, sell, sublet, assign or otherwise dispose of the water or any part thereof, except with written permission from the city.

(Ord. No. 43, § 43-22, 4-15-1985)

Sec. 58-59. Unauthorized use or interference with water supply.

No person shall turn on or turn off any of the city's stopcocks, valves, hydrants, spigots or fireplugs without permission or authority from the department.

(Ord. No. 43, § 43-23, 4-15-1985)

Sec. 58-60. Limited use of unmetered private fire line.

(a) Where a private fire line or sprinkler system line is not metered, no water shall be used from such line or from any fire hydrant thereon, except to fight fire or except when being inspected in the presence of an authorized agent of the department.

(b) All private fire hydrants may be sealed by the city, and shall be inspected at regular intervals to see that they are in proper condition and that no water is being used therefrom in violation of this article. When the seal is broken on account of fire, or for any other reason, the customer taking such service shall immediately

give the city a written notice of such occurrence.
(Ord. No. 43, § 43-24, 4-15-1985)

Sec. 58-61. Damages to property due to water pressure.

The city shall not be liable to any customer for damages caused to his plumbing or property by high pressure, low pressure, or fluctuations in pressure in the city's water mains.
(Ord. No. 43, § 43-25, 4-15-1985)

Sec. 58-62. Liability for cutoff failures.

(a) The city's liability shall be limited to the forfeiture of the right to charge a customer for water that is not used but is received from a service line under any of the following circumstances:

- (1) After receipt of at least ten days' notice to cut off a water service, the city has failed to cut off such service.
- (2) The city has attempted to cut off a service, but such service has not been completely cut off.
- (3) The city has completely cut off a service, but, subsequently, the cutoff develops a leak or is turned on again so that water enters the customer's pipes from the city's main.

(b) Except to the extent stated in subsection (a) of this section, the city shall not be liable for any loss or damage resulting from cutoff failures. If a customer wishes to avoid possible damage for cutoff failures, the customer shall rely exclusively on privately owned cutoffs and not on the city's cutoff. Also, the customer (and not the city) shall be responsible for seeing that his plumbing is properly drained and is kept properly drained after his water service has been cut off.
(Ord. No. 43, § 43-26, 4-15-1985)

Sec. 58-63. Restricted use of water.

In times of emergencies or in times of water shortage, the city reserves the right to restrict the purposes for which water may be used by a customer and the amount of water which a customer may use.
(Ord. No. 43, § 43-27, 4-15-1985)

for the proper handling of liquid wastes containing floatable grease in excessive amounts, sand or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the superintendent and shall be located as to be readily and easily accessible for cleaning and inspection. In the maintenance of these interceptors, the owner shall be responsible for the proper removal and disposal by appropriate means of the captured material and shall maintain records of the dates and means of disposal which are subject to review by the superintendent. Any removal and hauling of the collected materials not performed by owner's personnel must be performed by currently licensed waste disposal firms.

character may be accepted by the city for treatment.
(Ord. No. 53, Div. 1, 10-1-1990)

Sec. 58-199. Measurements, tests and analyses; use of Standard Methods.

All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in this article shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association. Sampling methods, location times, durations and frequencies are to be determined on an individual basis, subject to approval by the city.

(Ord. No. 53, Div. 1, 10-1-1990)

Sec. 58-200. Pretreatment of wastes; minimum facilities.

Persons discharging industrial wastes into the sewer system may be required to pretreat such wastes. Plans for all pretreatment facilities shall be approved by the superintendent or the state environmental protection division prior to construction. At the time written plans are submitted for approval, written maintenance plans shall also be submitted and approved by the superintendent. The facilities shall be allowed to operate only as long as they are maintained in accordance with the approved maintenance plans. Pretreatment requirements shall be determined on a case-by-case basis and shall include the following facilities as a minimum:

- (1) *Neutralization.* If plans are submitted for the neutralization of strong acid or alkaline wastes, the plans shall include the necessary instrumentation and controls to ensure compliance with such regulations at all times.
- (2) *Equalization.* Holding tanks or equalization basins shall be required ahead of the receiving manhole of the city sewer system when deemed necessary by the superintendent to prevent peak flows that exceed the capacity of the system or that result in operational problems.
- (3) *Operation and maintenance of facilities.* All pretreatment facilities shall be operated and maintained continuously in satisfactory and effective operation by the owner at his expense.

(Ord. No. 53, Div. 1, 10-1-1990)

Sec. 58-201. Waiver of article requirements.

(a) There shall be no provision for the granting of variances for discharge of incompatible wastes. If a user begins to violate any of the provisions of this article, it shall be his responsibility to apply to the superintendent who can issue a temporary permit along with a compliance schedule for planning and construction of necessary treatment or pretreatment works. Each case will be carefully evaluated with respect to its effect on the wastewater treatment system and the environment prior to issuance of a temporary permit and compliance schedule.

(b) Any dilution of the wastewater by the user for the purpose of decreasing the concentrations of toxic materials shall be considered as a violation of this article.

(Ord. No. 53, Div. 1, 10-1-1990)

Sec. 58-202. Discontinuance of service for failure to comply; procedures.

Failure to comply shall be cause for the discontinuance of sewer or water service to the offending person. The procedure shall be as follows: A written notice, signed by the superintendent, shall be delivered personally to the person then responsible for the offending use, outlining the conditions of the wastes which violate the city ordinances. If the person in charge will not accept the notice, it shall be conveyed by registered mail to the responsible person. The person notified shall have 24 hours from the time of receipt of the notice, either personally delivered or received by registered mail, to correct the offending conditions. If correction is not made or a request for extension is not received by the city within 24 hours, it shall be mandatory that water or sewer service shall be discontinued to the offending person without further notice. If a request for an extension of time is received by the city within 24 hours of such notice and if circumstances are such that, in the opinion of the superintendent, the best interest of the city would be served by extending the time for correction of the offending condition, then he may grant an extension of time up to a maximum limit of 30 days. (Ord. No. 53, Div. 1, 10-1-1990)

Sec. 58-203. Responsibilities of discharger of waste.

It shall be the responsibility of the person discharging industrial waste into the city sewer system to:

- (1) *Control manhole.* Build a control structure in the discharge line from his premises, immediately prior to the entrance of the discharge line into the city sewer system, suitable for the sampling and measuring of wastes. Plans for this structure must be approved by the city. This requirement may be waived if deemed unnecessary by the city. If no special manhole is required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected.
- (2) *Notify superintendent of operation changes.* Contact the superintendent prior to operation changes which will materially alter the characteristics of the wastes from the prior sampling.
- (3) *Timely surcharge payments.* Make timely, periodic payments to the city of surcharges for excessive loadings as detailed in the city user charge system.

(Ord. No. 53, Div. 1, 10-1-1990)

(Ord. No. 53, Div. 4, 10-1-1990)

Sec. 58-258. City to make connections.

All public sewer connections or taps shall be made exclusively by personnel of the city.

(Ord. No. 53, Div. 4, 10-1-1990)

Sec. 58-259. Building sewers and connections.

(a) *Separate and independent sewer per building.* A separate and independent building sewer shall be provided for every building, except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, courtyard or driveway, the front building may be extended to the rear building and the whole considered as one building sewer. The city does not and will not assume any obligation or responsibility for damage caused by or resulting from any such single connection aforementioned.

(b) *Old building sewers.* Old building sewers may be used in connection with new buildings only when they are found, on examination and test by the superintendent, to meet all requirements of this article.

(c) *Size, slope, alignment; materials and procedures.* The size, slope, alignment and materials of construction of a building sewer and the methods to be used in construction shall all conform to the requirements of the building and plumbing codes or other applicable rules and regulations of the county. In the absence of code provisions or in amplification thereof, the materials and procedures set forth in appropriate specifications of the American Society for Testing and Materials (ASTM) and Water Environment Federation (WEF) Manual of Practice No. 9 shall apply. Additionally, the following materials and methods shall apply to building sewers within city supervision:

- (1) The building sewer shall be cast iron soil pipe, ASTM Specification A74, latest revision, or equal; ductile iron pipe, American National Standards Institute (ANSI) Specification A21.51, latest revision, or equal; or polyvinyl chloride (PVC) sewer pipe, ASTM Specification D3034, latest revision. All joints shall be tight and waterproof. Any part of the building sewer that is located within ten feet of a water service pipe shall be constructed of cast iron soil pipe and ductile iron pipe with bolted mechanical joints. This also may be required by the superintendent where the sewer is exposed to damage by tree roots. If installed in filled or unstable ground, the building shall be of cast iron soil pipe, except that plastic pipe may be acceptable if laid on a

suitable concrete bed or cradle as approved by the superintendent.

- (2) The size and slope of the building sewer shall be subject to the approval of the superintendent, but in no event shall the diameter be less than four inches. The slope of such four-inch pipe shall not be less than one-eighth of an inch per foot. Furthermore, the appropriate requirements of the Occupational Health and Safety Act (OSHA), 29 USC 651 et seq., shall be followed.
- (3) The depth shall be sufficient to afford protection from frost, and the building sewer shall be laid at uniform grade and with straight alignment insofar as possible. Changes in direction shall be made only with properly curved pipe and fittings. Building sewers shall not be placed in the same trench with water service lines.
- (4) An excavation required for the installation of a building sewer shall be open trench work unless otherwise approved by the superintendent. Pipelaying and backfill shall be performed in accordance with ASTM Specification C12, latest revision, except that no backfill shall be placed until the work has been inspected and approved.
- (5) All joints and connections shall be made gastight and watertight. Push-on joints for cast iron soil pipe shall have neoprene gaskets in accordance with the requirements of ASTM C-564. Push-on joints for ductile iron pipe shall also have neoprene gaskets and be installed according to the manufacturer's recommendations. PVC pipe joint material shall be of the bell and spigot type, sealed with a rubber O-ring gasket, having a composition and texture which is resistant to the common ingredients of sewage, industrial wastes (including oils), and groundwater, and which will endure permanently under the conditions likely to be imposed by this use. Installation of gasket shall be done in accordance with the pipe manufacturer's instructions using all the necessary materials, lubricants, and equipment recommended by the manufacturer. Other jointing materials may be used only when approved by the superintendent.

(d) *Elevation; lifting of sewage.* Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. No building sewer shall be laid parallel to or within three feet of any bearing wall which might thereby be weakened. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

(e) *Connections to sources of surface runoff or groundwater.* No person shall make connection of roof downspouts, foundation drains, areaway drains, or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer unless such connection is approved for purposes of disposal of polluted surface drainage.

(f) *Notification of superintendent of readiness of sewer for inspection.* The applicant for the building sewer permit shall notify the superintendent when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made by the city.

(g) *Guarding of excavations; restoration of public property.* All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a

manner satisfactory to the city.

(h) *Action by city in case of infiltration or inflow.* If any house sewer permits the entrance of infiltration or inflow, the city may:

(1) Require the owner to repair the house sewer.

(2) Charge the owner a sewer rate that reflects the costs of the additional expense of sewage treatment from the owner's property.

(3) Require the owner to disconnect his sewer from the city sewer system.

(Ord. No. 53, Div. 4, 10-1-1990)

Sec. 58-260. Structures located in the floodplain.

No new sewer connections shall be provided to any structure which is located within a 100-year floodplain area as determined by a state registered land surveyor or licensed civil engineer, from the maps in effect at the time of application for the permit for connection to the sewer system. Such certification shall be presented at the request of the city and the costs of the certification shall be borne by the property owner.

ARTICLE V.

WATER SUPPLY CONNECTIONS AND CROSS CONNECTIONS

Sec. 58-291. Definitions.

The following words, terms and phrases, when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

Auxiliary intake means any piping connection or other device whereby water may be secured from a source other than that normally used.

Bypass means any system of piping or other arrangement whereby the water may be diverted around any part or portion of a water purification plant.

Cross connection means any physical connection whereby the public water supply is connected with any other water supply system, whether public or private, either inside or outside of any building or buildings, in such manner that a flow of water into the public water supply is possible either through the manipulation of valves, or connection of hose pipes on any other temporary piping, or because of ineffective check or backpressure valves, or because of any other arrangement.

Interconnection means any system of piping or other arrangement whereby the public water supply is connected directly with a sewer, drain, conduit, pool, storage reservoir or other device which does or may

contain sewage or other waste or liquid which would be capable of imparting contamination to the public water supply.

Person means any and all persons, natural or artificial, including any individual firm or association, and any municipal or private corporation organized or existing under the laws of this or any other state or country.

Public water supply means the waterworks system furnishing water to the city inside and outside the city limits for general use and which supply is recognized as the public water supply by the state department of natural resources/environmental protection division.

(Ord. No. 66, § 1, 7-11-1994)

Cross References: Definitions generally, § 1-2.

Sec. 58-292. Penalty for violation of article.

Any person who neglects or refuses to comply with any of the provisions of this article shall be deemed guilty of a misdemeanor and, upon conviction, shall be punished as provided in section 1-12. In addition to such fines and penalties, the water superintendent or public works superintendent of the city shall discontinue the public water supply service at any premises upon which there is found such cross connection, auxiliary intake, bypass or interconnection until such premises are brought into compliance with the provisions of this article.

(Ord. No. 66, § 10, 7-11-1994)

Sec. 58-293. Adoption of safe drinking water codes.

The city public water supply is to comply with the Georgia Safe Drinking Water Act of 1977 as set forth in O.C.G.A. § 12-5-170 and P.L. 93-523 of the Federal Safe Drinking Water Act (42 USC 300f et seq.), legally adopted in accordance with this Code, which pertain to cross connections, and establish an effective, ongoing program to control these undesirable water uses.

(Ord. No. 66, § 2, 7-11-1994)

Sec. 58-294. Prohibited connections and cross connections.

It shall be unlawful for any person to cause a cross connection, auxiliary intake, bypass or interconnection to be made, or to allow one to exist for any purpose whatsoever.

(Ord. No. 66, § 3, 7-11-1994)

Sec. 58-295. Filing of statement of nonexistence of prohibited connections or cross connections.

Any person whose premises are supplied with water from the public water supply, and who also has on the same premises a separate source of water supply or stores water in an uncovered or unsanitary storage reservoir from which the water stored therein is circulated through a piping system, shall file with the water superintendent or public works superintendent of the city a statement of the nonexistence of unapproved or unauthorized cross connections, auxiliary intakes, bypasses, or interconnections. Such statement shall also contain an agreement that no cross connection will be permitted upon the premises.

(Ord. No. 66, § 4, 7-11-1994)

Sec. 58-296. Inspections.

It shall be the duty of the city public water supply to cause inspections to be made of all properties served by the public water supply where cross connections with the public water supply are deemed possible. The frequency of inspections and reinspections based on potential health hazards involved shall be as established by the water superintendent or public works superintendent of the city.
(Ord. No. 66, § 5, 7-11-1994)

Sec. 58-297. Backflow prevention devices; installation; inspection; testing and repairing.

(a) The water superintendent or public works superintendent of the city, or his designated representative, shall require the use of an approved protective device on the service line serving the premises to ensure that any contamination that may originate in the customer's premises is contained therein. The protective devices shall be either a reduced pressure zone type backflow preventer approved by the water superintendent or public works superintendent, or a double checkvalve, as determined by the water superintendent or public works superintendent as to manufacture, model and size. All hosepipes shall be fitted with a vacuum sucker device. The method of installation of backflow protective devices shall be approved by the water superintendent or public works superintendent of the city prior to installation and shall comply with the criteria set forth by the water superintendent or public works superintendent.

(b) The installation shall be at the expense of the owner or occupant of the premises. The departments shall have the right to inspect and test the devices on an annual basis or whenever deemed necessary by the water superintendent or public works superintendent or his designated representative. Water service shall not be disrupted to test the device without the knowledge of the occupant of the premises.

(c) Where the use of water is critical to the continuance of normal operations or protection of life, property or equipment, duplicated units shall be provided to avoid the necessity of discontinuing water service to test or repair the protective devices. Where only one unit is installed and the continuance of service is critical, the water superintendent or public works superintendent shall notify, in writing, the occupant of the premises of plans to discontinue water service and arrange for a mutually acceptable time to test and/or repair the device. The water system shall require the occupant of the premises to make all repairs indicated promptly, and the expense of such repairs shall be borne by the owner or occupant of the premises. These repairs shall be made by qualified personnel, acceptable to the water superintendent or public works superintendent of the city.
(Ord. No. 66, § 5, 7-11-1994)

Sec. 58-298. Right of entry for inspection; furnishing required information.

The water superintendent or public works superintendent, or authorized representative, shall have the right to enter at any reasonable time any property served by a connection to the city public water supply for the purpose of inspecting the piping system or systems thereof for cross connections, auxiliary intakes, bypasses, or interconnection. On request, the owner, lessee or occupant of any property so served shall furnish to the inspection agency any pertinent information regarding the piping system or systems on such property. The refusal of such information or refusal of access, when requested, shall be deemed evidence of the presence of cross connections.
(Ord. No. 66, § 6, 7-11-1994)

Sec. 58-299. Reasonable compliance time to be allowed.

Any person who now has cross connections, auxiliary intakes, bypasses, or interconnections in violation of the provisions of this article shall be allowed a reasonable time within which to comply with the provisions of this article. After a thorough investigation of existing conditions and an appraisal of the time required to complete the work, the amount of time shall be designated by the water superintendent or public works superintendent of the city.
(Ord. No. 66, § 7, 7-11-1994)

Sec. 58-300. Labeling of nonpotable water supply.

The potable water supply made available on the properties served by the public water supply shall be protected from possible contamination as specified in this section. Any water outlet which could be used for potable or domestic purposes and which is not supplied by the potable system must be labeled in a conspicuous manner as:

Water Unsafe for Drinking

The minimum acceptable sign shall have black letters, one inch high, located on a red background.

Action to subsequently incorporate zoning procedures and other criteria, as adopted by this ordinance, into the Zoning Ordinance, will save interested individuals the cost of purchasing two separate ordinances and will place such procedures and criteria in the most appropriate position.

Section 2. Authority to Amend.

The Governing Body may from time to time amend the number, shape, boundary or area of any zoning district, or may amend any regulation pertaining to any district; or may amend any Article or Section of the zoning ordinance. The procedure for amending the zoning ordinance shall be provided in this ordinance.

Section 3. Initiation of Zoning Amendments.

A petition to amend the text of the zoning ordinance or the official zoning map may be initiated by the Governing Body, the Planning Commission, or any person, firm, corporation or agency that owns property involved in a petition for amendment, subject to the provisions established herein.

Section 4. Frequency of Application.

The Governing Body or the Planning Commission may at any time file, in its own name, an application for amendment to the text of the zoning ordinance or the official zoning map, except that if a zoning decision of the Governing Body is for rezoning of property and the amendment to the zoning ordinance and map to accomplish the rezoning is defeated by the Governing Body, then the same property may not again be considered for rezoning until the expiration of at least six (6) months immediately following the defeat of the rezoning by the Governing Body.

A property owner or subsequent property owner shall not initiate action for a map amendment, conditional use permit, or variance affecting the same or any portion of property more often than once every twelve (12) months from the date of any previous decision rendered by the Governing Body.

A property owner or subsequent property owner shall not initiate action for an amendment to the zoning ordinance text affecting the same or any portion of property more often than once every twelve (12) months from the date of any previous decision rendered by the Governing Body.

This section shall not be construed as to limit new applications involving the same property for which the application was made, provided the new application contains substantive differences from the original application as determined by the Zoning Administrator.

Section 5. Withdrawal of Amendment Application.

Any petition for an amendment to the zoning ordinance text, official zoning map, conditional use approval, or variance may be withdrawn, at the discretion of the person or agency initiating such a request, at any time prior to closing the required public hearing by the Governing Body upon written notice to the Zoning Administrator. If the public hearing before the Governing Body has been completed, withdrawal by the Applicant is not permitted. Any required application fees shall be refunded to the applicant only if such application has not been prepared and submitted for advertisement as determined by the Zoning Administrator.

Section 6. Application Requirements.

Application materials specified in this section shall be required for the following petitions: amendments to the official zoning map, conditional use permits, variances and appeals.

1. An application form furnished by the Zoning Administrator; and
2. A legal description of the property to be considered in the application. The legal description shall be metes and bounds unless an alternative legal description (such as a tax plat map) is accepted by the Zoning Administrator. Boundary surveys should be submitted with the application whenever available; and
3. A letter of intent which at a minimum describes the following:
 - a) the existing zoning of the subject property;
 - b) the requested action by the Governing Body (i.e., proposed zoning classification, type of conditional use, specific sections of the zoning ordinance for which a variance is sought including the exact amount of variance needed, or the specific determination that is being appealed).
 - c) a description of the proposed use that is specific enough to link the development proposal to one or more permitted uses in the existing or proposed zoning district.
 - d) the anticipated time frame for development.
 - e) justification of the request including a consideration of the criteria specified in this ordinance (Section 10 for variance, Section 8 for zoning map amendments, and Section 9 for conditional uses).
4. Except for rezoning applications to a single-family residential district, a site plan, as defined in Section 20 of this ordinance, with all information specified in Section 7 of this ordinance. Unless otherwise noted in the approval, the site plan in support of an approved application shall be considered a part of the approval and must be followed.
5. A fee for said application as established by the Governing Body from time to time.
6. Applications which require action by the Governing Body shall also require disclosure of any conflicts of interest as specified in Chapter 67A of the Georgia Code, "Conflict of Interest in Zoning Actions."

7. Applicants shall submit fifteen (15) copies of any required site plans and letters of intent to the Zoning Administrator for distribution to the applicable bodies and/or review agencies. The Zoning Administrator may require more or less copies depending on the nature and extent of the required review.

Any application which fails to contain a letter of intent, site plan or other application requirement specified in this Section shall be considered incomplete and shall not be processed by the Zoning Administrator.

Section 7. Site Plan Requirements.

All site plans required by this ordinance shall, at a minimum, contain the following information:

1. Title of the proposed development and the name, address and telephone number of the property owner.
2. The name, address and telephone number of the architect, engineer or other designer of the proposed development.
3. Scale, date, north arrow, and general location map showing relationship of the site to streets and natural landmarks.
4. Boundaries of the subject property, all existing and proposed streets, including right-of-way and street pavement widths; buildings, water courses; parking and loading areas; and other physical characteristics of the property and proposed development.

Section 8. Criteria To Consider For Map Amendments

The applicant, Zoning Administrator, Planning Commission and Governing Body should review an application for zoning map amendment with regard to the following criteria:

1. The existing uses and zoning of nearby property and whether the proposed zoning will adversely affect the existing use or usability of nearby property.
2. The extent to which property values are diminished by the particular zoning restrictions.
3. The extent to which the destruction of the property values promotes the health, safety, morals or general welfare of the public.
4. The relative gain to the public, as compared to the hardship imposed upon the individual property owner.
5. The physical suitability of the subject property for development as presently zoned and under the proposed zoning district.
6. The length of time the property has been vacant, considered in the context of land development in the area in the vicinity of the property, and whether there area existing or changed conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the rezoning request.
7. The zoning history of the subject property.
8. The extent to which the proposed zoning will result in a use which will or could cause excessive or burdensome use of existing streets, transportation facilities, utilities, schools, parks or other public facilities.
9. Whether the zoning proposal is in conformity with the policy and intent of the comprehensive plan, land use plan or other adopted plans.
10. The possible creation of an isolated district unrelated to adjacent or nearby districts.

The Zoning Administrator, Planning Commission and Governing Body may consider other factors deemed relevant before formulating recommendations and taking action on a particular request.

Section 9. Criteria To Consider For Conditional Uses.

The applicant, Zoning Administrator, Planning commission and Governing Body should review applications for conditional uses with regard to the following criteria:

1. Off-street parking and loading facilities are adequate in terms of location, amount and design to serve the use.
2. The number, size and type of signs proposed are compatible with the surrounding area.
3. The amount and location of open space and the provision of screening is such that buffering of incompatible uses is achieved.
4. Ingress and egress to the property is suitable and safe, and the effect of the proposed activity on traffic flow along adjoining streets is not adverse.
5. The location and intensity of outdoor lighting is such that it does not cast light on adjacent, adjoining and neighboring properties.
6. Hours and manner of operation of the proposed use are not inconsistent with adjacent and nearby uses.
7. Public facilities and utilities are capable of adequately serving the proposed use.
8. The proposed use will not have a significant adverse effect on the level of property values or the general character of adjacent land uses or the general area.
9. The physical conditions of the site, including size, shape, topography and drainage, are suitable for the proposed development.
10. The proposed use is consistent with the goals and objectives of the city's Comprehensive Plan.

The Zoning Administrator, Planning Commission and Governing Body may consider other factors deemed relevant before formulating recommendations and taking action on a particular conditional use application.

Section 10. Criteria to Consider for Variances.

The Governing Body is hereby empowered to authorized upon application in specific cases such variance from the dimensional requirements of zoning regulations (any provisions requiring a number to be achieved, such as height in feet, setback, lot area, lot width, parking and loading requirements, etc.) as will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the provisions of these regulations shall be observed, public safety and welfare secured, and substantial justice done. The existence of a non-confirming use of a neighboring land, buildings or structures in the same zoning district or of permitted or non-conforming uses in other districts shall not constitute a reason for the requested variance. A variance may be granted in an individual case of unnecessary hardship, after appropriate application in accordance with Section 6 of this ordinance, upon specific findings that all of the following conditions exist. The absence of any one (1) of the conditions shall be grounds for denial of the application for variance:

1. There are extraordinary and exceptional conditions pertaining to the particular piece of property in question because of its size, shape or topography that are not applicable to other land or structures in the same district; and
2. A literal interpretation of the provisions of these zoning regulations would create an unnecessary hardship and would deprive the applicant of rights commonly enjoyed by other property owners within the district in which the property is located; and

3. Granting the variance requested will not confer upon the property of the applicant any special privileges that are denied to other properties of the district in which the applicant's property is located; and
4. Relief, if granted, will be in harmony with the purpose and intent of these Regulations and will not be injurious to the neighborhood or general welfare in such a manner as will interfere with or discourage the appropriate development and use of adjacent land and buildings or unreasonable affect their value; and
5. The special circumstances are not the result of the actions of the applicant; and
6. The variance requested is the minimum variance that will make possible legal use of the land, building, or structure; and
7. The variance is not a request to permit a use of land, building or structures which is not permitted by right in the district involved.

A variance shall not be granted in cases where the requested relief to the property owner can be remedied by a change to a zoning district which otherwise would not require a variance.

Section 11. Procedures For Appeals.

The Governing Body is empowered to hear and decide appeals where it is alleged there is an error in any order, requirement, decision or determination made by the Zoning Administrator in the interpretation or enforcement of these zoning regulations.

The Board is empowered to hear an appeal made by any person, firm, or corporation, by any officer, department, board, or bureau affected by any decisions of the Planning Commission or Zoning Administrator based on the zoning ordinance.

This section shall not be construed as permitting an appeal of the Governing Body's denial of a rezoning request or conditional use, the appropriate remedy of which would be suit in county Superior Court.

Such appeal shall be taken with sixty (60) days, or as provided by the rules of the Governing Body, by filing with the Zoning Administrator notice of appeal specifying the grounds there of. All papers constituting the record upon which the a action appealed from was taken shall forthwith be transmitted to the Governing Body.

The Board shall select a reasonable time and place for the hearing of the appeal and give at least fifteen 15 days of public notice thereof and due notice to the parties in interest and shall render a decision on the appeal within a reasonable time.

Section 12. Simultaneous Consideration of Multiple Applications.

Petitioner may simultaneously submit multiple applications involving the same property, such as a rezoning request, conditional use, and variance. The Planning Commission and Governing Body may simultaneously hear and consider multiple applications, provided the applicable public notice and other specified requirements are met. The proper order of consideration of multiple applications shall be the rezoning request first, conditional use second, and variances(s)third. The Governing Body may consider and act upon a variance request at the same meeting as rezoning request and/or conditional use is approved, in accordance with Section 10. of this ordinance. For multiple applications, specified filing fees shall be paid for each individual application, to defray the cost of newspaper advertisements and posting of sign(s) on the subject property.

Section 13. Conditional Approval Permitted.

The letter of intent, site plan, and other information submitted as a part of any approved application for zoning map amendment, variance, appeal or conditional use, as well as any

statements of intent made by the petitioner in public meetings recorded in the minutes of the body considering the application, shall be considered a part of the approval and must be followed.

In addition to the conditions of the following the submitted site plan, letter of intent and other assurances made by the petitioner, the planning commission may be recommended, and the Governing Body may attach, any conditions to its approval which it finds necessary to render the proposed development compatible with adjacent and nearby properties and land uses.

Applications to modify the approved site plan, letter of intent, or other conditions of approval may be considered by the Governing Body after review and recommendation by the Planning Commission, without the requirement of any public hearings. Any request however, which in the opinion of Zoning Administrator constitutes a change that is tantamount to a new application that would otherwise require a rezoning, new conditional use, or variance to Articles and Sections of the zoning ordinance not previously contemplated, shall require re-submittal and reconsideration of the request as a new application that meets all submittal, notification and public hearing requirements specified in this ordinance.

Section 14. Public Notice and Public Hearing Required.

This section shall apply to all applications for amendments to the zoning ordinance, amendments to the official zoning map, petitions for variances and appeals to the Governing Body, and requests for conditional use approval. Except as otherwise noted, this Section shall apply to adoption and re-adoption of a zoning ordinance and official zoning map.

Upon receipt of a completed application, fees and other information required by this Ordinance, the Zoning Administrator shall cause notice of such application to be published at least one (1) time in a newspaper of general circulation in the community at least fifteen (15) days but not more than forty-five (45) days prior to the date of public hearing before the Governing Body. The 15 day requirement shall not apply to the public hearing before the Planning Commission. Said published notice shall include, as a minimum, the purpose, location, date and time of the public hearing, before the Planning Commission and Governing Body, the location of the property being considered, the present zoning classification of the property, and proposed action to be taken, as appropriate, (such as proposed zoning district, type of conditional use, variance to particular Articles and Sections, and so forth).

The Zoning Administrator shall also cause to have posted in a conspicuous place on said property one (1) or more sign(s), each of which shall contain the information specified for published notices. The public hearing before the Governing Body shall not take place until said have been posted for at least fifteen (15) days but not more than forty-five (45) days prior to the date of the public hearing. Post of sign(s) shall not be required for appeals, since an appeal only applies to interpretation of zoning regulations which apply to all similarly situated properties. Posting of signs shall not be required by the Governing Body when adopting or readopting a zoning ordinance and official zoning map.

Public hearings may be delayed, rescheduled or continued at another time and date, provided announcement is given at the time and place of the initially scheduled and advertised public hearing, and provided such date, time and location of the public hearing to be delayed, rescheduled or continued is announced.

Section 15. Recommendation by Zoning Administrator

The Zoning Administrator may, as appropriate, customarily submit to the recommending and/or decision making body, prior to scheduled public hearing, copies of the site plan and letter of

intent along with a written recommendation for approval, disapproval, deferral, withdrawal, or other recommendations. Said recommendations shall include reasons for said recommendations, considered within the context of the appropriate criteria as specified by this ordinance. The recommendations of the Zoning Administrator shall have an advisory effect only and shall not be binding on the Governing Body. Copies of the Zoning Administrator's recommendations shall be made available to the applicant and other interested parties upon completion and distribution to the appropriate bodies and at the public hearing.

Section 16. Planning Commission Recommendation.

Prior to the public hearing held by the Governing Body, the Planning Commission shall hold a public hearing on all applications for amendment to the text of the zoning regulations, amendments to the official zoning map, conditional use applications and variances. The Planning Commission shall also provide a recommendation regarding adoption or re-adoption of a zoning ordinance.

After completing its studies of the particular petition, the Planning Commission shall submit a recommendation action in writing to the Governing Body. The Planning Commission may submit any additional report it deems appropriate. The recommendations of the Planning Commission shall have an advisory effect only and shall not be binding on the Governing. Copies of the Planning Commission's recommendations and reports shall be made available to the applicant and other interested parties upon completion and distribution to the Governing Body and at the public hearing before the Governing Body.

The Planning Commission shall have up to sixty-five (65) days within which to submit its recommendations. The Governing Body shall not take action on any of said applications until it has received the recommendations of the Planning Commission within the specified time; provided, however, that this shall not be construed to limit the Governing Body from conducting its scheduled public hearing on the matter, should it desire to do. If the Planning Commission fails to submit a recommendation within the sixty-five (65) day period, it shall be deemed to have approved the proposed application.

Section 17. Conduct of Public Hearing.

All public hearings regarding applications considered by the Planning Commission and Governing Body shall be held in accordance with any procedures adopted by said body and, in addition, shall be governed by the following procedures:

The presiding officer shall open the hearing by stating the specific application being considered at the public hearing. At this time the presiding officer may summarize the public hearing procedures.

The Zoning Administrator or other staff may present a description of the proposed application, any applicable background material, his/her recommendation regarding action on said application as appropriate, and the recommendations and reports of the Planning Commission, as appropriate.

Persons who support the application will be asked to comment first. The petitioner may, upon recognition and upon statement of name and address, present and explain his application. The petitioner, or his designated agent, is expected to attend the public hearing unless written notice of hardship is received prior to such meeting. A time limitation may be imposed at the discretion of the presiding officer.

Persons who oppose the application or who have questions about the subject application will be asked comment next. All interested parties after being recognized shall be afforded an opportunity to address the proposed application by standing before the appropriate body and

identifying their name, address and interest along with any comments on the proposed application. A time limitation may be imposed at the discretion of the presiding officer.

The petitioner shall have an opportunity to answer any questions raised by the public, for summary remarks and rebuttal concerning the proposed application.

Upon the completion of any comments from interested parties and the petitioner, the public hearing shall be completed and adjourned.

All public comments having been heard, the members of the body considering the application may discuss the request among themselves. During this discussion period, the members of the body may call on the petitioner or other interested parties to clarify points made previously or to answer questions. Said petitioner or interested parties may respond upon recognition. Additional questions from the general public may not be asked once the public hearing has been closed. Once the public hearing is closed, and a vote or other action is being considered, unrecognized responses from the petitioner shall be ruled out of order by the presiding officer.

Section 18. Action by The Appropriate Body.

After the public hearing has been completed, the Governing Body may take action to approve or deny the request, refer the application back to the Zoning Administrator or Planning Commission for further study, or the Governing Body may table or defer action until a later meeting. In voting on a petition, the Planning Commission and Governing Body shall follow applicable bylaws for such body, or in lieu of adopted bylaws, shall generally follow "Robert's Rules of Order."

Such uses may be permitted only if approved by the Governing Body in accordance with the procedures established in this ordinance.

The location and boundaries of the above listed districts are hereby established as shown on a map entitled Official Zoning Map of the City of Clarkesville, Georgia. Said map, together with all explanatory matter thereon, is hereby adopted by reference and declared to be a part of this Ordinance.

The Official Zoning Map shall be identified by the signature of the Mayor, attested by the City Clerk, and bear the seal of the City or that of a Notary Public under the following words: "This is to certify that this is the Official Zoning Map referred to in Article IV of the Zoning Ordinance, City of Clarkesville, Georgia", together with the date of the adoption of the Ordinance. The official Zoning Map may be reproduced so that additional copies of said map may be made available, upon proper certification as described above.

If in accordance with the provisions of this Ordinance and the applicable laws of the State of Georgia, changes are made in boundaries or other matter portrayed on the Official Zoning Map, such changes shall be entered on the Official Zoning Map promptly after the amendment has been approved by the City Council, with appropriate entry or indication of such amendment on the Official Zoning Map. The formal action by the City Council to change the boundaries of the Official Zoning Map shall be sufficient to make such zoning district change effective. Upon such changes, the Zoning Administrator is authorized to enter such changes on the Official Zoning Map, and re-adoption of the said map shall not be required.

No changes of any nature shall be made in the Official Zoning Map or matter shown thereon except in conformity with the procedures set forth in this Ordinance. Any unauthorized change of whatever kind by any person or persons shall be considered a violation of this Ordinance.

Regardless of the existence of purported copies of the Official Zoning Map which may from time to time be made or published, the Official Zoning Map shall be located in the Office of the Zoning Administrator, City of Clarkesville and shall be the final authority as to the current zoning status of land and water areas, buildings, and other structures in the City.

Section 403. Replacement of Official Zoning Map.

In the event that the Official Zoning Map becomes damaged, destroyed, lost, or difficult to interpret because of the nature or number of changes and additions, the Governing Body may adopt a new Official Zoning Map which shall supersede the prior Official Zoning Map. The new Official Zoning Map may correct drafting or other errors or omissions in the prior Official Zoning Map, but no such correction shall have the effect of amending the original Official Zoning Map or any subsequent

amendment thereof. The new Official Zoning Map shall be identified by the signature of the Mayor, attested by the City Clerk, and bear the seal of the City or a Notary public under the following words:

"This is to certify that this Official Zoning Map supersedes and replaces the Official Zoning Map adopted (date of adoption of map being replaced) as part of the Zoning Ordinance of the City of Clarkesville, Georgia."

Unless the prior Official Zoning Map has been lost, or has been totally destroyed, the prior map or any significant parts thereof remaining, shall be preserved, together with all available records pertaining to its adoption or amendment.

Section 404. Interpretation of District Boundaries.

404.1 Where boundaries are indicated as approximately following the centerline of streets or highways, street right-of-way lines or railroad right-of-way lines or such lines extended, such centerline, street right-of-way lines, or railroad right-of-way lines shall be construed to be such boundaries.

404.2 Where boundaries are indicated as approximately following the corporate limit line of the city, such corporate limit line shall be construed to be such boundaries.

404.3 Where boundaries are indicated as approximately following property lines or such lines extended, such property lines or such lines extended, as indicated by boundary survey, deed or legal description maintained in the official file of said zoning adoption or amendment, if available, shall be construed to be such boundaries.

404.4 Where boundaries are indicated as approximately following the centerline of stream beds or river beds, such centerline shall be construed to be such boundaries.

404.5 In the case where the exact location of a boundary cannot be determined by the foregoing methods, the Governing Body shall, upon application, determine the location of the boundary.

Section 405. District Boundary Line Divides A Lot Of Single Ownership.

Where a boundary line as appearing on the Official Zoning Map divides a lot in single ownership at the time of the enactment of these regulations, the requirements for the district in which the greater portion of the lot lies may be extended to the balance of the lot without recourse or amendment procedure, provided that this provision shall not apply to a double frontage lot.

Section 406. Designation after Street Abandonment.

Where a public street, alley or other right-of-way is officially vacated or abandoned, the regulations applicable to the property to which it reverted shall apply to such vacated or abandoned public street, alley, or right-of-way.

ARTICLE V

NON-CONFORMING LOTS, BUILDINGS AND USES

Section 501. Purpose and Intent.

Within the districts established by this ordinance, there exist certain incompatible lots, buildings, structures, signs and uses of land which were lawful before these regulations were adopted but which would be prohibited, regulated or restricted under the terms of these regulations or future amendments.

It is the intention of this article to permit these non-conformities to continue but that non-conformities shall not be enlarged upon, expanded or extended, nor be used as grounds for variances or for adding other structures or uses prohibited elsewhere in the same district.

Section 502. Non-Conforming Lots of Record.

In any district, notwithstanding limitations imposed by other provisions of these regulations, a single-family dwelling and customary accessory buildings or any other permitted use may be erected on any single lot of record existing at the effective date of adoption or amendment of these regulations, even though such lot fails to meet the requirements for area or width, or both, applicable to the particular district involved, provided that building setbacks are observed and the lot shall otherwise conform to the regulations for the district in which the lot is located.

Except for those lots described above, if two (2) or more lots or combinations of lots and portions of lots with continuous frontage in single ownership are of record at the time of adoption or amendment of these regulations, and if all or part of the lots do not meet the requirements for lot width and area as established by these regulations, the lands involved shall be considered an undivided parcel for the purposes of these regulations, and no portion of said parcel shall be used which does not meet lot width and area requirements established by these regulations, nor shall any division of the parcel be made which leaves remaining any lot with width or area below the applicable requirements.

Section 503. Continuance of Non-Conforming Use.

The lawful use of any building, structure, sign or land existing at the time of enactment of these regulations may be continued, subject to the limitations of Section 504, even though such use does not conform to the provisions of these regulations, except that the use of a principal building, structure or land containing a non-conforming use shall not be:

503.1 Changed to another non-conforming use;

503.2 Re-established after discontinuance or abandonment for six (6) months. For purposes of this section a use shall be considered discontinued or abandoned if it has not been actively engaged in any principal non-conforming activity during the subject period;

503.3 Expanded, enlarged or extended, unless such use is changed to a use permitted in the district in which such use is located;

503.4 Rebuilt, altered or repaired after damage exceeding fifty (50%) percent of its replacement value at the time of destruction as determined by the Building Official;

503.5 Moved in whole or in part to any other portion of the lot occupied by such use, except in conformity with these regulations.

Nothing in this Article shall be deemed to prevent the strengthening or restoring to a safe condition any building, structure, or portion thereof, declared to be unsafe by an official charged with protecting the public safety or health, upon order of such official.

Changes in ownership or tenancy of a non-conforming use are permitted.

Section 504. Expansion of Non-Conforming Buildings.

A non-conforming building which contains a conforming use may be expanded, enlarged or extended, provided that any such additions meet the applicable yard and building setbacks, buffer and landscape strip requirements and all other regulations for the district in which it is located.

This section shall not, however, be construed as to authorize the expansion of a non-conforming building for a use which is not permitted by the regulations for the district within which such building is located, except as otherwise specifically authorized elsewhere in this ordinance.

Section 505. Buildings under Construction.

Nothing in this Article shall be deemed to require a change in the plans, construction, or designated use of any building on which actual construction was lawfully begun prior to the adoption of these regulations.

Section 506. Replacement of Non-Conforming Mobile/Manufactured Home Permitted.

Notwithstanding the provisions of Section 503, a non-conforming mobile home or manufactured home, whether located in a mobile/manufactured home park or on its own lot, may be replaced with another manufactured home as long as the replacement home is an upgrade (later year model) of the original home, as determined by the Zoning Administrator and comply with all design standards identified in Section 721 of this ordinance.

ARTICLE VI

OFF-STREET PARKING, LOADING AND ACCESS REQUIREMENTS

Section 601. Off-street Parking and Loading Spaces Required.

Off-street automobile parking and loading spaces shall be provided, as specified in this Article, for uses and structures hereafter established in all districts at the time of initial construction of any principal building, unless otherwise exempted from this Article. For developments phased in timing, parking and loading requirements may also be phased in accordance with the requirements applying for each particular time phase of development.

Required parking and loading spaces shall be maintained and shall not be encroached upon by refuse containers, signs or other structures, unless an equal number of spaces are provided elsewhere in conformance with these regulations.

Required parking and loading spaces shall be provided with vehicular access to a public street.

Off-street parking and loading facilities required shall be located contiguous to the principal building or use. However, as much as twenty-five (25) percent of the required number of parking spaces may be located within two hundred (200) feet of the principal building or use, provided proof of ownership of such premises is provided to the Zoning Administrator. Such distance shall be measured between the nearest point of the parking facility and the nearest point of the principal building or use.

The Zoning Administrator shall be authorized to increase or decrease the number of required parking spaces by not greater than nor less than ten percent (10%) of the required number of parking spaces. Granting of said reductions may be made upon request of the applicant after consideration of conditions that warrant such increase or decrease in the opinion of the Zoning Administrator. It shall be the responsibility of the Zoning Administrator to inform the Planning Commission and/or Governing Body of any such grant at the next regularly scheduled meeting.

Section 602. Minimum Number Of Off-street Parking Spaces Required.

The minimum number of required off-street parking spaces for each type of permitted use shall be as indicated below. For uses not specifically listed, the off-street parking requirements shall be those of the most similar use as determined by the Zoning Administrator. When the application of these parking requirements results in a fractional space requirement, the fractional space requirement shall be construed to mean one (1) additional space.

6 - 25	1
26 - 50	2

Section 604. Parking Space and Lot Design Flexibility.

Individual parking spaces shall be a minimum of 160 square feet. The angle of design for parking spaces and parking lots may be 30, 45, 60, 90 degrees or parallel to the curb, provided that sufficient maneuvering isle width is provided subject to the approval of the Zoning Administrator.

Section 605. Minimum Number Of Off-street Loading Spaces Required.

On the same lot with every new building, structure or part thereof, erected for manufacturing, storage, warehouse, truck freight terminal, goods display, department store, wholesale store, market, hotel, hospital, mortuary, laundry, dry cleaning, retail business or other uses similarly involving the receipt or distribution of vehicles, materials or merchandise, there shall be provided and maintained on the lot adequate space for the standing, loading and unloading services to avoid undue interference with public use of streets and alleys.

Such loading and unloading space, unless otherwise adequately provided for, shall be an area twelve (12) feet by sixty (60) feet, with fourteen (14) foot height clearance, and shall be provided according to the following schedule.

For the above described uses, one (1) loading space shall be provided for the first 25,000 square feet of gross floor area or fractional part thereof. Uses in excess of 25,000 square feet shall provide loading spaces according to the following schedule:

<u>SQUARE FEET</u>	<u>NUMBER OF SPACES</u>

for each additional 100,000 or fraction thereof	1 additional

All plans for off-street loading areas shall be subject to the approval of the Zoning Administrator.

Section 606. Parking and Loading Area Design Requirements.

606.1 Improvement of Parking Lots:

All parking areas containing more than five (5) spaces shall meet the following requirements:

- a. They shall be graded to insure proper drainage, and maintained in good condition free of obstructions.
- b. Parking areas shall not be used for the sale, repair, dismantling or servicing of any vehicle, equipment, materials or supplies.
- c. Each parking space shall be clearly marked, and directional arrows or signs shall be provided wherever necessary. Markers, directional arrows and signs shall be properly maintained at all times.
- d. A parking area setback of ten (10) feet from any public street right-of-way and five (5) feet from any exterior property line shall be provided, except where access points and interconnections to other parcels have been approved. The parking area setback shall be increased to twenty-five (25) feet where such lot abuts a residential district. Concrete or other suitable curb stops shall be installed so as to prevent vehicle encroachment onto setback areas.
- e. Parking lot landscaping shall consist of a minimum of 7% of the parking lot area plus one tree for each seven parking spaces. The tree species shall be an appropriate large canopied shade tree with a minimum of 3" caliper and shall be selected from the Clarkesville Native Plant List (see Section 2007). The landscaped area shall be planted with shrubs and/or groundcover to assure 80% coverage of the ground within five years. Landscaped area shall be evenly distributed throughout the parking area and parking perimeter at the required ratio.
- f. Any lighting facilities installed shall be so arranged to prevent the direct illumination of adjacent residential properties or public streets.

A site plan indicating property lines, parking areas, location of parking spaces, parking lot area set backs, drainage facilities, access and other features required to ensure compliance with this Article shall be submitted to the Zoning Administrator. A permit shall be required prior to the construction of new parking areas, or for the expansion or alteration of existing parking areas.

When adjacent to any public right-of-way, parking lots shall also incorporate a buffer that consists of a sight-obscuring landscaped screen that shall reach a height of 36 inches above the finished grade of the parking area, except for required vision clearance zones. The screen may be

achieved by a combination of earth mounding and plant materials. The buffer shall be included as part of the parking lot landscaping requirements.

606.2 Curb Cut and Access Specifications:

Access from public streets to all parking areas, regardless of the number of parking spaces provided, shall meet the following requirements:

- a. Curb cuts or access breaks for service drives, entrances and exits on public streets shall not be located within fifty (50) feet of the intersections of two (2) curb lines, street pavement lines or such lines extended or any street intersection nor within forty (40) feet of another curb cut or access break on the same side of the street.
- b. Curb cuts shall be no greater than forty (40) feet in width and no closer than twenty-five (25) feet to any property line, unless common use of driveways for an abutting lot is required or approved by the City Engineer.
- c. No more than two (2) curb cuts or access breaks shall be permitted for any lot or parcel with a frontage of two hundred (200) feet or less on any one (1) street.
- d. All curb cuts or access breaks onto public streets, except for those serving single-family detached residences, shall require a permit from the Zoning Administrator.
- e. Curb cuts for driveways that serve commercial, office or industrial zoning districts shall not be permitted to pass through residential zoning districts or to access alleys that abut a residential zoning district.
- f. Where the side of an accessed public street or alley does not contain curbing, such curbing or other method of approved access control shall be provided.

Section 607. Parking Areas Must Be Appropriately Zoned.

Parking areas, parking lots or parking garages which constitute the principal use of a lot shall only be permitted in INS, DB, CB, HB and M-1 zoning districts. In cases where parking areas, parking lots or parking garages exist or are proposed to serve as accessory parking for a particular building or use, regardless of whether such parking is required by this Article, such land, area or lot, including all access drives, shall require the same or less restrictive zoning district as that within which such building or use it serves is located. Similarly, in cases where accessory parking serves a building or use which requires, or was approved as, a conditional use, such parking area and access drives shall require the same conditional use approval as that for which such conditional use or building it serves.

Section 608. Parking Space Requirement Not Specified.

Where the parking requirement for a particular use is not described in this chapter, and where no similar use is listed, the Zoning Administrator shall determine the number of spaces to be provided based on requirements for similar uses, location of the proposed use, the number of employees on the largest shift, and the expected demand and traffic generated by the proposed use.

Section 609. Required Parking for Multiple Uses.

When a building includes a combination of uses, the required number of parking spaces shall be the sum of the required parking for each use, when the multiple uses operate simultaneously. For non-simultaneous use, the parking requirements for the use requiring the greater number of parking spaces will govern.

Section 610. Reduction of Required Parking for Mixed or Joint Use of Parking Spaces.

The Zoning Administrator may authorize a reduction in the total number of required off-street parking spaces for two or more uses jointly providing parking facilities when their respective hours of need of maximum parking do not normally overlap, provided that the developer submits sufficient data

to demonstrate that the hours of maximum demand for parking at the respective uses do not normally overlap.

Section 611. Reduction of Required Parking for Alternative Transportation Arrangements.

The Zoning Administrator may in individual cases administratively authorize a reduction in the minimum number of parking spaces for projects that are directly served by public transit and for projects that provide bicycle parking, provided that it can be shown that such available alternative travel modes will reduce the overall need for parking on the site proportional to the requested reduction in parking spaces.

Section 612. Reduction of Required Parking When On-Street Parking is Permitted.

The Zoning Administrator may in individual cases administratively authorize a reduction in the minimum number of parking spaces for projects that are directly served by on-street parking approved by the City Engineer.

Section 613. Parking Maximums.

To avoid excessive surpluses which increase development costs and impervious surfaces, parking shall not be provided in quantities greater than twenty-five percent (25%) above the required minimum; provided, however, the following:

The Zoning Administrator may allow parking at a rate greater than the twenty-five percent (25%) of the minimum required parking spaces, on a case-by-case basis, based upon the scale and impacts of the request, for good cause shown. The applicant shall make said request in writing which shall include documentation from an acceptable industry publication (e.g. Institute of Transportation Engineers, Urban Land Institute, American Planning Association, etc.) or by a study prepared by a traffic engineering firm that documents parking requirements.

The Zoning Administrator may allow a land area for parking that exceeds twenty-five percent (25%) of the above required number of parking spaces to be designed and reserved for future parking use. In such case, said reserved parking area shall not be developed except by written permission from the Zoning Administrator and only after demonstration by the applicant that: (1) existing parking spaces are occupied at a rate of ninety percent (90%) or higher for twenty-five percent (25%) or more of the regular business hours in which the business or use is operated during a non-holiday week; (2) additional parking areas will be constructed of well-known permeable and pervious materials and design.

Section 614. Limited Waiver of Parking Requirement in DB District.

Parking requirements for uses allowed within the DB District, where there are setback requirements and where there is no or very limited private parking, but there is available some municipal parking, may be reduced or waived only after review and recommendation of the Zoning Administrator and approval of the City Council.

ARTICLE VII GENERAL PROVISIONS

Outdoor watering for purposes of planting, growing, managing, or maintaining ground cover, trees, shrubs, or other plants may occur only between the hours of 4:00 p.m. and 10:00 a.m.; provided, however, that this limitation shall not create any limitation upon the following outdoor water uses:

Sec. 100-3. Repealer.

All ordinances or parts of ordinances in conflict with this ordinance are repealed.

Sec. 100-4. Effective Date. This ordinance shall go into effect on January 1, 2011.

No building, structure, land, open space or water shall hereafter be used or occupied and no building or structure or part thereof shall hereafter be erected, constructed, reconstructed, moved, structurally altered or maintained, and no new use or change shall be made or maintained of any building, structure, land, open space or water, unless in conformity with all the regulations herein specified for the district in which it is located.

Within each district, the regulations set forth shall be minimum requirements and shall apply uniformly to each class or kind of building, structure or land.

Section 703. Height Limitations.

No building or structure shall hereafter be erected, constructed, reconstructed, or altered, except as otherwise specifically exempted in this Article, to exceed the maximum height for the district in which said building or structure is located; provided, however, that the Governing Body may permit buildings and structures to exceed height limitations upon approval of a conditional use as specified in these regulations.

Section 706. Reduction In Lot Size Prohibited.

No lot shall be reduced, divided or changed in size so that lot width, size of yards, lot area per dwelling unit or any other requirement of these regulations is not maintained, unless said reduction or division is necessary to provide land which is acquired for a public purpose.

Section 707. Annexation.

Any land area subsequently added to the incorporated area of Clarkesville shall automatically be classified R-1 (Single-Family Residential District) until or unless otherwise classified by amendment to the Official Zoning Map. Within sixty (60) days after the date of annexation approval, the Planning Commission shall, after public hearing, recommend to the Governing Body a zoning classification for each newly annexed area which will carry out the objectives of the Comprehensive Plan. Upon such recommendation by the Planning Commission, for an amendment to the Official Zoning Map as related to the subject property the Governing Body may act in accordance with normal procedures specified in these regulations to assign a different zoning district to the property.

Section 708. Street Frontage Requirement.

No building or structure shall hereafter be erected on a lot, and no lot shall be subdivided, that does not abut for at least thirty (30) feet on a public street, except as provided for non-conforming lots in Article V.

Accessory buildings and uses shall be permitted only if they meet the following:

1. Accessory buildings and uses shall be setback a minimum of ten (10) feet from any lot line.
2. Where a building housing an accessory use is structurally attached to the principal building, it shall be subject to and must conform to all regulations applicable to the principal building and shall not be considered an accessory building.
3. In the case of double frontage lots, accessory buildings shall observe front yard requirements on both streets.

Section 1901. Purpose and Intent.

The Light Industrial District is established with the purpose of reserving certain areas with relatively level topography, adequate water and sewerage facilities, and access to arterial streets for industrial operations, but where the proximity of Light Industrial Districts to residential and other districts makes it desirable to limit industrial operations to those that are not objectionable by reason of the emission of noise, vibration, smoke, dust, gas, fumes, odors or radiation and that do not create fire or explosion hazards or other objectionable conditions. Such objectionable uses may be permitted as conditional uses. Section 2213. Architectural Guidelines for New Construction and Renovations/Rehabilitations

(Amended 03/05/2012)

Architectural Guidelines for New Construction and Exterior Renovation of Existing Structures

The following are offered as guidelines, only, for reviewing new construction proposed within the Overlay Zone. A design that does not conform to these guidelines can be approved if the Commission determines that the design is in keeping with the overall intent of the Overlay Zone. The purpose of guidelines is to insure that new construction is compatible with the historic character of the City of Clarksville.

Section 2213.1 Intent and Purpose

- A. The purpose of this section is to provide information that will assist the community, property owners, design professionals and public officials in regards to proposed new buildings and the remodeling/renovation of existing buildings within the Clarkesville Preservation District (CPD).
- B. It is intended to supplement the base zoning regulations, by establishing guidelines that address quality improvements in the form of new buildings and remodeling/renovation of existing buildings. Focus is on historic preservation while at the same time taking into account the more modern and up-to-date building codes and building materials. The goal is to maintain a sense of community and historic significance without putting an unreasonable burden upon a property owner/developer.
- C. Reference is hereby made to the current edition of the Clarkesville Better Hometown Design Committee Design Guidelines as a further source of aid to building owners and design professionals.

Section 2213.2 Interpretation and Applications

- A. The Clarkesville Preservation District is as defined in Article XXII, section 2201.
- B. Review Procedure: In addition to the submittal guidelines as set forth in article XXII, Section 2206, elevation drawings of the proposed building are to be included. The elevation drawings are to clearly delineate all materials and colors that are being proposed. The developers and/or design professional shall schedule a meeting with the Zoning Administrator to review the guidelines and to determine a date to review the submittal with the Planning Commission. Plans will not be reviewed for a building permit until the Planning Commission has approved the proposal.

Section 2213.3 Architectural Standards within the Clarkesville Preservation District

The dominant (i.e. primary) materials shall comprise a minimum of sixty percent (60%) of first floor elevation.
2. Exterior Building Materials.
 - a. Primary materials. The primary materials for exterior wall surfaces shall be brick, stone, hardy plank, wood siding or glass.
 - b. Secondary materials. Secondary materials may be used for up to 40% of the exterior wall surfaces and can be used to account for 100% of the exterior wall that is not considered to be a façade per the requirements of this ordinance. Acceptable secondary materials include all allowed primary materials identified above, as well as stucco, textured block, and wood or hardy plank shingles.
 - c. Prohibited materials. Exposed concrete block (untextured), corrugated metal, plywood, precast concrete "T's," synthetic stucco and vinyl or aluminum siding are prohibited.

(B) Architectural Features

1. Height & Square Footage.

- a. Building heights shall be a minimum of 18 feet and a maximum of 50 feet above the adjacent primary road grade. 	<u>Ground Floor</u>	<u>Upper Floors</u>
Commercial Uses	30%	30%
Residential Uses	Per existing Building codes

- b. Mercury vapor lighting sources and general flood lighting of building exteriors is prohibited.
- c. Existing fixtures of historical significance, if present, shall be preserved and repaired whenever possible.

Section 2806. Special Subdivisions.

I. Conservation subdivision design option.

A. *Purpose and intent.* This section is intended to allow for the development of conservation subdivisions that cluster development and provide for preservation of open space, as an alternative to conventional subdivision development. This section is specifically intended:

1. To provide for the preservation of greenspace as a nonstructural stormwater runoff and watershed protection measure;
2. To provide a residential development option that permits flexibility of design in order to promote environmentally sensitive and efficient uses of the land;
3. To preserve in perpetuity unique or sensitive natural resources such as groundwater, floodplains, wetlands, streams, steep slopes, woodlands and wildlife habitat;
4. To permit clustering of houses and structures on less environmentally sensitive soils which will reduce the amount of infrastructure, including paved surfaces and utility easements, necessary for residential development;
5. To reduce erosion and sedimentation by minimizing land disturbance and removal of vegetation in residential development;
6. To promote interconnected greenways and corridors throughout the community;
7. To promote contiguous greenspace with adjacent jurisdictions;
8. To encourage interaction in the community by clustering houses and orienting them closer to the street, providing public gathering places and encouraging use of parks and community facilities as focal points in the neighborhood;
9. To encourage street designs that reduces traffic speeds and reliance on main arteries;

10. To promote construction of convenient landscaped walking trails and bike paths both within the subdivision and connected to neighboring communities, businesses, and facilities to reduce reliance on automobiles;
11. To conserve scenic views and reduce perceived density by maximizing the number of houses with direct access to and views of open space; and
12. To preserve important historic and archaeological sites.

B. *General regulations.*

1. *Applicability of regulations.* This design option is available as an alternative for the development of subdivisions that are served by public sewer or an approved private sewer system, as permitted by right in the LI, MI and HI districts. The applicant shall comply with all other provisions of the comprehensive land development resolution and all other applicable laws.
2. *Ownership of development site.* The tract of land to be subdivided may be held in single and separate ownership or in multiple ownership. If held in multiple ownership, however, the site shall be developed according to a single plan with common authority and common responsibility.
3. *Housing density determination.* The maximum number of lots in the conservation subdivision shall be determined by development of a "Yield Plan". In a "Yield Plan", a conventional subdivision design plan is prepared by the applicant, in which the tract of land is subdivided in a manner intended to yield the highest number of lots possible. The plan does not have to meet formal requirements for a site plan, but the design must be capable of being constructed given site features and the comprehensive land development resolution and all other applicable laws.
4. *Minimum lot size.* Once the maximum number of lots is determined through development of the "Yield Plan", a conservation subdivision layout is developed by meeting the requirements of this section. The minimum lot size in a conservation subdivision shall be 10,000 square feet or the area necessary to accommodate required water and waste disposal systems.

C. *Application requirements.*

1. *Site analysis map required.* Concurrent with the submission of a preliminary plat, the applicant shall prepare and submit a site analysis map. The purpose of the site analysis map is to ensure that the important site features have been adequately identified prior to the creation of the site design and that the proposed open space will meet the requirements of this section. The site analysis map shall include the following features:
 - (a) Property boundaries;
 - (b) All streams, rivers, lakes, wetlands and other hydrologic features;
 - (c) Topographic contours of no less than five-foot intervals for hilly terrain (slopes greater than ten percent), two foot intervals for rolling terrain (two percent to ten percent), and one foot for flat terrain (slopes less than two percent) as referenced in the comprehensive land development resolution;
 - (d) All primary and secondary conservation areas labeled by type, as described in this section;
 - (e) General vegetation characteristics;
 - (f) General soil types;

- (g) The planned location of protected open space;
- (h) Existing roads and structures; and
- (i) Potential connections with existing greenspace and trails.

2. *Open space management plan required.* An open space management plan, as described in this section shall be prepared and submitted prior to the issuance of a land disturbance permit.

3. *Instrument of permanent protection required.* An instrument of permanent protection, such as a conservation easement or permanent restrictive covenant, as described in this section shall be placed on the open space concurrent with the issuance of a land disturbance permit.

4. *Other requirements.* The applicant shall adhere to all other applicable requirements of the underlying zoning, the land development resolution, and all other applicable provisions of the Zoning Ordinance of the City of Clarkesville, Georgia.

5. The configuration and location of the subdivision and the proposed open space are subject to approval of the planning commission and the governing body, to ensure that the purposes and intent of this section are met by the application.

Large areas of impervious surface shall be excluded from the open space.

(e) At least 75 percent of the open space shall be in a contiguous tract. The open space should adjoin any neighboring areas of open space, other protected areas, and non-protected natural areas that would be candidates for inclusion as part of a future area of protected open space.

(f) The open space shall be directly accessible to the largest practicable number of lots within the subdivision. Non-adjoining lots shall be provided with safe, convenient access to the open space.

Section 2808. Preliminary plat specifications and improvement guarantees.

The preliminary plat shall conform to the specifications contained in Appendix B.

1. **IMPROVEMENT GUARANTEES.** In order to protect the City and prospective purchasers of and residents in a subdivision, the Developer shall provide to the City one of the following financial securities to guarantee the installation of infrastructure and public improvements.
 - a. An irrevocable letter of commitment or credit upon which the City can draw;
 - b. A performance bond for the benefit of the City upon which the City can collect;
 - c. A Certificate of Deposit with assignment letter to the City; or
 - d. Any other form of guarantee approved by the City that will satisfy the objectives of this section.The guarantee shall be in an amount to secure the full costs of completion of the infrastructure improvements as prepared by a professional engineer licensed as such in the State of Georgia, retained by Developer, certified by such engineer to be a fair and reasonable estimate of such cost and agreed upon as such by the City's engineer. Irrespective of the above, the City may establish the amount of financial guarantee required based upon the recommendation of the City engineer.
2. **PROJECT COMPLETION.** Construction of infrastructure and public improvements must begin within sixty (60) days of issuance of the Building Permit and must be completed within twelve (12) months of issuance of the Building Permit. Failure to meet these dates will render the Building Permit null and void and no construction activity may commence until Developer obtains a new Building Permit.
3. **STORM WATER MANAGEMENT.** Developer agrees and promises to comply with all regulations, approvals, and specifications and Acts promulgated by the United States of America, the State of Georgia and the City with regard to storm water management.
4. **EROSION AND SEDIMENTATION CONTROLS.** All erosion and sedimentation controls will be installed in accordance with the approved plan as attached in Exhibit A prior to any other construction activities occurring at the Development. The erosion and sedimentation controls will be properly maintained throughout the duration of the development until all disturbed areas have been stabilized to the satisfaction of the City.
5. **CONSTRUCTION OF IMPROVEMENTS.** Developer will in accordance with appropriate subdivision and land development ordinances and regulations install all utilities including sewer, water, gas, electric, telephone, cable TV, if available and such other utilities to service the development. Developer agrees to build, construct, and install all improvements including, but not limited to, paving, grading, roads, storm water facilities, sidewalks, landscaping and lighting in accordance with the provisions adopted by Resolution and Ordinance or accepted as commonly used guidelines or provisions of the City in effect at the time of preliminary plat approval. All improvements in the development will be constructed and installed in accordance with City specifications and Ordinances and must be certified as such by the City.
6. **INFILTRATION OF SEWER SYSTEM.** Developer agrees that no storm water, roof run-off, drainage or the like will infiltrate the sanitary sewer system servicing the development. Violation of this agreement will result in the immediate automatic revocation of any and all approvals and permits covering the development. Reinstatement of said permits and approvals may be granted by the City when Developer has sufficient guarantee to protect City from any and all fines for infiltration of storm water.
7. **HOURS OF OPERATION.** Developer will not permit any grading, construction or other physical work to be conducted on the site between the hours of 7:00 p.m. and 6:00 a.m. without written permission from the City.
8. **POLICE AREA.** During construction Developer will police the construction area daily keeping the area free and clear of all rubbish, refuse, brush, debris, and discarded building materials so as not to create a public nuisance. Developer may accumulate such materials in the area approved by the City until such time as

accumulated matters are removed from site by Developer, provided that the City, in its sole discretion, may require removal of any such material by written communication indicating the reasons therefore at any time during development. Developer will remove from site and dispose all rubbish, refuse, brush, debris, and discarded building materials leaving the development free and clear of the same prior to the release of any financial security or final acceptance of any public improvements.

9. **INSPECTIONS.** Developer hereby specifically grants permission to the City of Clarkesville, its supervisors, employees, agents, contractors, or consultants to conduct inspections on its property. These inspections may take place at any time and with any frequency as the City deems appropriate and necessary under the circumstances.
10. **INSURANCE.** Developer will cause its contractors and/or subcontractors to obtain and maintain liability and other insurance coverage and agrees to furnish certificates of such insurance as may be reasonably required from time to time by the City. The City states that its current requirements for insurance are \$1,000,000.00 for liability or casualty per occurrence, and \$2,000,000.00 in the aggregate.
11. **INDEMNIFICATION.** Developer shall indemnify and hold the City harmless from and against any and all losses, costs, damages, expenses, or claims (including, without limitation, and all reasonable attorney's fees and expenses of litigation actually incurred) arising from or out of Developer's: 1) construction or maintenance of the Development or any portion thereof; 2) failure to construct or maintain the Development or any portion thereof; or 3) improper construction or maintenance of the Development or any portion thereof.

Section 2809. Preliminary plat review.

- (a) The administrative officer or their designee shall check the plat for compliance with these and other relevant county regulations and ordinances and report findings and recommendations to the CPC in public session.
- (b) No preliminary plat shall be reviewed by CPC except in public session and advertised as required by Section 2807. Such sessions or hearings must be held at least monthly and are generally held on the second Tuesday of each month. The administrative officer is not empowered to act or speak for the CPC in approving or disapproving preliminary plat requests. Not less than five days before the public hearing a notice of the time and place of the hearing shall be sent by the administrative officer via registered or certified mail to the person designated in the letter requesting preliminary plat review. If personal telephone contact between these parties can be made before the five-day requirement, only regular mail follow-up is required.
- (c) CPC shall not review the preliminary plat or hear public comments unless the applicant or a designated representative with written authorization is present at the hearing. If the applicant or approved representative is not in attendance, the 60 day requirement in subsection (f) below is automatically waived for an additional 61 days.
- (d) After conducting the public hearing as specified in subsection 2807(b) (11), the CPC shall make one of the following decisions which shall be recorded in the minutes:
 1. Approve the preliminary plat.
 2. Approve the preliminary plat on condition that necessary modifications be made. Such required modifications must be recorded on the plat and in the minutes.
 3. Disapprove the preliminary plat.

(e) If the CPC approves the preliminary plat, it shall be noted by a certificate of preliminary plat approval (See Appendix A, Form 1) inscribed on two copies of the preliminary plat and distributed as follows:

1. One annotated copy of the plat shall be returned to the subdivider or agent;
2. One copy permanently filed in CPC records.

(f) Plats not acted on by CPC within 60 days of request for approval shall be deemed approved by the CPC. If, however, CPC determines that additional time is required to study a preliminary plat, an extension of time shall be requested in writing from the subdivider, who may agree to a specific time extension in lieu of a denial.

Section 2810. Parameters of preliminary plat approval.

(a) All preliminary plat approvals shall be limited by these qualifications:

1. The approval is a tentative approval only, pending submission of a final plat.
2. The preliminary plat approval is valid for one year from the date of approval and shall be null and void after that date.
3. If final plat approval is not received before the expiration of the preliminary plat approval a new preliminary plat application shall be required. *Exception:* One extension of the preliminary plat approval may be granted when requested as follows:
 - i. In writing prior to the expiration of the preliminary plat approval and
 - ii. Must be filed with the planning department.
 - iii. The developer shall have the burden of proof and/or justification of a need for the extension.

(b) Preliminary plat approval does not constitute authorization for subdivider to begin physical improvement to the property being subdivided, but rather the authority to:

1. Prepare and submit road and infrastructure construction plans and
2. Erosion and sedimentation plans for approval and
3. To request land disturbance permit(s) and
4. Prepare and submit stormwater management plans for approval.

(c) Major changes to preliminary plats necessitate that the plat be resubmitted to the planning commission for review and approval. No final plat will be approved that does not substantially comply to the approved preliminary plat. Major changes would be changing the street configuration, location of uses, number of lots, and similar changes.

Section 2811. Land disturbance permit application.

The land disturbance permit application shall conform to and meet the specifications contained in Article XXVIII of this ordinance.

Section 2812. Final plat specifications.

The final plat shall conform to and meet the specifications contained in appendix B and contain the following:

- (a) A surveyor's certification, directly on the final plat. See appendix A, Form 4.
- (b) An owner's certification, directly on the final plat. See appendix A, Form 5.
- (c) Certificate of dedication. See appendix B.
- (d) A certificate of approval of the final plat by the planning commission, directly on the plat, see appendix A, Form 3.
- (e) *Copy of official action of governing body.* A copy of the resolution adopted by the governing body accepting the streets, improvements, easements and any other property dedicated by the owner for public use as indicated on the final plat, shall be attached to the final plat within 45 days after action by the governing body.

Section 2813. Final plat review and approval.

- (a) The planning department staff shall check the plat for conformance with the approved/conditionally approved preliminary plat and for compliance with this and other relevant county regulations and ordinances and report their findings with their recommendation to the Clarkesville Planning Commission in public session. The planning department, upon review of the final plat, shall notify the applicant of any comment that needs to be addressed no later than ten working days prior to the next scheduled planning commission meeting. Each comment shall be referenced to the applicable section of code being commented upon.
- (b) No final plat shall be acted upon by the Clarkesville Planning Commission except in public session. Such sessions or hearings must be held at least monthly and are generally held on the second Tuesday of each month. The administrative officer is not empowered to act or speak for the Clarkesville Planning Commission in approving or disapproving final plat requests.
- (c) Not less than five days before the public hearing, notice of the time and place of the hearing shall be sent by the administrative officer via registered or certified mail to the person designated in the request for final plat approval or if personal contact between these parties can be made by telephone before the five-day requirement, only regular mail follow-up is required.
- (d) The City of Clarkesville Planning Commission shall take no action on a final plat if the applicant or a designated representative is not present at the hearing, in which case the 45-day requirement in subsection (g) below is automatically waived for 46 days.
- (e) At a public hearing, conducted under the procedures of subsection 2807(B) (11), within 45 days of request for final plat approval, the Clarkesville Planning Commission shall take one of the following actions which shall be recorded, with reasons for disapproval where appropriate, in the minutes:
 - 1. Approve the final plat.
 - 2. Disapprove the final plat and further notify the subdivider in writing of the specific reasons for disapproval within five days.
- (f) In order for the Clarkesville Planning Commission to approve a final plat, all requirements of these regulations must have been satisfied, and all improvements required must have been completed not less than five workdays prior to the scheduled hearing at which final plat approval is requested. All improvements shall be inspected by CPC. No final plat will be approved that does not substantially comply to the approved preliminary plat.

(g) Plats not acted on by the Clarkesville Planning Commission within 45 days of a request for approval, shall be deemed approved and a certificate of final plat approval shall be issued on request of the subdivider. If, however, the The City of Clarkesville Planning Commission determines that additional time is required to study a final plat, an extension of time shall be requested in writing from the, applicant or their duly authorized agent who may agree to a specific time extension in lieu of a plat disapproval.

(h) If final plat approval is requested two times and is denied both times because required improvements have not been made, the Clarkesville Planning Commission shall not further consider that plat for 90 days following date of the second disapproval.

(i) When all conditions for approval of the final plat have been met and such approval has been granted, the Clarkesville Planning Commission shall endorse and date the certificate of final plat approval on the original copy of the final plat. Such approval and endorsement convey the authority to record the plat and to sell lots shown on the plat.

(j) Upon approval of a final plat, the chairman of the planning commission or a designated representative shall have the final plat recorded in the office of the Clerk of the Superior Court of Habersham County. The subdivider shall be responsible for the payment of the recording fee at the time of submitting the final plat.

Section 2814. Reserved.

Section 2815. General design and other requirements.

(a) *Suitability of the land.* Land subject to flooding, improper drainage, or erosion or that is for topographical or other reasons unsuitable for residential use that will contribute to danger to health, safety, or property destruction, unless the hazards can be and are corrected. No land determined to fall in a 25-year flood plain identified by state or federal authority shall be approved for any building site. All land falling into the 100-year flood zone must be so identified on the preliminary and final plats.

(b) *Name of subdivision.* The name of the subdivision must have approval of the planning commission. The name shall not duplicate or closely approximate the name of an existing subdivision in the county.

(c) *Conformance to adopted major thoroughfare and other plans.* All streets and other features of the major thoroughfare plan of Habersham County, Georgia, shall be platted by the subdivider in the location and to the dimension indicated on the major thoroughfare plan. When features of other plans such as schools or public building sites, parks, or other land for public uses are located in whole or in part in a land subdivision, such features shall be either dedicated or reserved by the subdivider for acceptance or acquisition within a reasonable time by the appropriate public agency. Whenever a plat proposes the dedication of land to public use that the planning commission finds not required or suitable for such public use, the planning commission shall refuse to approve the plat, and shall notify the governing body of the reasons for such action.

(d) *Special easements.* Easements having a minimum width of 12 feet and located along the side or rear lot lines shall be provided, as required for utility lines, underground mains, and cables. Where a watercourse, drainageway, channel or stream traverses a subdivision, there shall be provided a storm-water or drainage right-of-way of adequate width, parallel to streets. When suitable road shoulder slopes cannot be obtained within prescribed road right-of-way widths, slope easements shall be required on abutting lots.

Section 2816. Reservation of public sites and open spaces.

(a) Where the features of the comprehensive plan, such as school sites, parks, playgrounds and other public spaces are located in whole or in part in a proposed subdivision, such features shall be reserved by the subdivider, provided, however, that no more than ten percent of the total area of the subdivision shall be required for reservation to fulfill the requirements of this section. Whenever the land required for such planned features is not dedicated to and accepted, purchased, acquired, optioned, or condemned by the appropriate public agency within a two-year period from the date of recording the subdivision plat or by the time that at least 75 percent of the lots are built on and occupied, whichever is sooner, the subdivider may claim the original reservation and cause it to be subdivided in a manner suitable to the subdivider, subject to the provisions of this appendix. Whenever the public body responsible for land acquisition executes a written release stating that the reserved land is not to be acquired, the planning commission shall waive the reservation requirements. When a development is of such size or of a nature which will have a significant impact on community facilities, the dedication of an appropriate amount of land to meet such needs may be required by the planning commission.

(b) Whenever the planning commission finds that proposed reservation of land or dedication of land for public use is not required or suitable for such public use it may require the rearrangement of lots to include such land.

(c) In all subdivisions due regard shall be shown for all natural features such as large trees, and water courses, as well as for historical sites and similar community assets. These, when preserved, will add attractiveness and value to the property or community.

Section 2817. Design standards for blocks and lots.

(a) *Block lengths and widths.* Block lengths and widths shall be as follows:

1. Blocks shall be no greater than 1,800 feet nor less than 600 feet in length, except in unusual circumstances.
2. Blocks shall be wide enough to allow two tiers of lots, except where fronting on arterial, limited access highways, or railroads, or prevented by topographical conditions or size of property. In these cases the planning commission may approve a single tier of lots of minimum depth (see section 2819) to include a buffer zone.

(b) *Lot sizes and proportions.*

1. Residential lots shall meet the lot width and lot area requirements in Articles X through XIII as applied to the zoning of the subdivision.

(c) Commercial and industrial lots shall be adequate to provide service areas and off-street parking suitable to use intended.

(d) Residential corner lots shall have adequate width to meet building setback requirements from both abutting streets.

(e) *Adequate building sites.* Each lot shall contain an adequate building site not subject to flooding and outside the limits of any existing easements, buffers or building setback lines required by this appendix.

(f) *Lot line arrangements.* When practical, side lot lines shall be at right angles to straight street lines or radial to curved street lines.

(g) *Panhandle or flag lots.* "Panhandle" or "flag" lots, of required width and area may be allowed where terrain or geometry makes standard design or frontage impossible or impractical. Where such lots are allowed, the street frontage of each panhandle access shall not be less than 60 feet wide, and

the panhandle access shall be not more than 200 feet long. The lot shall conform to all other lot standards of this appendix. Not more than two such panhandle access points shall abut each other. All such access points or combinations thereof shall be separated from each other by the frontage of a standard lot required under the other provisions of this appendix.

(h) *Building setback lines.*

1. Building setback lines shall be indicated on each plat as set forth in Articles X through XIII of this Ordinance. Corner lot setbacks shall conform to each right-of-way on which the lot fronts.
2. In the case of electric transmission lines where easement widths are not definitely established there shall be a minimum building setback line from the center of the transmission line as follows:

Voltage of Line	Minimum Building Setback
46KV - 115 KV	50 feet
116KV and over	75 feet

(i) *Double frontage lots.* Double frontage lots should be avoided except where essential to provide separation of residential development from major traffic arteries or to overcome specific disadvantages of topography and orientation. A planting screen easement of at least ten feet, and across which there shall be no right of access, shall be provided along the line of lots abutting such a traffic artery or other disadvantageous use.

Section 2818. Requirements for streets and other rights-of-way.

- (a) *Continuation of existing streets.* Existing streets shall be continued at the same or greater width, but in no case less than the required width.
- (b) *Street names.* Proposed streets that are obviously in alignment with others already existing and named, shall bear the names of existing streets. In no case shall the name for proposed streets duplicate existing street names, regardless of the use of the suffix street, avenue, boulevard, drive, place, way, or court. Through its index list of street names on file the planning commission can assist the subdivider in avoiding duplication.
- (c) *Street jogs.* Street jogs with centerline offsets of less than 125 feet shall not be permitted.
- (d) *Cul-de-sacs or dead-end streets.*
 1. Minor streets or courts designed to have one end permanently closed shall serve no more than 25 lots per block and have a turn-around or cross street every 1,000 feet unless necessitated by topography. They shall be provided with a turnaround at the closed end.
 2. Where in the opinion of the platting authorities, it is desirable to provide street access to adjoining property, streets shall be extended to the boundary of such property and provided with a temporary turnaround.
- (e) *Single entry road restriction.* In no case shall more than 50 lots in any subdivision be dependent on a single road or interval of road for entry/exit to/from the subdivision.

Section 2819. Development along major thoroughfares, limited access highway or railroad right-of-way.

(a) Lots shall have no access to an arterial road or limited access highway but only to rural minor access or residential streets. Where a subdivision abuts or contains an arterial, a limited access highway or a railroad right-of-way, the platting authorities shall require street approximately parallel to and on each side of such right-of-way either as a marginal access street or at a distance suitable for an appropriate use of the intervening land, with a ten-foot non-access reservation suitably planted. Due regard should be given requirements for approach grades and future grade separations in determining distances

(b) *Alleys.* Alleys may be required at the rear of all lots used for multi-family, commercial, or industrial developments but shall not be provided in one and two family residential developments unless the subdivider provides evidence satisfactory to the platting authorities of the need for alleys.

(c) *Street right-of-way and roadway pavement widths.* The right-of-way width shall be the distance across a street from property line to property line. All subdivision streets, public or private, shall be platted as right-of-way streets. Lots shall not include any portion of the right-of-way. All streets shall be evaluated according to performance within specific site requirements or limitations. No street shall be platted on the basis of a private easement.

(d) Minimum street right-of-way widths shall be as follows:

1. *Rural minor and urban residential.*

Right-of-way	Minimum of 60 feet
Turnarounds (Cul-de-sacs)	100 feet in diameter (50-foot radius)
Roadbed	Minimum of 28 feet (pavement width plus shoulder width)
Turnarounds (Cul-de-sacs)	88 feet in diameter (Pavement width plus shoulder width)
Pavement	Minimum of 20 feet
Turnarounds (Cul-de-sacs)	80 feet in diameter (40-foot radius)

2. *Within curb and gutter subdivisions.*

Right-of-way	Minimum of 60 feet
Turnarounds (Cul-de-sacs)	100 feet in diameter (50-foot radius)
Roadbed	Minimum of 24 feet (pavement width plus shoulder width)
Turnarounds (Cul-de-sacs)	84 feet in diameter (Pavement width plus shoulder width)
Pavement	Minimum of 20 feet
Turnarounds (Cul-de-sacs)	80 feet in diameter (40-foot radius)

3. *Collectors and rural major.*

Right-of-way	Minimum of 80 feet
Roadbed	Minimum of 30 feet (Pavement plus shoulder width)
Pavement	Minimum of 22 feet

4. *Rural arterial system.*

Right-of-way	Minimum of 80--150 feet, depending on traffic conditions to be reviewed at time of development application
--------------	--

Roadbed	Minimum of 38 feet (Pavement plus shoulder width)
Pavement	Minimum of 28 feet

5. *Alleys, 16 feet right-of-way.*

6. *One-way streets.*

Right-of-way	30 feet
Roadbed	22 feet
Pavement	Width 14 feet

(e) *Additional width on existing streets.* Subdivisions that adjoin existing streets shall dedicate or reserve right-of-way to meet the above minimum street width requirements.

1. The entire right-of-way shall be provided where any part of the subdivision is on both sides of the street.

2. When the subdivision is located on one side of an existing street, one-half of the required right-of-way, measured from the centerline of the existing roadway, shall be provided.

(f) *Street grades.* Maximum and minimum street grades shall be as follows:

1. Rural arterial, not in excess of ten percent.

2. Rural major and collector streets, not in excess of 12 percent.

3. Rural minor routes, residential streets and alleys, not in excess of 16 percent.

4. No more than 25 percent of the total square feet of pavement within a subdivision may be applied to a grade of 12 to 16 percent.

5. No street grade shall be less than one-half of one percent in cases where streets are curbed and guttered.

6. In meeting these grade and slope requirements on steep terrain, the planning commission suggests wherever feasible that the developer utilize a divided roadway in which the lanes for travel in opposite directions are cut at different levels of elevation. Under certain conditions, this method of giving separate treatment to each travel lane would lessen cut and fill requirements. Median cuts would be used at points where both lanes have the same roadway grade. The median cuts would shorten distance of traveling any one direction and facilitate access to lots served by each lane.

(g) *Horizontal curvature.* The minimum radii of centerline curvature shall be as follows:

1. Arterial streets, as indicated on the road classification map, but in no case less than 800 feet.

2. Collector and rural major streets, 300 feet.

3. Rural minor and residential streets and alleys and other lower classification rural roads (industrial/commercial access, agricultural access, recreation and scenic, resource recovery), 100 feet.

4. Exceptions may be granted based on proven performance for special site requirements.

(h) *Tangents.* Between reverse curves, there shall be tangent having a length not less than the following:

1. Minor arterial streets, not less than 200 feet.
2. Collector and rural major streets, 100 feet.
3. Rural minor, residential streets and alleys and other lower classification rural roads (industrial/commercial access, agricultural access, recreation and scenic, and resource recovery), 25 feet.

(i) *Vertical alignment.* Vertical alignment shall be such that the following requirements are met:

1. Rural arterial streets shall have a sight distance of at least 500 feet at four feet above ground level. (10 x the speed limit or 10 x the algebraic distance, per DOT/AASHTO.)
2. Rural major and collector streets shall have a sight distance of at least 200 feet at four feet above ground level.
3. Rural minor, residential streets and alleys and other lower classification rural roads (industrial/commercial access, agricultural access, recreation and scenic, and resource recovery) shall have a sight distance of at least 100 feet at four feet above ground level.
4. Rural arterial streets shall have a sight distance of at least 500 feet at four feet above ground level.
5. Local rural routes, 75 feet at four feet above ground level.

(j) *Street intersections.* Street intersections shall be as nearly at right angles as possible. No street intersection shall be at an angle of less than 75 degrees, unless required by unusual circumstances.

(k) *Curb-line radii.* Property lines at street intersections shall be rounded with a curb radius of 20 feet. Where the angle of intersection is less than 75 degrees, the platting authorities may require a greater radius. The platting authorities also may permit comparable cut-offs or chords in place of rounded corners.

(l) *Steep slope development.* Street alignments are subject to performance standards as are appropriate to the City of Clarkesville and state construction requirements as may be adjusted to any given site limitations. Driveways and roads coming into a city road shall observe at a minimum a 25-foot deep area, with a slope of no more than two percent, at the intersection with the county right-of-way. No storm water shall run out onto the city road from a subdivision or individual lot or parcel. Stormwater runoff coming from driveways shall be diverted into ditches and away from the city road.

Section 2820. Development/project access improvements.

Single-family detached, single-family attached, duplex residential subdivisions, multi-family and non-residential development.

When property that abuts upon an existing or proposed city or county road is to be developed or redeveloped as a single-family detached or duplex subdivision, multi-family and non-residential development and the city or county road will provide access to the property, access improvements to the city or county road (turn lanes, etc.) shall be provided by the developer as provided herein:

1. Design criteria shall be in accordance with the requirements of this document or the latest edition of the Georgia Department of Transportation's "Regulations for Driveway and Encroachment Control",

2. A right turn deceleration lane shall be required at each subdivision of 25 lots or more and commercial or private industrial project creating more than 50 trips per day with a road/street intersecting with a public road. Right turn deceleration lanes shall have a minimum length of 150 feet with an additional 50 feet taper length. Pavement width shall be 12 feet (exclusive of curb and gutter) if curb and gutter is required. The design thickness of the base and pavement structure shall include eight-inch compacted graded aggregate base course, four-inch compacted asphalt concrete binder and two-inch compacted asphalt concrete "E" of "F" surface course. Additional right-of-way, if required, to accommodate the right turn deceleration lane and shoulder width to match the existing county road (in no case less than a four-foot wide shoulder) shall be acquired and dedicated by the developer to the City of Clarkesville at no cost. Associated drainage improvements as deemed necessary by the construction of the right turn deceleration lane shall be required.
3. In the event a developer desires to construct a median break to serve the subdivision, a left turn lane leading to the median break shall be required to be provided by the developer and shall meet the standards contained in the "GDOT" standards specifications manual" and "Regulations for Driveway and Encroachment Control", current editions.
4. Other access improvements may be required by the county upon the recommendation of either GDOT or the county engineer in order to ensure adequate site access, pedestrian access, convenience and safety to the motoring public.
5. The developer shall be responsible for the relocation of public or private utilities and drainage structures as may be occasioned by the required access improvements.
6. Subdivision street intersections with county maintained roads shall be located to provide adequate sight distance. Minimum intersection sight distances are criteria provided in Table (A). The line of sight establishes the boundary of a sight triangle within which there should be no sight obstruction between the heights of 30 inches and 108 inches. No plants or shrubs shall be planted in this area that grows to a height greater than 30 inches. The sight distance criteria are based on the average time required for a vehicle to make a left or right turn from a stop controlled approach to the public road (AASHTO Case B1 and B2). The time to execute the maneuver is based on recommendations contained in NCHRP Report 383, Intersection Sight Distance. The sight distances, for a two lane road are the distance traveled at the posted speed limit during the average of 6.5 and 7.5 seconds. See AASHTO Green Book, chapter 9 Intersections, for adjustments due to grades greater than three percent and design vehicle other than passenger cars. The developer's engineer shall certify that sight distance requirements are in accordance with table (A), and so state on the preliminary plans at the time of submittal.

TABLE (A)
INTERSECTION SITE DISTANCE REQUIREMENTS

7. A traffic impact study, by the developer's engineer at the preliminary stage when any new road or street is created that abuts/adjoins a public road/street for all developments creating more than 50 trips per day.

Section 2821. Structures on right-of-way.

Right-of-way encroachment--Mailboxes and other structures: This section applies to all arterial, collector and minor roads as defined by the Zoning Ordinance of the City of Clarkesville, Georgia.

A. Mailboxes, city right-of-way.

1. A mailbox that does not conform to the following provisions is an encroachment and shall be removed within 60 days of notification of the violation.

(a) For noncompliance mailbox structures not moved within the 60-day notification period, such removal shall be performed by the City of Clarkesville at the expense of the structure owner.

(b) The City of Clarkesville will assume no liability for damage that may occur in normal maintenance operations for any mailbox not conforming to the standards stated in subsections 1 through 3.

2. No mailbox support shall be allowed to exist on the City of Clarkesville's right-of-way that interferes with the safety of the traveling public on the county road system. The mailbox shall be located in accordance with the rules and regulations set forth by the Highway Safety Administration.

(a) The support or post shall not be made of a masonry nature or by any other material that will not readily yield upon impact;

(b) Nor shall any other construction which could be classified as a hazardous fixed object be allowed; either as a support or as an encasement or housing for the box itself.

(c) When using wood, the size shall be a maximum nominal four inch by four inch or if round, the size will be a maximum of four inches in diameter.

(d) If a metal post is to be used, no larger than three inches in diameter or equivalent shall be allowed and such posts shall be hollow.

(e) When using other materials, the maximum size and configuration shall be determined and approved by the administrative officer prior to installation.

(f) The face of the mailbox shall be no closer than three feet to the edge of the pavement on high-speed (establish threshold speed) routes.

3. Multiple mailbox installations shall meet the same criteria as single mailbox installations. Multiple support installations should have their supports separated a minimum distance equal to three-fourths of their heights above ground. This will reduce interaction between adjacent mailboxes and supports.

B. *Mailboxes--Subdivision roads with low traffic volume and speed.* A mailbox that does not conform to the following provisions is an encroachment and shall be removed within 60 days of notification of the violation

1. Subdivision roads with low traffic volume and speed, shall comply with the following standard:

(a) The supporting structure shall be as described in subsection 2821(A)2 above.

(b) The face of the mailbox shall be no closer than two feet to the edge of the pavement or one foot from the back of the curb.

2. In the event that a request is made to place a subdivision road in the county maintenance system all existing structures on right-of-way shall be brought into compliance with section 2821 of this appendix.

C. *Mailboxes--Existing structures on city or county maintained roads:* Single-entrance subdivision roads with a rural minor road classification that have existing brick or masonry mailbox structures will be allowed so long as they meet the following requirements:

1. No portion of the mailbox or its structure shall be closer than two feet to the edge of pavement or one foot from the back of the curb.

2. The planning commission reserves the right to review all existing mailbox structures on a case-by-case basis as requested.

3. All undeveloped lots within a subdivision on a single entrance, low volume and low speed road shall conform to the specifications for mailbox structures defined in subsection 2821(A)2 above.

D. *Other structures.*

1. Masonry or other type vertical walls that create a hazard will not be allowed on county rights-of-way. Existing masonry or other type walls built on driveways in the right-of-way will comply with the following regulation:

(a) Single entrance subdivision roads with a rural minor road classification that have existing brick, rubble, or masonry driveway headwalls will be allowed so long as they meet the following requirements:

i. The wall shall not come within four and one-half feet of the edge of pavement.

ii. The wall shall not extend above the existing driveway height without having adequate drain holes through the wall.

- iii. The overall height shall not exceed 12 inches above the driveway surface.
 - iv. All undeveloped lots within a subdivision on a single entrance, low volume, low speed road shall conform to these same specifications.
- (b) Subdivision entrances with elaborate cosmetic structures of brick, masonry or other materials forming an island shall conform to the following:
- i. No structure shall extend beyond the right-of-way line of the adjoining street.
 - ii. No structure shall extend vertically to a height that would impair visibility of adjacent vehicle traffic.
 - iii. Structure walls must not lean or protrude over the adjacent pavement so as to hinder resurfacing or maintenance of the surface.
 - iv. No structure shall be placed in conflict with utility facilities.
 - v. Structures placed in the middle of the cul-de-sac shall conform to all of the above specifications.
 - vi. All structures must have some type of approved reflective device or be lit.
 - vii. Any damage to existing structures during routine maintenance of the street will be the liability of the property owner.
- (c) *Exemption for new construction.* Masonry or other type vertical walls may be built on driveways that are located in a platted subdivision on a "rural minor" road, defined herein and classified as a low volume, low speed, residential road that primarily serves the residents of the subdivision. A subdivision road or street that may be used as a cut through or connector road to a main road may not be considered a "minor" road. These structures must conform to the regulations as stated in this section. The City of Clarkesville does not accept maintenance responsibility for these vertical wall structures. The planning commissioners reserve the right to review all structures on a case-by-case basis as requested.

E. *Enforcement.*

1. *Existing structures.* It shall be the responsibility of the public works director to enforce the provisions of this section as it relates to existing structures. The public works director shall notify, in writing, property owners found to be in violation of this section. If the property owners fail to remove the structures(s) in violation within the time allowed by this section, the public works director is authorized to issue a citation to the property owner stating the nature of the violation, the cost to the property owner for removal and the time and date the matter will be reviewed by the board of commissioners. A copy of the citation shall be sent to the chief building inspector. The public works director shall refer the citation to the board of commissioners at its earliest regularly scheduled meeting. The board shall review the facts and if the property owner is found in violation, the public works director shall be authorized and directed to remove structures in violation and to bill the property owner the cost of removal.

In addition, the chief building inspector is directed and authorized to deny any and all construction permits for any property or to any property owner with a structure(s) in violation of this section as cited by the public works director.

Section 2822. Required improvements.

A. *Performance and specifications.* Every subdivider shall be required to make the improvements outlined in this article in accordance with the specifications herein or otherwise adopted by the City of Clarkesville. The necessity for storm drainage on each site will be determined by inspection.

B. *Monuments.* Monumentation shall be done as required by Georgia State Rules Section 108-7-05.

C. *Grading.* All streets, roads, and alleys shall be graded by the subdivider so that pavements and sidewalks, where required, can be constructed to the required cross section. The minimum width of grading shall be the pavement width as specified in section 2819, plus eight feet on each side. Deviation from the above will be allowed only when due to special topographical conditions.

1. *Preparation:* Before grading is started, that part of the right-of-way consisting of the area to be paved plus the shoulders shall be first cleared of all stumps, roots, brush and other objectionable materials and all trees not intended for preservation.

2. *Cuts:* All boulders and other obstructions shall be removed to a depth of two feet below the subgrade. Rock, when encountered, shall be scarified to a depth of 18 inches below the subgrade. All vegetative debris, to include tree stumps and roots must be removed from the site or may be burned in its entirety on site if burning complies with state rules and regulations.

3. *Fill:* All suitable material from roadway cuts may be used in the construction of fills, approaches, or at other places as needed. Excess materials, including organic materials, soft clays, etc., shall be removed from the roadway. The fill shall be spread in layers not to exceed six inches loose and compacted by a sheepsfoot roller. The filling of utility trenches and other places not accessible to the roller shall be mechanically tamped.

4. *Subgrade:* The subgrade shall be properly shaped, rolled and uniformly compacted to conform to the lines, grades, and typical cross-sections as shown on drawings approved by the planning commission. Unsuitable materials shall be excavated and replaced with acceptable compacted material.

D. *Stormwater management plan.* This section is to formulate a plan to manage stormwater runoff so that stormwater hazards are not created and existing runoff-related problems are not exacerbated, either upstream or downstream from or within the boundaries of the development. The stormwater management plan will consist of a stormwater report and construction documents (if applicable) to meet the minimum requirements set forth in this section.

1. A stormwater management plan shall be submitted with the request for land disturbance permit stage and shall contain the following information:

- a. Location of proposed drainage-ways, streams and sediment ponds within the development.
- b. Location, size, and invert elevations of proposed drainage structure including culverts, bridges, pipes, drop inlets and top elevations of headwalls, diversion ditches, etc.
- c. Entire area of land contributing runoff to each drainage feature whether land is inside the development or outside the development.
- d. Location of easements and right-of-way for drainage ways and maintenance accesses therefore.
- e. Typical improvement around drainage features and culverts, if any.
- f. Direction of waterflow throughout the subdivision and computed velocities at those points deemed necessary by the review agency staff.
- g. Detailed engineering drawings on all impoundment structures, dams, sediment ponds, etc.

2. A stormwater management plan must be prepared for new development or redevelopment to any site that meets one or more of the following criteria:

- a) A new development in which 5,000 square feet or greater of new impervious area is created or that involves the land disturbing activity of one acre of land or greater.
- b) Land development activity on a redevelopment site that constitutes more than 50 percent of the site area for the entire site or increases the impervious area on site by more than 5,000 square feet.
- c) Any commercial or industrial development. (All commercial and industrial developments must have at least one storm water management facility).

3. The following development activities may be exempt from a stormwater management plan:

- a) Developments that do not create the addition of 5,000 square feet of impervious surfaces or disturb more than one acre of land.
- b) Individual single-family residential lots. (Single-family lots that are part of a subdivision or phased development project are not exempt.)
- c) Additions or modifications to existing single-family structures.
- d) Agricultural and silvicultural construction is exempt.

E. Stormwater report: A storm water hydrology report shall be provided to ensure that the requirements and criteria in these regulations are being complied with and that opportunities are being taken to minimize post-development stormwater runoff impacts from the development. The stormwater hydrology report shall identify the locations and quantities of stormwater runoff entering and exiting the site for both existing and developed conditions. The report at a minimum shall consist of pre and post developed topographic drainage maps delineating study points, drainage basins, soil types, runoff coefficients/curve numbers and land cover. In addition the report shall contain: a brief narrative, a vicinity map, a chart summarizing the water runoff associated with the proposed development and supporting design calculations for any proposed stormwater management facility (such as and including stage-storage or outlet rating curves and inflow and outflow hydrographs, pre and post developed hydrographs). Pond discharge locations shall be in defined drainage ditches or piped systems. If this is not possible the hydrology report shall address the creation of concentrated flows where none had occurred previously. The design professional shall ensure that the addition of any stormwater management facility within its watershed basin does not adversely affect down stream property owners or storm water drainage systems and structures. Stormwater hydrology reports shall be conducted in accordance with the criteria established in this section and must be submitted with the stamp and signature of a professional engineer (PE) licensed in the State of Georgia.

F. Stormwater management facilities: Stormwater management facilities shall be implemented to control post-developed stormwater runoff. The facility shall be designed so that the peak release rates (when combined with all detention bypass areas) are equal to or less than the pre developed runoff rates at the same location. The facility will be designed to control the two to 50-year storm events. The facility shall also provide the safe passage of the 100-year storm event while providing one foot of free board between the 100-year pond elevation and the top of the dam. A proposed storm water management facility must be accompanied by a set of construction documents, signed by a design professional, depicting the location and layout of the proposed facility and provide details for the construction of the facility (ex. outlet structures, dams, positive drainage other structural controls, etc.) All stormwater facilities shall be enclosed by fencing and an access gate where the sides of the facility adjacent to the water are steeper than 3:1 and the depth of the water in the pond is greater than three feet. The owner of the property on which the facility is located shall be responsible for maintaining all stormwater management facilities. A clean-out marker showing two-thirds volume level of the pond shall be designated on the outlet structure to facilitate inspection of the facility. If it is determined that the facility is not hydraulically functioning as designed, due to inadequate maintenance, the city may conduct inspections and maintenance on the facility and the owner will be responsible for all expenses involved. A 25-foot easement

measured from the elevation of the 100-year storm event within the facility and a 25-foot access easement to the facility shall be provided to the county. The county shall notify the owner 24 hours prior to any inspection or maintenance work which involves accessing the easement. All stormwater management facilities shall be designed in accordance with the criteria established in this section and plans and reports must be submitted with the stamp and signature of a professional engineer (PE) licensed in the State of Georgia.

1. *Stormwater conveyance pipes:* All culverts, cross drain, storm sewers or other drainage facilities under the county's jurisdiction shall be designed to accommodate all runoff from its entire upstream drainage area and be based upon the 25-year storm event.

2. An adequate drainage system, including necessary open ditches, pipes, culverts, intersectional drains, drop inlets, bridges, etc., shall be provided for the proper drainage of all surface water. Cross-drains shall be provided to accommodate all natural waterflow, and shall be of sufficient length to permit full width roadway (roadway is defined as the portion of a road or street within the limits of construction) and the required slopes. The culvert pipe size to be provided shall be determined based on an engineering study. In no case shall the pipe diameter for cross drain pipe be less than 18 inches. Side drain pipe (driveway, etc.) shall not be less than 15 inches in diameter.

a. All pipe used for cross drains shall consist of one of the following:

i. Reinforced concrete pipe.

ii. Metal pipe with paved invert and coated with bituminous material.

E. *Installation of utilities and driveways.* After grading is completed and approved and before any base is applied, all of the underground work, water mains, gas mains, etc., and all service connections shall be installed completely and approved throughout the length of the road and across the flat section. All driveways for houses as they are built shall be cut and drained from the right-of-way.

F. *Water supply system.* Water mains within the subdivision must be provided with connections to each lot from a community water system controlled by EPD or public water system. Minimum diameter of water pipes shall normally be six inches. Fire hydrants must be provided at not more than 1,000 feet intervals whenever community or public water system is used. Required fire hydrants shall be served with adequate water volume and pressure as required by the fire chief and the governing body of The City of Clarkesville.

G. *Sanitary sewers.* If the sewage disposal facilities cannot be connected to a trunk line sewer at the time of the development of the subdivision; septic tanks, or another approved method of treatment of sanitary sewerage shall be installed by and at the expense of the subdivider or lot purchaser for interim use, in conformity with the requirements of the county health department. Plans shall be reviewed by the appropriate municipality or county facility accepting the waste. Further, approved sanitary sewage methods other than septic tanks shall include the maintenance and ownership agreements and requirements explained in detail. In addition, once the proposed plans are approved by a municipality the building and planning department shall review and approve the plans for installation on county right-of-way. A sanitary sewer plan shall be provided for those developments offering such service. See Appendix A, Form 2.

1. *Final approval.* Public streets to be accepted by the county will be at the discretion of the governing body. Road acceptance, and acceptance of any other dedicated easement to the county, shall only be accomplished by written resolution, adopted by the governing body at a public meeting; approval of the final plat does not indicate acceptance of roads or easements by the county. Final approval will be considered upon separate written request by the developer, subdivider or any person or persons who own all fee simple interest in the subject road to the governing body and in accordance with one of the following:
 - (a) The subdivider shall post with the city a guaranty bond or other approved surety in an amount equal to 25 percent of the street and utility improvement cost, verified by the city engineer, and approved by the governing body for the street for which acceptance is sought. Said bond will guarantee the city that the street and utility improvements have been installed in a workmanlike manner, that they are free from defects caused by faulty materials or workmanship and that the street and utility improvements will remain in acceptable condition for a period of at least 18 months. Before taking action on a conditional use application, the Council shall hold a hearing in accordance with Section 6, and shall consider the standards in Section 3.5. At the conclusion of the public hearing, the Council may approve or deny the application, delete conditions and/or impose additional conditions, or defer a decision until a specified meeting date.

3.5 Standards for Conditional Use Application Decisions. A conditional use shall be approved only when it is determined based on the evidence presented at the public hearing that all of the following conditions have been met:

- (1) the proposed use will not be detrimental to adjacent properties or the general neighborhood, the proposed use will not significantly adversely affect public health, safety, morality and welfare, and the proposed use as designed will minimize adverse effects on the surrounding neighborhood;
- (2) applicable standards in Article VIII have been met;
- (3) the proposed use is consistent with the Comprehensive Plan, and the conditional use is compatible with the community development pattern;
- (4) a rezoning to allow the requested use as a permitted use would not be appropriate;
- (5) the proposed use will not be injurious to the natural environment or the other property in the immediate vicinity, or unconstitutionally diminish property values within the surrounding neighborhood;
- (6) off-street parking and loading, and access thereto, will be adequate;
- (7) public facilities and utilities are capable of adequately serving the proposed use, and the use would not lead to a major negative change in existing levels of public service, or fiscal stability;
- (8) the use will not be an extension of a use which will cause a damaging volume of (a) agricultural, (b) commercial, (c) industrial, or (d) higher density residential use into a stable neighborhood of well-maintained single-family homes, nor likely lead to decreasing surrounding property values, neighborhood deterioration, spreading of blight, or additional requests of a similar nature which would expand the problem;
- (9) the use would not significantly increase congestion, noise, or traffic hazards; and,
- (10) granting this request would not have a "domino effect," in that it becomes the opening wedge for further rapid growth, urbanization or other land-use change beyond what is indicated in the Comprehensive Plan.

Section 4 Variances.

The City Council may in specific cases approve such variance from the terms of this Ordinance as will not be contrary to the public interest where, due to special circumstances, a literal enforcement of the Ordinance in an individual case, will result in unnecessary hardship, so that the spirit of the Ordinance shall be observed, public safety and welfare secured, and substantial justice done. A non-conforming use of neighboring land, buildings, or structures in the

same district or permitted or non-conforming uses in other districts shall not constitute a reason for the requested variance.

4.1 Use Variance Prohibited. No variance may be granted that would permit a use not permitted by right or as a conditional use in the district.

4.2 Application Procedure.

(1) Application Contents. Each application for a variance must be submitted to the Zoning & Planning Official at least forty-five (45) days before any hearing by the Planning Commission. Each application shall include all the following information about the subject property:

- (a) name and address of applicant;
- (b) location of structure and/or use for which the variance is sought, as shown on a plat by a licensed surveyor;
- (c) relationship of structure and/or use to existing structures and uses on adjacent lots;
- (d) specific sections of this Ordinance which would cause hardship;
- (e) characteristics of property relating to its size, shape or topography that prevent compliance with this Ordinance;
- (f) the particular hardship that would result from strict application of this Ordinance;
- (g) for any application for an overlay district, a Certificate of Appropriateness or a letter of support from the Better Hometown Design Committee; and,
- (h) any other pertinent information that the Building & Zoning Administrator, Planning Commission or Council may require, including without limitation the application contents required by 2.4(1).

(2) Filing Fee. All applications for variance shall be accompanied by payment of a non-refundable fee as established by the *City of Clarkesville*.

(3) Disclosure Report. The requirements of Section 7 apply.

(4) Withdrawal of Variance Application. Any application may be withdrawn at any time at the discretion of the applicant without prejudice, upon written notice to Zoning Administrator, prior to a decision by the Council.

(5) Procedure Relative to Ex Parte Contact With Mayor and Council. The Planning Commission is not subject hereto. To maintain transparency and to avoid any appearance of impropriety in the decision-making process, there shall be no unsolicited substantive ex parte (individual) communication with the Mayor or Council members by an applicant or his/her representative(s) or by supporters of or opposition to the rezoning, unless the Mayor or Councilperson agrees to such. Unsolicited E-mails, letters and faxes to the Mayor and Council as a whole, copied to the City Planner and City Clerk, are permissible. They will be made a part of the record. The applicant and his/her representative(s) and supporters and opponents are to limit their unsolicited verbal contacts with City officials and employees to the Zoning Administrator, City Manager, and to the City Attorney if the proposed contact is from legal counsel. Mayor and Council members will accept verbal presentations in the advertised public hearings and meetings, and via express solicitation or agreement in other instances. If an individual Mayor or Council member received unsolicited, unwanted substantive verbal communication by an applicant or his/her representative(s) or by supporters or opposition, said Mayor or Council member shall direct that person to the City Planner, City Manager and City Attorney and advise the person of upcoming public hearings, and disclose such to the Mayor and Council at the public hearing.

4.3 Notice Procedure. The requirements of Section 4 apply.

4.4 Planning Commission Hearing and Recommendations. The Planning Commission shall consider the standards in Section 4.6 prior to making any recommendation. Hearings shall comply with Section 6.

4.5 City Council Hearing and Decision. Before taking action on a variance application, the Council shall hold a hearing in accordance with Section 6, and shall consider the standards in Section 4.6. At the conclusion of the public hearing,

the Council may approve or deny the application, approve with modifications or conditions, or defer a decision until a specified meeting date.

4.6 Required Findings for Variance Approval.

- (1) there are extraordinary and exceptional conditions pertaining to the property because of size, shape, or topography;
- (2) the literal application of this Ordinance would create an unnecessary hardship;
- (3) variance would not cause substantial detriment to public good or impair the purposes or intent of this Ordinance;
- (4) a variance will not confer upon the property of the applicant any special privilege denied to other properties in the district;
- (5) the special circumstances surrounding the request for the variance are not the result of acts by the applicant;
- (6) the variance is not a request to permit a use of land, buildings, or structures which is not permitted by right or by conditional use in the district;
- (7) the zoning proposal is consistent with the construction and design standards and design criteria adopted by the City of Clarkesville; and,
- (8) the variance is the minimum variance that will make possible an economically viable use of the land, building, or structure.
